INTRODUCTION

This document is designed to help facility owners and/or operators comply with reporting requirements of the Emergency Planning and Community Right-To-Know Act (EPCRA), Title III of the Superfund Amendments and Reauthorization Act of 1986, 42 U.S.C. s. 11001, et seq. (SARA) and the Florida Hazardous Materials Emergency Response and Community Right-to-Know Act of 1988, Chapter 252, Part II, Florida Statutes. Any facility, public or private, that has present hazardous materials at or above established threshold quantities may potentially be subject to this law. Because EPCRA is complex and has multiple reporting requirements, the State Emergency Response Commission (SERC), a policy board appointed by the Governor, developed this manual to assist facilities in meeting State and federal requirements.

EPCRA is administered by the U.S. Environmental Protection Agency (EPA) and implemented by the Florida Division of Emergency Management (FDEM). The purpose of this law is to encourage emergency planning efforts at the State and local levels and to increase public access to information about potential chemical hazards that may exist in their communities. The reporting data collected annually is used by 10 Local Emergency Planning Committees (LEPCs) to develop regional hazardous materials emergency plans in response to and recovery from a release of extremely hazardous or toxic substances. These regional plans are reviewed and approved by the SERC annually. All chemical data collected, as well as the plans, are available for the general public to review upon request.

EPCRA is divided into three subtitles:

- 1) SUBCHAPTER I: emergency planning and notification of a hazardous materials incident
(Sections 301 through 304).
- 2) SUBCHAPTER II: reporting of hazardous chemical inventories and toxic releases
(Sections 311 through 313).
- 3) SUBCHAPTER III: administration, enforcement and trade secret protection
(Sections 321 through 330). *What are sections 328 - 330?*

NOTE: It is important to review each section independently of one another to determine whether your facility needs to comply with a particular section.

EPCRA utilizes the EPA “List of Lists” for chemical reporting. This list includes chemicals referenced under five federal statutory provisions, listed as follows:

- 1) **EPCRA Section 302 Extremely Hazardous Substances (EHSs);**
- 2) **CERCLA hazardous substances;**
- 3) **CAA Section 112(r) List of Substances for Accidental Release Prevention;**
- 4) **EPCRA Section 313 Toxic Chemicals (a.k.a. Toxics Release Inventory (TRI) Chemicals);**
and
- 5) **CERCLA Hazardous Substance - Chemical Categories.**

The Consolidated List of Chemicals Subject to the Emergency Planning and Community Right-to-Know Act (EPCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and Section 112(r) of the Clean Air Act are listed by the CAS number.

Appendix A of the list is the Consolidated List of Chemicals in alphabetical order.

Appendix B of the list is the CERCLA category for Radionuclides.

Appendix C of the list is specific chemicals from the **RCRA P** and **U** lists.

Appendix D of the list provides definitions for the EPCRA section 313 (TRI) chemical categories.

Appendix E of the list contains information available on the CERCLA chemical categories from their original statutory and regulatory sources.

This consolidated list does not include all hazardous chemicals subject to the reporting requirements in EPCRA sections 311 and 312, for which Safety Data Sheets (SDS) (formerly known as Material Safety Data Sheets: MSDS) must be developed under the Hazard Communication Standard (29 CFR 1910.1200). These hazardous chemicals are identified by broad criteria, rather than by enumeration. There are over 500,000 products that satisfy the criteria. See 40 CFR Part 370 for more information. The referenced grouping of chemicals is those hazardous chemicals for which the Occupational Safety and Health Administration (OSHA) requires a Safety Data Sheet (SDS) to be maintained.

In order to complete the reporting requirements under Sections 312 and 313, you will need to provide each facility's Standard Industrial Classification (SIC) Code and Dunn and Bradstreet number. These can be obtained from the financial officer of your facility. The SIC Code can also be found on your unemployment compensation insurance documents, searching for it on the Internet or by calling DEO, at (800) 635-7179 (Florida only). If your firm does not have a Dunn and Bradstreet number, you may contact one of the regional offices of Dunn and Bradstreet to have a number assigned. In Florida, the telephone number of the regional office of Dunn and Bradstreet is: **Fort Lauderdale - (954) 472-0732 or (800) 234-3876**

NOTE: Since current rules and regulations regarding additions, deletions and other requirements manifest legislative changes, it is the responsibility of the facility owner or operator to adjust reporting procedures to reflect any changes in the law.

