BUREAU OF COMPLIANCE PLANNING AND SUPPORT
RISK MANAGEMENT PLANNING UNIT
RMP DOCUMENTATION REVIEW / ON-SITE AUDIT CHECKLIST**

AUDIT CHECKLIST FOR PROGRAM LEVELS 1, 2 & 3**LIST CHEMICALS AND PROGRAM LEVELS REPORTED IN RMP:**

CHEMICAL : _____ PROGRAM LEVEL _____
 CHEMICAL : _____ PROGRAM LEVEL _____
 CHEMICAL : _____ PROGRAM LEVEL _____
 CHEMICAL : _____ PROGRAM LEVEL _____
 CHEMICAL : _____ PROGRAM LEVEL _____

Owner/Operator Name: _____
 Facility Name: _____
 Street Address: _____
 City, State, Zip: _____
 Mailing Address: _____
 City, State, Zip: _____
 RMP Contact Name: _____
 Facility Phone #: _____
 E:mail Address: _____

CHECK TYPE(S) OF AUDIT AS APPLICABLE:

_____ DESK AUDIT DOCUMENTATION REVIEW
 _____ ON-SITE AUDIT / INSPECTION
 _____ ON-SITE DOCUMENTATION REVIEW
 _____ INTERVIEWS WITH FACILITY REPRESENTATIVES
 _____ INTERVIEWS WITH FACILITY EMPLOYEES

EPA Identifier # : _____
 Notice of OS Audit Sent: _____
 On-Site Audit Date: _____
 Audit Team Leader: _____
 Audit Team Member: _____
 Audit Team Member: _____
 Facility Representative: _____
 Facility Representative: _____
 Facility Representative: _____

CHECKLIST KEY:

Y = YES indicates that the facility had documentation for the corresponding item at the time of audit and/or inspection.

N = NO indicates that the facility did not have documentation for the corresponding item at the time of audit and/or inspection.

P = PARTIAL indicates that the documentation was incomplete at the time of audit and/or inspection.

NA = NOT APPLICABLE indicates the documentation was not required or the item was not applicable to facility at time of audit and/or inspection.

NR = NOT REVIEWED at the time of audit and/or inspection.

UN = UNAVAILABLE indicates that the documentation was not available for review at the time of the audit and/or inspection.

ND = NOT DETERMINED indicates that the auditor is unable to determine or evaluate compliance of item at the time of the audit and/or inspection.

Management System 68.15	
1	• Management system to oversee the implementation of risk management program elements is developed and implemented. 68.15(a)
2	• A qualified person or position is assigned the overall responsibility of RMP development, implementation, and integration. 68.15(b)
3	• Other persons responsible for implementing individual requirements of the risk management program are documented and lines of authority are defined through an organizational chart. 68.15(c)
Hazard Assessment Documentation Review	
	For worst-case release scenarios, has the owner/operator (o/o) maintained records of the following: 68.39(a)
4	• A description of the vessel or pipeline and substance selected. 68.39(a)
5	• The assumptions and parameters used. 68.39(a)
6	• The rationale for selection of specific scenarios. 68.39(a)
7	• The anticipated effects of administrative controls and passive mitigation on the release quantity and rate. 68.39(a)
	For alternative release scenarios, has the o/o maintained records of the following: 68.39(b)
8	• A description of the scenarios identified. 68.39(b)
9	• The assumptions and parameters used. 68.39(b)
10	• The rationale for selection of specific scenarios. 68.39(b)

Hazard Assessment Documentation Review	
11	• The anticipated effects of the administrative controls and passive mitigation on the release quantity and rate. 68.39(b)
	For all release scenarios, has the o/o maintained records of the following:
12	• Documentation of estimated quantity released, release rate, and duration of release? 68.39(c)
13	• Methodology used to determine distance to endpoints. 68.39(d)
14	• Data used to estimate population and environmental receptors potentially affected. 68.39(e)
	For defining off-site impacts, has the o/o:
15	• Used most recent Census data, or other updated information to estimate the population. 68.30(c)
16	• Relied on information provided on local U.S.G.S. maps, or on any data source containing U.S.G.S. data to identify environmental receptors. 68.33(b)
	Has the o/o:
17	• Completed a revised RMP within six months of a change in processes, quantities stored or handled, or any other aspect that might reasonably be expected to increase or decrease the distance to the endpoint by a factor of two or more. 68.36(b)
18	COMMENTS:

