CAPABILITIES

Command and Control
- Joint Operations Center (JOC)
- Joint Air Operations Center (JAOC)-Air Coordination
- Mobile Operations Center (MOC)
- State Coordination Assistance Teams (SCATs)
- Major Command Staff Support
- SEOC Spt (ESF 5/13/14)
- State Emergency Response Team (SERT) Liaison Officers (LNOs)
- Safety Teams
- Robust Communications

Security
- National Guard Reaction Force (NGRF)
- Street Patrols
- Traffic Control Points
- Fixed site security
- Curfew Enforcement
- Law Enforcement support

Humanitarian Assistance
- Points of Distributions (PODS)
- Logistical Staging Areas (LSAs)
- Ground Distribution
- Medical Evacuation (MEDEVAC)

Service Support
- Supply
- Transportation
- Maintenance
- Medical

Supporting Operations
- Aerial Reconnaissance
- Ground Reconnaissance
- Search and Rescue
- Chemical, Biological, Radiological, Nuclear, high yield Explosives (CBRNE)
  - CBRNE Enhanced Response Force Package (CERFP)
  - Civil Support Team (CST)
- Fire Fighting
- Joint Reception, Staging, and Onward Integration (JRSOI)
- Aviation
CIVIL SUPPORT TEAMS
44TH AND 48TH

MISSION:
• Support civil authorities at a CBRNE site:
  - Chemical
  - Biological
  - Radiological
  - Nuclear
  - Explosive (high yield)
• Identify, assess, advise, assist

*Analytical, advisory, civil-military interface and communications functions

KEY CHARACTERISTICS:
• Certified by Secretary of Defense
• Unique National Guard capability
• Main role is support to Governor and IC
• Operate only in US and territories
• Non-military equipment
• 22 Full-time Personnel (14 Military Specialties)
• Sophisticated Reachback System
• Interoperable with Civil Responders

*48th CST operational Fall 2010

22 Full Time personnel
8 Vehicles
MISSION:
- Conduct decontamination, medical triage, and extraction operations
  - in response at CBRNE events
  - In support of local, state, tribal, and federal agencies.

* Fills 0-72 hour gap between incident response and more robust follow-on capabilities

KEY CHARACTERISTICS:
- **Search and Extraction** - Mission sets include Urban and Rural Search, technical extraction, cribbing/shoring, high angle extraction, ropes operations, limited confined space operations.
- **Mass Decontamination** – Can process 75 non-ambulatory, 225 ambulatory, or DECON 100 people/hour within 90 minutes after arrival.
- **Medical Triage** - Provides casualty emergency medicine (triage), short duration emergency critical care stabilization for patient transfer to EMS within 15 minutes after arrival

165 Personnel (5 Full Time)
17 Vehicles
**Disaster Response**

Regional Emergency Response Network

- $18.5M invested
- 17 systems
- Deployed regionally
  - Hurricane Gustav (LA)
  - Hurricane Ike (TX)
  - POTUS Inauguration (NCR)
  - Kentucky Ice Storm (KY)

Emergency Cellular Expansion (FY11)

**Interoperable Comms Across Local-State-Federal**

Mission Screening

Is there a legitimate need?
• Does it meet the current mission priorities?
• Is this a new requirement?
• If not who did it before the emergency?

Are other forces available?
• NG is expensive ($50-300/day)
• NG is high demand, low density asset for the state
• Shouldn’t use NG if civilian volunteers, contract personnel are available
Information Requirements

- Size and boundaries of AO
- Urban, rural, residential, industrial, business
- Day/night mix (i.e. 1/3 day 2/3 night)
- Specific areas of concern (Prisons, mental health facilities, gun shops, high crime areas, gang activity)
- Guidance on curfews and who gets through
- Commo plan- freqs, call signs, reporting requirements, emergency procedures
- What is being secured at static sites
- Mission duration
- Required PPE or special equipment
- Confirm Rules for Use of Force, detention, arrest guidance and procedures
- LEA POCs and link up information
- Health Risks