LIST OF ACRONYMS

CAS Number - Chemical Abstract Service Number

CERCLA - Comprehensive Environmental Response, Compensation and Liability Act

CFR - Code of Federal Regulations

DEO - Department of Economic Opportunity

EHS - Extremely Hazardous Substance

EPA - Environmental Protection Agency

EPCRA - Emergency Planning and Community Right-To-Know Act

LEPC - Local Emergency Planning Committee

NFPA - National Fire Protection Association

NAICS – North American Industry Classification SystemNRC - National Response Center

OSHA - Occupational Safety and Health Administration

PBT - Persistent Bioaccumulative Toxic Chemicals

RCRA - Resource Conservation and Recovery Act

RQ - Reportable Quantity

SARA - Superfund Amendments and Reauthorization Act of 1986

SDS - Safety Data Sheet

SERC - State Emergency Response Commission

SIC Code - Standard Industrial Classification Code

SWO - State Watch Office

TPQ - Threshold Planning Quantity

TQ - Threshold Quantity

TRI - Toxic Release Inventory

----------	--	---

SECTION 302 - CHEMICAL NOTIFICATION

Your facility must report under Section 302 if it has present an amount that meets or exceeds the threshold planning quantity (TPQ) of any of the Extremely Hazardous Substances (EHSs). The EHSs can be found in the "Title III List of Lists" in Appendix A. The EHSs are any of the chemicals listed under the column titled "Section 302."

This regulation applies even if the chemical is on site for only a day. There are no exemptions for emergency planning notification.

To determine whether the facility has an EHS that meets or exceeds the TPQ, the owner or operator must determine the **total amount** of that substance present at any one time at the facility, regardless of location, duration, number of containers, or method of storage. The amount of an EHS present in mixtures or solutions in excess of one (1) percent must be included in the determination. If the ingredient is a carcinogen, you must list the chemical if it is present in excess of 0.1 percent regardless whether the ingredient is listed as active or inert.

The TPQ is the amount, in pounds, found under the column titled "Section 302 (EHS) TPQ." To determine the quantity of an EHS or a non-EHS hazardous chemical component present in a mixture, multiply the concentration of the hazardous chemical component (in weight percent) by the weight of the mixture (in pounds).

Example: A facility has 150 pounds of a mixture that contains 50 weight percent of a certain EHS. The quantity of EHS present in the mixture is 75 pounds (150 pounds times 0.5). Compare this to the TPQ of the EHS to determine if you are required to comply with the emergency notification requirements of section 302 of EPCRA.

For an EHS that is a solid in its natural chemical state two TPQs are assigned, 500/10,000. The first TPQ applies only if the solid exists in powdered form and has a particle size of less than 100 microns; or is in solution; or is in molten form; or meets the criteria for a National Fire Protection Association (NFPA) rating of 2, 3, or 4 for reactivity. If the solid does not meet any of these criteria, it is subject to the second TPQ.

For the three forms of solids that are listed in 40 CFR Part 355, use these instructions to determine the quantity of extremely hazardous substance present:

- (a) **Solid in powdered form with a particle size less than 100 microns.** Multiply the weight percent of solid with a particle size less than 100 microns in a particular container by the total weight of solid in the container.

Example: A facility has a 5,000 pound container that contains 25% of a pure EHS solid powder with a particle size less than 100 microns. The quantity of EHS powder is 1,250 pounds which is greater than the TPQ of 500 pounds. The facility must report under section 302 of EPCRA.

- (b) **Solid in solution.** Multiply the weight percent of the non-reactive solid in solution in a particular container by the total weight of solution in that container. Then multiply by 0.2.

(This reduction in quantity must not be used to determine the amount present at one-time at a facility for reporting under CFR 370.10.)

Example: A facility has 20 gallons of a solution of 37% by weight paraquat dichloride on-site. The density of the solution is 9.33 pounds per gallon. Therefore, this solution contains 69 pounds of paraquat dichloride (20 gallons x 9.33lb/gal x 0.37). The facility would multiply 69 pounds by 0.2, which equals 13.8 pounds. This amount is then compared to the TPQ for paraquat dichloride, which is 10 pounds. Because this amount exceeds the 10 pounds TPQ, the facility is required to comply with the emergency notification requirements of section 302 of EPCRA.

- (c) **Solid in molten form.** Multiply the weight of the non-reactive solid in molten form by 0.3. (This reduction in quantity must not be used to determine the amount present at one-time at a facility for reporting under CFR 370.10.)

Example: To determine if the presence of a molten solid EHS triggers an emergency planning notification, the facility owner or operator should therefore multiply the weight in molten form by 0.3 and compare the resulting figure to the lower TPQ for the chemical in question

When there are EHS hazardous chemicals in pure form and mixture, the facility must add together all sources of the EHS and compare this to the TPQ.

Example: A facility has 600 pounds of a non-reactive EHS solid in solution. They also have 400 pounds of the same non-reactive solid EHS in powder form with particle size less than 100 microns. Therefore, the lower TPQ of 500 pounds applies to both forms. The facility would multiply the 600 pounds in solution times 0.2, which equals 120 pounds. Adding 120 pounds to 400 pounds equals 520 pounds, which exceeds the 500 pound TPQ. Therefore, the facility would be required to report under section 302 of EPCRA.