Program Level 2 Prevention Program		
Safety Program 68.48		
	The o/o has compiled and maintained the following up-to-date safety information, related to the regulated substances, processes, and equipment:	68.48
19	• Material Safety Data Sheets (MSDSs) that meet the requirements of the OSHA Hazard Communication Standard [29 CFR 1910.1200(g)]. 68.48(a)(1)	
20	• Maximum intended inventory of equipment in which the regulated substances are stored or processed. 68.48(a)(2)	
21	• Safe upper and lower temperature, pressure, flows, and composition. 68.48(a)(3)	
22	• Equipment specifications. 68.48(a)(4)	
23	• Codes and standards used to design, build and operate the process(es). 68.48(a)(5)	
24	• The o/o has ensured process is designed in compliance with recognized and generally accepted good engineering practices, industry codes and standards, or federal and state regulations that address safe design. 68.48(b)	
25	• Safety information is updated if a major change occurs that makes the information inaccurate. 68.48(c)	
26	COMMENTS:	
Hazard Review 68.50		
27	• A hazard review is conducted of the hazards associated with the regulated substances, processes, and procedures. 68.50(a)	
	The hazard review identifies the following:	68.50(a)
28	• Hazards associated with the process and regulated substances. 68.50(a)(1)	
29	• Opportunities for equipment malfunctions or human errors that could cause an accidental release. 68.50(a)(2)	
30	• The safeguards used or needed to control hazards or prevent equipment malfunction or human error. 68.50(a)(3)	
31	• Any steps used or needed to detect or monitor releases. 68.50(a)(4)	
32	• The o/o determined (by inspecting all equipment) that the process is designed, fabricated, operated with applicable standards, rules, if designed to meet industry standards or federal or state design rules. 68.50(b)	
33	• Results of hazard review are documented. 68.50(c)	
34	• The o/o has ensured that problems identified by the hazard review are resolved in a timely manner. 68.50(c)	
35	• The hazard review is updated at least once every five years. 68.50(d)	
36	• The hazard review is updated whenever a major change in a process occurs 68.50(d)	
37	• All issues identified in the hazard review are resolved before startup of a changed process. 68.50(d)	
38	COMMENTS:	

Program Level 2 Prevention Program		
Operating Procedures 68.52		
39	• Written operating procedures are prepared that provide clear instructions or steps for safely conducting activities associated with each covered process consistent with the safety information for that process. (NOTE: Operating procedures or instructions provided by equipment manufacturers or developed by persons or organizations knowledgeable about the process and equipment may be used as a basis for a facility's operating procedures.) 68.52(a)	
	Do the operating procedures include the following steps for each operating phase:	68.69(a)
40	• Initial startup. 68.52(b)(1)	
41	• Normal operations. 68.52(b)(2)	
42	• Temporary operations. 68.52(b)(3)	
43	• Emergency shutdown and operations. 68.52(b)(4)	
44	• Normal shutdown. 68.52(b)(5)	
45	• Startup following a normal or emergency shutdown or a major change that requires a hazard review. 68.52(b)(6)	
46	• Consequences of deviations and steps required to correct or avoid deviations. 68.52(b)(7)	
47	• Equipment inspections. 68.52(b)(8)	
48	• The o/o has ensured that the operating procedures have been updated, if necessary, whenever a major change occurred and prior to the startup of the changed process. 68.52(c)	
49	COMMENTS:	
Training 68.54		
50	• Employees involved in operating a process, and before being involved in operating a newly assigned process, have been trained or tested competent in the operating procedures provided in S. 68.52 that pertain to their duties. 68.54(a)	
51	• Certified in writing that operation employees already operating a process on June 21, 1999 have the required knowledge, skills and abilities to safely carry out the duties and responsibilities as provided in the operating procedures. (NOTE: S. 68.54(a) allows in lieu of initial training for employees already involved in operating a process on June 21, 1999, o/o may certify in writing the employee has required knowledge, skills, & abilities to safely carry out the duties & responsibilities as specified in the operating procedures.) 68.54(a)	
52	• Refresher training is provided at least once every three years, or more often if necessary, to each employee involved in operating a process. 68.54(b)	
53	• The o/o, in consultation with the employees operating the process, determined the appropriate frequency of refresher training. 68.54(b)	
54	• Operators are trained in any updated or new procedures prior to start up of the process after a major change. 68.54(d)	
55	COMMENTS:	

