GOV. SCOTT ISSUES UPDATE ON DEPARTMENT OF TRANSPORTATION PROGRESS IN LEON COUNTY

TALLAHASSEE, Fla. – Today, Governor Rick Scott issued the below update on the Florida Department of Transportation's (FDOT) progress in recovery efforts following Hurricane Hermine. Since Friday, September 2nd, FDOT has been working non-stop to do the following:

- Clear debris such as downed trees and fallen tree limbs
- Install 200 generators in the Tallahassee area to support the operation of traffic signals
- Perform road and bridge assessments

On Sunday, September 4th, the City of Tallahassee accepted Governor Scott's offer for additional contractors from private companies to help the city restore power. These companies are working side-by-side with FDOT personnel and are currently working to remove downed trees and fallen tree limbs, as well as other debris that impact downed power lines in Tallahassee. These contractors are also providing over-line support to the debris removal crews. The crews began work yesterday across the city and are being paid for by state funds.

Today, FDOT dispatched five additional crews in Leon County. There are now 15 FDOT crews in Leon County with more than 205 men and women working on debris removal and power restoration efforts.

The following table details the progress made by the crews to clear debris and help power restoration efforts since beginning work yesterday morning:

- **Green indicates a completed job**
- **Yellow indicates a job that is currently being assessed and worked by FDOT crews**
- **Blue indicates a site where FDOT/state contract crews are currently performing initial assessments to determine if live wires are present and take the necessary safety precautions**

HAZARD LOCATION	STATUS	EST. COMPLETION TIME
Stearn St - between Eugenia St and Mosely St	Complete	
Dozier Drive - North of E Orange Ave	Complete	
Live Oak Plantation Rd - Multiple trees down between N Meridian Rd and Thomasville Rd	Complete
