

1ft High Resolution Aerial Imagery

Availability:

The year in each county refers to the date of the latest high resolution data that is available. A typical flying season runs from Nov - Feb, so a data set labelled as 2009 was flown sometime between November 2008 and February 2009. The images are in MrSid format.

Price: \$110 for 500gb external hard drive or \$150 for a 1tb external hard drive. Tax (7.5%) and shipping (\$15) are added.

Projection/Resolution:

These aerials are in State Plane Feet with 1 foot resolution, with the exception of occasional counties at .5 foot or 2 foot resolution.

Total size for statewide dataset: approximately 320 gb