Program Level 2 Prevention Program		
Maintenance 68.56		
56	• Written procedures to maintain the on-going mechanical integrity of process equipment are prepared and implemented. 68.56(a)	
57	• Employees involved in maintaining the on-going mechanical integrity of a process are trained in the hazards of the process, in how to avoid or correct unsafe conditions, and in the procedures applicable to the employee's job tasks. 68.56(b)	
58	• Every maintenance contractor has ensured that each contract maintenance employee is trained to perform the maintenance procedures developed under paragraph 68.56(a) of this section. 68.56(c)	
59	• Performed and performs inspections and tests on process equipment that follow recognized and generally accepted good engineering practices. 68.56(d)	
60	COMMENTS:	
Compliance Audits 68.58 [*NR until 6/21/02]		
61	• The o/o certified that they have conducted compliance audits at least every three years to verify that the procedures and practices are adequate and are being followed. 68.58(a)	
62	• Compliance audit(s) conducted by at least one person knowledgeable in the process. 68.58(b)	
63	• A report of audit findings is developed. 68.58(c)	
64	• Documentation of responses to each of the findings of compliance audit(s). 68.58(d)	
65	• The o/o has promptly developed and documented an appropriate response to each of the findings of the audit. 68.58(d)	
66	• Deficiencies have been corrected and documented. 68.58(d)	
67	• The two most recent compliance audit reports are retained (for 5 years). 68.58(e)	
68	COMMENTS:	
Incident Investigation 68.60		
69	• Each incident which resulted in, or could reasonably have resulted in a catastrophic release has been investigated. 68.60(a)	
70	• Each incident investigation is initiated not later than 48 hours following the incident. 68.60(b)	
71	• A summary of the incident investigation is prepared and documented at the conclusion of each investigation. 68.60(c)	
	The summary of the incident investigation includes the following information:	68.60(c)
72	• Date of the incident. 68.60(c)(1)	
73	• Date investigation began. 68.60(c)(2)	
74	• A description of incident. 68.60(c)(3)	
75	• Factors that contributed to incident. 68.60(c)(4)	
76	• Any recommendations resulting from the investigation. 68.60(c)(5)	
77	• Investigation findings and recommendations are promptly addressed and resolved. Resolutions and corrective actions are documented. 68.60(d)	
78	• Investigation findings are reviewed with all affected personnel whose job tasks are affected by the findings. 68.60(e)	
79	• Investigation summaries are retained for five years. 68.60(f)	
80	COMMENTS:	