The reducing factors of 0.2 for molten solids and 0.3 for solids in solution are not to be used for the 12 solid reactive chemicals that are noted by footnote “a” in Appendix A and B in 40 CFR part 355. Those reactive solids and their reportable quantity and threshold planning quantity are presented in the following table:

REACTIVE SOLIDS	RQ	TPQ
Aluminum Phosphide	100	500
Lithium Hydride	100	100
Methyl Isophiocyanate	500	500
Methyl Phosphonic Dichloride	100	100
Phosphorus	1	100
Phosphorus Pentachloride	500	500
Potassium Cyanide	10	100
Potassium Silver Cyanide	1	500
Sodium Azide (Na(N ₃))	1000	500
Sodium Cyanide (Na(CN))	10	100
Sulfur Trioxide	100	100
Zinc Phosphide	100	500

These chemicals can also be found in the “List of Lists”

The list of EHSs may be revised by the Environmental Protection Agency (EPA). It is the facility's responsibility to be aware of the changes made to the list and make any necessary notifications. A facility has sixty days to make a notification after acquiring an EHS that meets or exceeds the TPQ. A separate notification must be made for each facility. This is a one-time notification.

Fees are assessed on facilities subject to Section 302. Those fees are detailed in the Summary of Fees on page 23.

SECTION 303 - FACILITY REPRESENTATIVE DESIGNATION

Any facility subject to Section 302 must send the SERC and LEPC the name and telephone number of a contact person (facility representative) at the facility. The name of the facility representative must be kept current. The purpose for reporting under Section 302 is to alert the LEPC to which facilities have EHSs and, therefore, must be included in emergency response plans. The role of the facility representative is to provide the LEPC with the necessary data to develop emergency response plans.

REPORTING PROCEDURES FOR SECTIONS 302 AND 303

To report under Sections 302 and 303, use your company letterhead or use the form entitled, A Section 302/303 Form. If you use your letterhead, the contents of the notification must include:

- 1) name of business;
- 2) business address or mailing address;
- 3) physical address of the facility, if different from the mailing address; and
- 4) name and telephone number of a facility representative.

This notification must be sent to:

- 1) the SERC; and
- 2) the appropriate LEPC.

The map which shows the boundaries of the LEPCs and their addresses can be found on page 6.

The SERC's address:

State Emergency Response Commission
2555 Shumard Oak Boulevard
Tallahassee, Florida 32399-2100

NOTE: A change in the identity of the owner/operator of a facility where a change in the federal employer identification number (FEIN) has been made requires a new notification and filing fee. If the change is in name only then no notification or fee is required.

EPA's current rules implementing Sections 302 and 303 are in 40 CFR Parts 300 and 355.

STATEMENT OF DETERMINATION

A Statement of Determination Form is provided to be used for indicating reporting status relative to Sections 302 and 303, as well as Sections 311, 312 and 313. This form may be used for either negative or positive declarations specific to sections of the law and reporting year.

SECTION 304 - EMERGENCY RELEASE NOTIFICATION

Section 304 requires certain releases of chemicals to be reported by the facility owner or operator. There are two types of chemicals that require reporting under this section:

- 1) Extremely Hazardous Substances (EHSs); and
- 2) Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) hazardous substances.

Both the EHSs and the CERCLA hazardous substances are found in the "Title III Consolidated List of Chemicals."

If an amount equal to, or greater than, the reportable quantity (RQ) is released or spilled from a fixed facility, notification must be made immediately (within 15 minutes) to the SERC and LEPC by calling the Florida State Watch Office (SWO) at **(850) 413-9911** or **(800) 320-0519** (this telephone is answered 24 hours a day and is an EMERGENCY number only). An RQ is the amount which requires notification if released into the environment (air, water or land). In addition, CERCLA spills must also be reported to the National Response Center at **(800) 424-8802**. In the event that the incident is transportation related, Section 304 requirements can be met by calling 911 or, in the absence of a 911 system, contacting the local telephone operator.

This emergency notification must include:

- 1) the chemical name;
- 2) an indication of whether the substance is an EHS;
- 3) an estimate of the quantity released into the environment;
- 4) the time and duration of the release;
- 5) the medium into which the release occurred;
- 6) any known or anticipated acute or chronic health risks associated with the emergency and, where appropriate, advice regarding medical attention necessary for exposed individuals;
- 7) proper precautions, such as evacuation; and
- 8) the name and telephone number of a contact person.

EHS/CERCLA releases of greater than or equal to the RQ that occur under normal operations and are stable in quantity and rate are to be reported under "Continuous Release" reporting guidelines only if the release does not qualify as a "Federally Permitted Release."

The Section 304 Reporting Form was developed by the SERC to familiarize a facility with the information that will be needed when reporting a release over the telephone. Use of the form is not

mandatory, and the form should not be mailed in. It is recommended that the form be reviewed and then filed for use if a release occurs.

As soon as practicable (within seven days) after a release which requires notification, the owner or operator of the facility must provide one or more written follow-up emergency notice(s). The Section 304 Reporting Form must not be used for the written follow-up notice. The written follow-up emergency notice(s) must include:

- 1) information setting forth and updating the information required for the initial emergency notification;
- 2) actions taken to respond to and contain the release;
- 3) any known or anticipated acute or chronic health risks associated with the release; and
- 4) advice regarding medical attention necessary for exposed individuals.

