

St. Lucie Nuclear Power Plant

IMPORTANT SAFETY INFORMATION FOR NEIGHBORS

Power Plant 10-Mile Radius and Evacuation Areas

This guide contains important emergency planning information for people located within 10-miles of the St. Lucie Nuclear Power Plant. It was developed by emergency management officials and provides basic information about what to do in the event of a nuclear emergency. **For more details about how to prepare for an emergency visit: Fpl.com/PSLEmergency**

IN AN EMERGENCY

- » If an emergency at the St. Lucie Nuclear Power Plant requires you to take any action, outdoor warning sirens will sound throughout the entire 10-mile emergency planning zone.
- » Emergency management officials will issue emergency alerts via radio and television transmission signals as well as mobile and digital emergency alert networks.
- » Outdoor warning siren tests are conducted by local emergency management officials on the first Thursday of March, June, September and December.

An **Unusual Event** is a minor incident such as severe weather.
No public action is required.

An **Alert** is a minor incident that affects, or could potentially affect, reactor safety.
No public action is required.

A **Site Area Emergency** is a more serious incident. Sirens should sound, alerting the **public to tune to local radio or television stations for official information.**

A **General Emergency** is the most severe emergency classification. Sirens will sound, alerting the **public to tune to local radio or television stations for official information.**

WHAT YOU SHOULD DO

- » If you hear an outdoor warning siren or receive an emergency alert, tune to local radio or television stations or check the Internet for more information. **Hearing a siren does not mean to evacuate.**
- » If there is an emergency, please check with family, friends and neighbors in the area to ensure they are aware of the situation and can take action if needed.
- » If you have a family member in a nursing home or hospital, **do not try to pick them up.** These facilities also have their own emergency evacuation procedures.
- » If your children are in school, familiarize yourself with the school's emergency response plan. **Do not go to the school.** If instructed to relocate, students will be relocated to emergency reception centers beyond the 10-mile emergency planning zone. You can pick up your children at those locations.
- » Monitor local media outlets for updates.

For a printed copy of emergency preparedness materials please contact your local county department of public safety or emergency management. Retain this card for use in an emergency.