Program Level 3 Prevention Program		
Process Safety Information 68.65		
81	• Has the o/o compiled written process safety information which includes information pertaining to the hazards of regulated substances, the technology and the equipment of the process before conducting any process hazards analysis (PHA) required by the rule. 68.65(a)	
	Does the process safety information contain the following for the hazards of substances: (NOTE: MSDSs may be used to comply with this requirement to the extent that they include the required information).	68.65(b)
82	• Toxicity information. 68.65(b)(1)	
83	• Permissible exposure limits. 68.65(b)(2)	
84	• Physical data. 68.65(b)(3)	
85	• Reactivity data. 68.65(b)(4)	
86	• Corrosivity data. 68.65(b)(5)	
87	• Thermal and chemical stability data. 68.65(b)(6)	
88	• Hazardous effects of inadvertent mixing of materials that could foreseeably occur. 68.65(b)(7)	
	Does the process safety information contain the following for technology of the process:	68.65(c)(1)
89	• A block flow diagram or simplified process flow diagram is prepared. 68.65(c)(1)(i)	
90	• Process chemistry is defined and documented. 68.65(c)(1)(ii)	
91	• Maximum intended inventory of regulated substances is documented. 68.65(c)(1)(iii)	
92	• Safe upper and lower limits of: temperature, pressure, flows, and composition, are documented. 68.65(c)(1)(iv)	
93	• Consequences of deviations from the above limits (point 6) are evaluated. 68.65(c)(1)(v)	
	Does the process safety information contain the following for equipment in the process:	68.65(d)(1)
94	• Equipment materials of construction. 68.65(d)(1)(i)	
95	• Piping and instrument diagrams. 68.65(d)(1)(ii)	
96	• Equipment electrical classification. 68.65(d)(1)(iii)	
97	• Relief system design and design basis. 68.65(d)(1)(iv)	
98	• Ventilation system design. 68.65(d)(1)(v)	
99	• Design codes and standards employed. 68.65(d)(1)(vi)	
100	• Material and energy balances for processes built after June 21, 1999. 68.65(d)(1)(vii)	
101	• Equipment safety systems (interlocks, detection or suppression systems) are documented. 68.65(d)(1)(viii)	
	Has the o/o determined and documented the following:	68.65(d)(2) & (3)
102	• Equipment complies with recognized and generally accepted good engineering practices. 68.65(d)(2)	
103	• For existing equipment that are designed and constructed in accordance with codes, standards, or practices that are no longer in general use, is designed, maintained, inspected, tested and operating in a safe manner. 68.65(d)(3)	
104	COMMENTS:	

Program Level 3 Prevention Program		
Process Hazards Analysis 68.67		
105	• An initial process hazard analysis (PHA) is performed not later than June 21, 1999. 68.67(a)	
106	• The PHA identifies, evaluates and controls each hazard involved in the process. 68.67(a)&(c)	
107	• Has the o/o determined and documented the priority order for conducting PHAs? 68.67(a)	
	Has the o/o used one or more of the following technologies for conducting PHAs?	68.67(b)
108	• What-If. 68.67(b)(1)	
109	• Checklist. 68.67(b)(2)	
110	• What-If/Checklist. 68.67(b)(3)	
111	• Hazard and Operability Study (HAZOP). 68.67(b)(4)	
112	• Failure Mode and Effects Analysis (FMEA). 68.67(b)(5)	
113	• Fault Tree Analysis. 68.67(b)(6)	
114	• An appropriate equivalent methodology. 68.67(b)(7)	
	Did the PHA address the following:	68.67(c)
115	• The hazards of the process. 68.67(c)(1)	
116	• Identification of any incident with potential for catastrophic consequences. 68.67(c)(2)	
117	• Identification of engineering and administrative controls applicable to the hazards (e.g. hazard detection methods). 68.67(c)(3)	
118	• Consequences of failure of engineering and administrative controls are documented. 68.67(c)(4)	
119	• Stationary source siting. 68.67(c)(5)	
120	• Human factors hazards are documented. 68.67(c)(6)	
121	• Qualitative evaluation of a range of possible safety and health effects in case of failure of controls is identified and documented. 68.67(c)(7)	
122	• The PHA is conducted by a team with expertise in engineering, process operations, and PHA methodology. 68.67(d)	
123	• The o/o has established a system to promptly address the team's findings & recommendations; assures that the recommendations are resolved in a timely manner & documented; documents what actions are to be taken; completes actions as soon as possible. 68.67(e)	
124	• Written schedule for actions required by the PHA is developed and implemented. 68.67(e)	
125	• Actions are communicated to operating, maintenance, and other affected employees. 68.67(e)	
126	• The PHA is updated and revalidated at least every five years after the initial PHA by a team meeting the requirements of item 8. 68.67(f)	
127	• The PHA documentation is retained for the life of the process. 68.67(g)	
128	COMMENTS:	