This follow-up notice must be sent to:

- 1) the SERC; and
- 2) the LEPC Emergency Coordinator.

The map which shows the boundaries of the LEPCs and their addresses are located on page 6.

The SERC's address:

State Emergency Response Commission
2555 Shumard Oak Boulevard
Tallahassee, Florida 32399-2100
Fax: (850) 488-1739

EXEMPTION: Section 304 does not apply to any release of an EHS which results in exposure to persons solely within the site on which the facility is located. However, caution dictates that notification be made anyway, unless you are certain that the release will not result in exposure to persons outside the site.

NOTE: Releases of CERCLA hazardous substances are also subject to the release reporting requirements over their respective RQs of CERCLA Section 103 (40 CFR, Part 302).

EPA regulations implementing Section 304 are set out in 40 CFR Part 355.

SECTION 311 - SDS/CHEMICAL LIST SUBMITTAL

The chemicals covered under Section 311 are:

- 1) any of the EHSs that meet or exceed the TPQ, or 500 pounds, at any one time, whichever is less; and
- 2) any of the **hazardous chemicals** that meet or exceed 10,000 pounds at any one time for which OSHA requires an SDS to be maintained.

The list of EHSs is found in the "Consolidated List of Chemicals."

There are over 500,000 chemicals and mixtures for which OSHA requires an SDS to be maintained. There is no list of OSHA regulated chemicals. Refer to the OSHA Hazard Communication Standard, 29 CFR 1910.1200, to determine which chemicals OSHA defines as hazardous.

The SERC encourages facilities to submit a list of the covered chemicals in lieu of the SDSs (SDSs); however, the list must be grouped by the following five EPA physical and health hazard categories.

- 1) fire hazard;
- 2) sudden release of pressure hazard;
- 3) reactive hazard;
- 4) immediate (acute) health hazard; and
- 5) delayed (chronic) health hazard.

These five categories are not mutually exclusive; a chemical can fall under more than one category. The form "Section 311 Reporting Form" can be used when submitting a list.

See the "Hazard Category Comparison for Reporting Under Sections 311 and 312" for assistance in converting the information on the SDS into the five EPA physical and health hazard categories.

The SDSs, or list, must be submitted to:

- 1) The SERC;
- 2) the appropriate LEPC; and
- 3) the local fire department.

The map which shows the boundaries of the LEPCs and contact information is located on page 6.

The SERC's address:

State Emergency Response Commission
2555 Shumard Oak Boulevard
Tallahassee, Florida 32399-2100

This is a one-time reporting requirement; however, within 90 days of discovering significant new information on a chemical, or upon acquiring a new chemical that is covered, a facility must submit an SDS or a list of those chemicals. A facility must submit a revised list, or an addition to the list, if the new information about that chemical changes the hazard category under which it falls, or if the facility acquires a new substance that meets or exceeds the threshold that was not included on the initial list. EPA may lower the threshold of 10,000 pounds for hazardous chemicals. If this happens, information will have to be submitted on the chemicals at or above the new threshold.

The Hazard Communication Standard, revised in 2012, requires that the chemical manufacturer, distributor, or importer provide SDS's for each hazardous chemical to downstream users to communicate information on these hazards. MSDS's were to be replaced with SDS's by June 2015.

To obtain an SDS, contact the supplier of your chemicals. A sample letter requesting an SDS can be found below.

EPA's rules regarding Section 311 are in 40 CFR Part 370.

NOTE: There are exemptions for reporting under Sections 311 and 312. Refer to "Sections 311 and 312 Exemptions from Reporting" to determine if any of your chemicals are exempt from reporting under Sections 311 and 312 or if your facility is affected by the recent reporting changes under those sections of EPCRA.

Government bodies and private industries must submit an SDS, or a list of the chemicals, for certain chemicals present at each facility.

SAMPLE SDS REQUEST LETTER

XYZ Chemical Corporation
Post Office Box 999
Anytown, Florida 12345

(Supplier Address)

Dear Supplier:

In connection with our purchase of your product, we require a Safety Data Sheet (SDS), formerly referred to as Material Safety Data Sheet (MSDS), for that product which meets the standards prescribed by the Occupational Safety and Health Administration in that agency's Hazard Communication Standard.

We at XYZ Chemical take pride in our efforts with respect to the health and safety of our employees and with regard to appropriate disposal of materials and environmental protection. Your cooperation in promptly supplying us with the most recent SDS for the product(s) we are purchasing with the Purchase Order would be most appreciated.

If an SDS is not required on this product, please indicate below and return a copy of this correspondence.

SDS is not required on product(s) requested:

Signature/Date

Please send the SDS and/or this letter to:

SDS Coordinator (name)
XYZ Chemical Corporation
Post Office Box 999
Anytown, Florida 12345

Very truly yours,

(NAME)

The easy E-Plan online reporting system allows you to create a report that can be submitted to the state to meet the SERC and LEPC requirement for filing Tier II Reports. However, the facility must inquire with the applicable fire service having jurisdiction as to whether a copy is needed. This system is for Tier II filing organizations to file their Tier II report to the State each year.

