**HURRICANE RITA INFORMATION SHEET**

HEALTH OFFICIALS WARN OF CARBON MONOXIDE DANGERS

--Generator safety precautions can help prevent poisoning--

Tallahassee –Following the impacts of Hurricane Rita, the Florida Department of Health (DOH) is urging the public to avoid carbon monoxide (CO) exposure by taking precautions with gas-powered appliances and charcoal or gas grills.

Carbon monoxide is an invisible, odorless, tasteless gas, and is highly poisonous. Depending on the level of exposure, CO may cause fatigue, weakness, chest pains for those with heart disease, shortness of breath upon exertion, nausea, vomiting, headaches, confusion, lack of coordination, impaired vision, loss of consciousness, and in severe cases, death.

DOH recommends the following precautions to help prevent carbon monoxide poisoning:

- Do not burn charcoal or gas grills inside a house, garage, vehicle, tent or fireplace.
- NEVER use a generator indoors, including in homes, garages, basements, crawl spaces, and other enclosed or partially enclosed areas, even with ventilation. Opening doors and windows or using fans will not prevent CO build-up in the home.
- ALWAYS locate the unit outdoors on a dry surface, away from doors, windows, vents, and air conditioning equipment that could allow CO to come indoors.
- Follow the instructions that come with your generator. Locate the unit outdoors and away from doors, windows, vents, and air conditioning equipment that could allow CO to come indoors.
- Install battery-operated CO alarms or plug-in CO alarms with battery back-up in your home, according to the manufacturer’s installation instructions. The CO alarms should be certified to the requirements of the latest safety standards for CO alarms (UL 2034, IAS 6-96, or CSA 6.19.01).
- Test your CO alarms frequently and replace dead batteries.
- Remember that you cannot see or smell CO and portable generators can produce high levels of CO very quickly.

Carbon Monoxide Dangers/page 2

- If you start to feel sick, dizzy, or weak while using a generator, get to fresh air RIGHT AWAY. DO NOT DELAY.

- If you have a poisoning emergency, call your nearest Florida Poison Information Center at 1-800-222-1222. If the victim has collapsed or is not breathing, call 911 immediately.

The Centers for Disease Control and Prevention (CDC) recently announced the availability of 30- and 15-second public service announcements in English and Spanish. The CDC is encouraging radio stations to download the public service announcements free from http://www.cdc.gov/nceh/airpollution/carbonmonoxide/ (scroll down to "Public Service Announcements for Carbon Monoxide"). Other broadcast and print media can also use the information to alert viewers and readers.