Program Level 3 Prevention Program		
Operating Procedures 68.69		
129	• Written operating procedures are developed and implemented that provide instructions or steps for conducting activities associated with each covered process consistent with the safety information. 68.69(a)	
	Do the operating procedures include the following steps for each operating phase:	68.69(a)
130	• Initial startup. 68.69(a)(1)(i)	
131	• Normal operations. 68.69(a)(1)(ii)	
132	• Temporary operations. 68.69(a)(1)(iii)	
133	• Emergency shutdown procedures. 68.69(a)(1)(iv)	
134	• Conditions under which emergency shutdown is required. 68.69(a)(1)(iv)	
135	• Assigns person(s) responsible for emergency shutdown to ensure emergency shutdown is executed in safe & timely manner. 68.69(a)(1)(iv)	
136	• Emergency operations. 68.69(a)(1)(v)	
137	• Normal shutdown. 68.69(a)(1)(vi)	
138	• Startup following a turnaround, or after emergency shutdown. 68.69(a)(1)(vii)	
	Do the operating procedures address the following operating limits:	68.69(a)(2)
139	• Consequences of deviation from operating limits. 68.69(a)(2)(i)	
140	• Steps required to avoid or correct deviations in operating limits. 68.69(a)(2)(ii)	
	Do the operating procedures address the following safety and health considerations:	68.69(a)(3)
141	• Properties of, and hazards presented by, the chemicals used in the process. 68.69(a)(3)(i)	
142	• Precautions necessary to prevent exposure (including engineering controls, administrative controls, personal protective equipment). 68.69(a)(3)(ii)	
143	• Control measures to be taken in case of physical contact or airborne exposure. 68.69(a)(3)(iii)	
144	• Quality control for raw materials and control of hazardous chemical inventory levels. 68.69(a)(3)(iv)	
145	• Any special or unique hazards. 68.69(a)(3)(v)	
146	• Safety systems and their functions. 68.69(a)(4)	
147	• Operating procedures are readily accessible to employees involved in each process. 68.69(b)	
148	• Annual certification that operating procedures are current and accurate and procedures have been reviewed as often as necessary. 68.69(c)	
149	• Safe work practices have been developed and implemented for control of hazards during specific operations (i.e., lockout/tagout, confined space entry, entrance/access procedures, opening process equipment/piping) for employees and contractor employees. 68.69(d)	
150	COMMENTS:	

Program Level 3 Prevention Program		
Training 68.71		
151	<ul style="list-style-type: none"> Employees presently involved in operating a process, and before being involved in operating a newly assigned process, are provided with initial training in an overview of the process and the operation procedures. 68.71(a)(1) 	
152	<ul style="list-style-type: none"> Initial training includes emphasis on safety and health hazards, emergency operations including shutdown, and safe work practices applicable to the employee's job tasks. 68.71(a)(1) 	
153	<ul style="list-style-type: none"> Certified in writing that operation employees already operating a process on June 21, 1999 have the required knowledge, skills and abilities. (NOTE: S. 68.71(a)(2) allows in lieu of initial training for employees already involved in operating a process on 6/21/99, o/o may certify in writing that the employee has the required knowledge, skills, and abilities to safely carry out the duties and responsibilities as specified in the operating procedures). 68.71(a)(2) 	
154	<ul style="list-style-type: none"> Refresher training provided at least once every 3 years or more often if necessary to each employee involved in operating a process. 68.71(b) 	
155	<ul style="list-style-type: none"> The o/o ascertained and documented in a record that each employee involved in operating a process has received and understood the training required. 68.71(c) 	
156	<ul style="list-style-type: none"> Training records contain: identity of employee, date of training, and the means used to verify that the employee understands the training. 68.71(c) 	
157	COMMENTS:	
Mechanical Integrity 68.73		
158	<ul style="list-style-type: none"> Written procedures to maintain the on-going mechanical integrity of process equipment are established and implemented. 68.73(b) 	
159	<ul style="list-style-type: none"> Employees involved in maintaining the on-going mechanical integrity of process equipment are trained in an overview of the process, its hazards, and job procedures. 68.73(c) 	
160	<ul style="list-style-type: none"> Performed inspections and tests on process equipment (pressure vessels, storage tanks, piping systems, relief valves, vent systems, emergency shutdown systems, controls, monitoring devices, alarms, pumps, etc.) 68.73(d)(1) 	
161	<ul style="list-style-type: none"> The o/o has followed recognized and generally accepted good engineering practices for inspection and testing procedures. 68.73(d)(2) 	
162	<ul style="list-style-type: none"> The o/o has ensured frequency of inspections & tests is consistent with applicable manufacturers' recommendations, good engineering practices, and prior operating experiences. 68.73(d)(3) 	
163	<ul style="list-style-type: none"> Each inspection and test performed on process equipment is documented. 68.73(d)(4) 	
164	<ul style="list-style-type: none"> Documentation of inspections and tests includes: Date of inspection/test, person who performed inspection/test, serial number or identifier of equipment inspected/tested, description of inspection/test performed, and results of inspection/test. 68.73(d)(4) 	
165	<ul style="list-style-type: none"> Equipment deficiencies that were outside acceptable limits defined by the process safety information are corrected before further use or in a safe and timely manner when necessary means were taken to assure safe operation. 68.73(e) 	
166	<ul style="list-style-type: none"> Assured equipment, as it was fabricated, is suitable for the process application for which it will be used in the construction of new plants and equipment. 68.73(f)(1) 	