SECTION 312 - CHEMICAL INVENTORY

The facilities and chemicals covered by Section 312 are the same as in Section 311. Refer to this section for this information.

Facility chemical inventory is an **annual** reporting requirement due every March 1. Facilities report hazardous chemicals inventories on site at any one time during the previous calendar year. The State of Florida Division of Emergency Management now utilizes E-Plan on-line filing of Tier II reports (<https://erplan.net/eplan/home.htm>). The decision to switch from the FloridaHMIS.org

online system to the E-Plan online system was reached after consulting with the LEPC partners, first responders and private industry representatives. The E-Plan online system accepts electronic submissions from EPA's Tier II Submit and Tier II Manager.

Although voluntary, use of the on-line system is strongly recommended. The SERC requires that all facilities subject to Section 312 reporting that choose not to use the on-line submission process may either submit a hard copy using the EPA Tier II submit program or appropriate state approved forms. A new version of Tier II Submit is created around November of each year. This form contains information on the quantities and locations of chemicals. For information on filing Tier II reports electronically, contact the SERC at (800) 635-7179 (Florida only) or (850) 413-9970. If the facility is filing electronically (E-Plan or EPA Tier II Submit) then notification to the SERC and LEPC has been satisfied. However, the facility must inquire with the applicable fire service having jurisdiction as to whether a copy is needed. If a facility is filing a paper/hard copy of the Tier II then the form must be sent to:

- 1) the SERC (automatic notification if filed electronically);
- 2) the appropriate LEPC (automatic notification if filed electronically); and
- 3) the local fire department.

A map of the Statewide LEPC district boundaries and contact information is provided on page 6.

The SERC's mailing address:

State Emergency Response Commission
2555 Shumard Oak Boulevard
Tallahassee, Florida 32399-2100

The location of a specific chemical can be withheld from disclosure to the public. If you elect to do this, enter the word "Confidential" in the storage location section of the Tier II Form. On a separate Tier II Confidential Location Information Sheet, enter the name and Chemical Abstract Service (CAS) number, and the appropriate location and storage information for each chemical for which you

are keeping the location confidential. Attach the Tier II Confidential Location Information Sheet to the Tier II Form and mail to the SERC and your local fire department. Send only the Tier Two II to your LEPC. **Fees are assessed on facilities subject to Section 312. See below for an explanation of fees.**

EPA's rules regarding Section 312 are in 40 CFR Part 370.

NOTE: There are exemptions for reporting under Sections 311 and 312. Refer to "Section 311 and 312 Exemptions from Reporting" to determine if any of your chemicals are exempt from reporting under Sections 311 and 312 or if your facility is affected by the recent reporting changes under those sections of EPCRA.

HAZARD CATEGORY COMPARISON

For Reporting Under Sections 311 and 312

<u>EPA's Hazard Categories</u>	<u>OSHA's Hazard Categories</u>
Fire Hazard	Flammable Combustible Liquid Pyrophoric Oxidizer
Sudden Release of Pressure	Explosive Compressed Gas
Reactive	Unstable Reactive Organic Peroxide Water Reactive
Immediate (Acute) Health Hazard	Highly Toxic Toxic Irritant Sensitizer Corrosive Other hazardous chemicals with an adverse effect on a target organ that generally occurs rapidly as a result of short term exposure and with a short duration.
Delayed (Chronic) Health Hazard	Carcinogens Other hazardous chemicals with an adverse effect on a target organ that generally occurs as a result of long term exposure and with a long duration.

Blood Toxin, Eye Hazard, Kidney Toxin (Nephrotoxin), Liver Toxin (Hepatotoxin), Lung Toxin, Nervous System Toxin (Neurotoxin), Reproductive Toxin, and Skin Hazard may be classified as either Immediate or Delayed Health Hazards depending on how quickly the target organ is affected.

SECTION 311 AND 312 EXEMPTIONS FROM REPORTING

OSHA regulations [29 CFR Section 1910.1200(b)] currently provide the following exemptions:

- 1) Any hazardous waste as such term is defined by the Solid Waste Disposal Act, as amended (42 U.S.C. 6901 et seq.), when subject to regulations issued under that Act;
- 2) Tobacco or tobacco products;
- 3) Wood or wood products;
- 4) "Articles" - defined under Section 1910.1200(b) as a manufactured item:
 - a) which is formed to a specific shape or design during manufacture;
 - b) which has end use functions(s) dependent in whole or in part upon the shape or design during end use;
 - c) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use.
- 5) Food, drugs, cosmetics, or alcoholic beverages in a retail establishment which are packaged for sale to consumers;
- 6) Food, drugs, or cosmetics intended for personal consumption by employees while in the work place;
- 7) Any consumer product or hazardous substance, as those terms are defined in the Consumer Product Safety Act (15 U.S.C. 1251 et seq.) respectively, where the employer can demonstrate it is used in the work place in the same manner as normal consumer use, and which use results in a duration and frequency of exposure which is not greater than exposures experienced by consumers;
- 8) Any drug, as that term is defined in the Federal Food, Drug and Cosmetic Act (21 U.S.C. 301 et seq.), when it is in solid, final form for direct administration to the patient (i.e., tablets or pills).

In addition, Section 311(e) of EPCRA excludes the following substances:

- 9) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration;
- 10) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use;
- 11) Any substance to the extent it is used for personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public;
- 12) Any substance to the extent it is used in a research laboratory, a hospital or other medical facility under the direct supervision of a technically qualified individual;
- 13) Any substance to the extent it is used in routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

REPORTING CHANGES FOR RETAIL PETROLEUM FACILITIES

Amendments to Sections 311 and 312 reporting requirements as they apply to qualified retail petroleum facilities was passed by final rule on February 11, 1999 [**Federal Register: February 11, 1999 (Volume 64, Number 28, Pages 7031-7047)**]:

Reportable: In most cases, fuels must be considered under EPCRA 311 and 312, and must be reported if the maximum inventory during the reporting year exceeds the EPCRA reporting threshold of 10,000 pounds. (i.e. Any retail gas station that has at least 10,000 pounds (roughly 1,500 gallons) of gasoline or diesel fuel stored in tanks that are not entirely underground must report the total gasoline or diesel fuel at the facility, including any that is stored entirely underground.) The facility must report by March 1st of each year to the Florida Division of Emergency Management, Local Emergency Planning Committee and the local fire department for reportable chemical inventories for the previous calendar year.

Exemptions: There are some limited exceptions for fuel storage. However, these apply only to retail establishments and only to storage in underground storage tanks (USTs). For such facilities, the condition exemption applies only to two fuel types.

- For gasoline (all grades combined) at a retail gas station, the threshold level is 75,000 gallons, if the tank(s) was stored entirely underground and was in compliance at all times during the preceding calendar year with all applicable Underground Storage Tank (UST) requirements at 40 CFR part 280 or requirements of the State UST program approved by the Agency under 40 CFR part 281.
- For diesel fuel (all grades combined) at a retail gas station, the threshold level is 100,000 gallons, if the tank(s) was stored entirely underground and the tank(s) was in compliance at all times during the preceding calendar year with all applicable UST requirements at 40 CFR part 280 or requirements of the State UST program approved by the Agency under 40 CFR part 281.

A facility is not in compliance with the UST requirements (and therefore not eligible for the higher EPCRA thresholds) when it first fails to meet the UST requirements. For example, if an owner or operator of a retail gas station has a tank system that was not in compliance with UST requirements that went into effect in December of 1998 (see 40 CFR 280.21(a) and 281.31), that owner or operator can not apply the higher thresholds.

Similarly, any retail gas station that has at least 75,000 gallons of gasoline or 100,000 gallons of diesel fuel stored entirely underground must report on the total gasoline or diesel fuel at the facility, including any that is not stored entirely underground. In other words, whether the facility triggers the threshold for underground storage or for aboveground storage, they report on the total gasoline or diesel fuel at the facility.

Convenience stores and truck stops that sell gasoline or diesel fuel to the public also meet the definition of retail gas stations. Beginning with the 1998 reporting year, owners/operators of facilities whose gasoline and diesel/fuel inventories do not exceed the new reporting thresholds and who meet the above referenced criteria are no longer required to submit Material Safety Data Sheets

or Safety Data Sheets/chemical lists or file Tier II inventory reports for these substances. For additional information on these requirements, please refer to the above referenced Federal Register citation.

SECTION 313 - TOXIC CHEMICAL RELEASE FORMS

The Emergency Planning and Community Right-to-Know Act originally required TRI reporting using four-digit Standard Industrial Classification (SIC) codes. However, the Office of Management and Budget replaced the SIC code system with the NAICS code system developed by the U.S. Census Bureau, and TRI adopted this system in 2006 (71 FR 32464). NAICS codes are updated every five years, and TRI facilities currently use OMB-revised 2012 six-digit NAICS codes on their TRI reporting forms.

Is My Facility's 2012 six-digit NAICS Code a TRI-Covered Industry? – <https://222.epa.gov/toxics-release-inventory-tri-progam/my-facilitys-six-digit-naics-code-tri-covered-industry>

In order to be covered under Section 313, a facility must have ten or more full-time employees and must manufacture, process, or otherwise use a listed **toxic chemical** that meets or exceeds specified threshold quantities, which are cumulative for the calendar year.

Federal facilities, per Executive Order 12856 issued in 1993, are also required to comply with Section 313 if they manufacture, process or otherwise use a listed toxic chemical that meets or exceeds specified threshold quantities, which are cumulative for the calendar year. The requirement for federal facilities to report under Section 313 went into effect beginning with the 1994 reporting year.