Program Level 3 Prevention Program		
Mechanical Integrity 68.73		
167	<ul style="list-style-type: none"> Performed appropriate checks and inspections to assure that equipment was installed properly and consistent with design specifications and the manufacturer's instructions. 68.73(f)(2) 	
168	<ul style="list-style-type: none"> Assured that maintenance materials, spare parts, & equipment were suitable for process application for which they would be used. 68.73(f)(3) 	
169	COMMENTS:	
Management of Change 68.75		
170	<ul style="list-style-type: none"> Written procedures to manage changes to process chemicals, technology, equipment, and stationary sources that affect a covered process are established and implemented. 68.75(a) 	
	Procedures assure that the following considerations are addressed prior to any changes:	68.75(b)
171	<ul style="list-style-type: none"> Technical basis for proposed change. 68.75(b)(1) 	
172	<ul style="list-style-type: none"> Impact of change on safety & health. 68.75(b)(2) 	
173	<ul style="list-style-type: none"> Modifications to operating procedures. 68.75(b)(3) 	
174	<ul style="list-style-type: none"> Necessary time period for the change. 68.75(b)(4) 	
175	<ul style="list-style-type: none"> Authorization requirements for the proposed change. 68.75(b)(5) 	
176	<ul style="list-style-type: none"> Operation, maintenance and/or contract employees, whose job tasks would be affected by a change in the process, are informed of, and trained in, the change prior to start-up of the process of affected part of the process. 68.75(c) 	
177	<ul style="list-style-type: none"> If any change resulted in a change in process safety information, was such information updated accordingly. 68.75(d) 	
178	<ul style="list-style-type: none"> If any change resulted in a change in operating procedures or practices, had such procedures or practices been updated accordingly. 68.75(e) 	
179	COMMENTS:	
Pre-Startup Review 68.77		
(*NOTE: For new & modified stationary sources)		
180	<ul style="list-style-type: none"> Pre-startup review for new and/or modified stationary sources is performed when change or modification in a process was significant enough to require a change in process safety information. 68.77(a) 	
	The pre-startup safety review confirmed the following conditions prior to the introduction of regulated substances to a process:	68.77(b)
181	<ul style="list-style-type: none"> Construction and equipment is in accordance with design specifications. 68.77(b)(1) 	
182	<ul style="list-style-type: none"> Safety, operating, maintenance, and emergency procedures are in place and are adequate. 68.77(b)(2) 	
183	<ul style="list-style-type: none"> For new stationary sources, PHA has been performed and recommendations have been resolved/ implemented prior to startup. 68.77(b)(3) 	
184	<ul style="list-style-type: none"> Modified stationary sources meet the requirements contained in management of change. 69.77(b)(3) 	
185	<ul style="list-style-type: none"> Training of each employee involved in operating a process had been completed. 68.77(b)(4) 	
186	COMMENTS:	

Program Level 3 Prevention Program		
Compliance Audits 68.79 [*NR until 6/21/02]		
187	• Certification provided that they have evaluated compliance with the provisions of the prevention program. 68.79(a)	
188	• Compliance audit has been conducted by at least one person knowledgeable in the applicable process. 68.79(b)	
189	• A report of audit findings is developed. 68.79(c)	
190	• Responses to audit findings have been determined and documented. 68.79(d)	
191	• Action on audit findings is taken and documented. Deficiencies have been corrected and corrections are documented. 68.79(d)	
192	• The two most recent compliance audit reports are retained. 68.79(e)