Florida TRI Facilities in 2013

The Toxic Chemicals and the chemical categories regulated under Section 313 are marked with an "X" or A313" in the column titled "313" in the "Consolidated List of Chemicals".

A Toxic Chemical Release Form, Form R or Form A, must be filled out for each toxic chemical above the threshold amount. The form reflects releases during the preceding calendar year and is due **annually** on **July 1**. Beginning in 1995, facilities that release less than 500 pounds of a listed toxic chemical and that also do not use, produce or manufacture in excess of one million pounds of that substance over the annual reporting period have the option of submitting an abbreviated Certification Form (Form A) in lieu of the more detailed Form R. All reports must be submitted to the SERC and EPA at the addresses below:

State Emergency Response Commission
2555 Shumard Oak Boulevard
Tallahassee, Florida 32399-2149

U.S. Environmental Protection Agency
EPCRA Reporting Center
Post Office Box 3348
Merrifield, Virginia 22116-3348
ATTN: Toxic Chemical Release Inventory

To obtain reporting forms and instructions, contact the EPA Hotline at (800) 424-9346.

You may also obtain forms, reporting requirements, guidance documents and information on training by accessing the EPA Web Site at the following address: <http://www.epa.gov/tri/>

Copies of technical guidance documents for certain specific industrial situations are available from the SERC.

Thresholds: If you manufacture, import, or process any of the listed toxic chemicals, the threshold amount is:

- 1) **75,000** pounds during calendar year 1987;
- 2) **50,000** pounds during calendar year 1988; and
- 3) **25,000** pounds during calendar year 1989 and subsequent years.

Thresholds are different for certain PBT chemicals, see EPA's "PBT Final Rule Summary".

If you use any listed chemical in any other way (without incorporating it into any product or producing it at the facility), the threshold amount is **10,000** pounds in calendar year 1987 and subsequent years.

EPA's rules regarding Section 313 are contained in 40 CFR Part 372.

Fees are assessed on facilities (except federal facilities) subject to Section 313. See below for an explanation of fees.

On October 29, 1999, the U. S. Environmental Protection Agency issued a final ruling (64 FR 58666) that establishes much lower reporting thresholds for certain persistent bioaccumulative toxic (PBT) chemicals. The PBT chemicals and reporting thresholds are shown on EPA's "PBT Final Rule Summary". This rule went into effect starting with the 2000 reporting year.

On June 26, 2000, the U. S. Environmental Protection Agency issued a final ruling (65 FR 39552) that deleted phosphoric acid (CAS #7664-38-2) from the list of chemicals subjected to reporting requirements under Section 313 of EPCRA. This rule relieves facilities of their obligation to report releases for phosphoric acid during the 1999 reporting year, and for future years.

The U. S. Environmental Protection Agency issued a final ruling lowering the reporting thresholds for lead and lead compounds on February 16, 2001 with the first reports at the lower thresholds reported in July 2002. The new reporting threshold was established as low as 100 pounds.

FEES FOR EPCRA

The Florida Hazardous Materials Emergency Response and Community Right-to-Know Act of 1988, Chapter 252, Part II, Florida Statutes, provides a funding mechanism to support emergency planning efforts and the extensive community right-to-know requirements. The following summary outlines the four fees:

1) One-time filing fee - Pursuant to Section 252.85(2), Florida Statutes, any "public or private" facility subject to Section 302 shall pay a one-time filing fee of \$50 per facility (the form, entitled Section 302 - Emergency Planning Notification, can be used when submitting the filing fee). The one-time filing fee shall not be required for any agricultural facilities with a Standard Industrial Classification code of 01, 02, or 07 subject to the emergency notification requirement solely because of the presence of EPCRA listed substances in temporary or portable storage units located at the facility for less than 48 consecutive hours. **NOTE:** Any change in the identity of the owner/operator requires a new Section 302 notification and filing fee.

2) Annual registration fee - Pursuant to Section 252.85(1), Florida Statutes, any "private" facility subject to either **Section 302 or 312** must pay an annual registration fee due every March 1 (**governmental bodies are exempt from the annual registration fee**). This fee is based on the number of employees that an employer has in the State of Florida. Annual registration fees are calculated in one of three ways:

A) Facilities regulated under Chapter 368 (gas transmission and distribution facilities), Chapter 527 (sale of liquefied petroleum gas), or Section 376.303 (aboveground and underground storage tanks), Florida Statutes, which do not have present extremely hazardous substances equal to or in excess of threshold planning quantities will pay \$2.50 per employee (minimum \$25, maximum \$500). The number of employees is based on the total number of each full-time and part-time employee reported to the Department of Labor and Employment Security (DLES) for unemployment compensation tax purposes for the last month of the calendar year.

NOTE: Owners/operators of retail petroleum facilities (i.e., gas stations, convenience stores, truck stops) that store gasoline and diesel fuel entirely underground in tanks that hold less than 75,000 gallons of gasoline or 100,000 gallons of diesel fuel and are in compliance with Underground Storage Tank requirements and do not have any other EPCRA covered substances in threshold amounts on site are not required to file under Sections 311/312 or pay annual registration fees. For additional information on the reporting changes for retail petroleum facilities, refer to the following citation: [Federal Register: February 11, 1999 (Volume 64, Number 28, Pages 7031-7047)].

B) "Agricultural facilities" which have hazardous materials present which qualify for the routine agricultural use exemption under EPCRA, Section 311(e), will pay \$10 per employee (minimum \$25, maximum \$1,000). The number of employees is based on the total number of each full-time and part-time **non-seasonal** employees reported to DLES for unemployment compensation tax purposes, the total number of which shall not be less than the number for the month reflecting the lowest number of employees for the calendar year.

C) All other facilities will pay \$10 per employee (minimum \$25, maximum \$2,000). The number of employees is based on each full-time and each part-time employee employed within the State by the owner or operator of a facility as reported to DLES for unemployment compensation tax purposes for the last month of the calendar year.

3) Toxic Chemical Release Inventory (TRI) reporting fee - An owner or operator of a facility with a Standard Industrial Classification Code between 20 and 39 that is required to submit a United States Environmental Protection Agency TRI report to the Commission under Section 313 of EPCRA, shall be required to pay an annual reporting fee of \$150 per TRI Form R report for those Section 313 listed EPCRA substances in effect on January 1, 1997, (the TRI reporting fee form can be used when submitting the fee, due on July 1 of each year). A \$75 fee per chemical is required to be submitted with the Certification Form A report.

4) Late fees - Pursuant to Section 252.85 (3)(a)(b), Florida Statutes, late fees will be assessed for failure to file a report that substantially complies with the requirements of EPCRA, or for failure to pay any fee. A written notification will be sent to the facility that explains which report or fee has not been submitted. The first late notification assesses a fee of up to \$2,000, and the second notification assesses a maximum fee of \$4,000.

Checks for fee payments must be made out to Florida Division of Emergency Management and mailed to:

State Emergency Response Commission
2555 Shumard Oak Boulevard
Tallahassee, Florida 32399-2100

Summary of Fees

<u>SECTION</u>	<u>FEE AMOUNT</u>	<u>DUE DATE</u>
302	\$50 PER FACILITY (public and private)	ONE-TIME FILING
302 (agricultural facilities subject to the "routine agricultural use" exemption)	\$10 PER EMPLOYEE \$25 MINIMUM \$1,000 MAXIMUM	MARCH 1 EACH YEAR
302 OR 312 (private only)	\$10 PER EMPLOYEE \$25 MINIMUM \$2,000 MAXIMUM	MARCH 1 EACH YEAR
312 (certain regulated industries covered by Chapters 368, 527, or s. 376.303, F.S.)	\$2.50 PER EMPLOYEE \$25 MINIMUM \$500 MAXIMUM Companies are eligible for the reduced fee only if they do not have present EHSs that meet or exceed the TPQ.	MARCH 1 EACH YEAR
313	\$150 PER FORM R REPORT \$75 PER CHEMICAL LISTED ON FORM A REPORT	JULY 1 EACH YEAR

*The one-time filing fee shall not be required for any agricultural facilities with a Standard Industrial Classification code of 01, 02, or 07 subject to Section 302 or Section 312 solely because of the presence of EPCRA listed substances in temporary or portable storage units located at the facility for less than 48 consecutive hours.

Who must pay the annual registration fee? Every March 1, any private facility subject during the previous calendar year to either Section 302 or Section 312 of Title III of the Superfund Amendments and Reauthorization Act of 1986, EPCRA, must pay the annual registration fee.

Who is subject to Section 302? The owner or operator of any facility that has present at any one time an amount that meets or exceeds the TPQ of any of the EHSs.

Must a facility have EHSs present for a specified period of time before Section 302 reporting requirements are triggered? No, if EHSs are present in amounts equal to or in excess of established TPQs, the facility must comply with Section 302 regardless of the amount of time those substances were present in those amounts.

Who is subject to Section 312? The owner or operator of any facility that has either of the following:

- 1) any of the EHSs that meet or exceed the TPQ, or 500 pounds, whichever is less; or
- 2) any of the hazardous chemicals that meet or exceed 10,000 pounds for which OSHA requires an SDS to be maintained.

How do I determine the amount of the fee? The fee is based on the number of employees employed within the state by the facility owner or operator during the preceding year. The amount of the registration fee is either \$2.50 or \$10 per employee, with a minimum amount of \$25, and a maximum amount of \$2,000 per year.

What types of facilities qualify for reduced fees? Any facility owner or operator regulated under Chapters 368 (gas transmission and distribution facilities) or 527 (liquefied petroleum gas), or Section 376.303 (aboveground and underground storage tanks), Florida Statutes, which **does not** have present an EHS that meets or exceeds the TPQ pays an annual registration fee of \$2.50 per employee, with a minimum of \$25, and a maximum of \$500 per year.

NOTE: The owner or operator pays only one registration fee per year regardless of the number of facilities that are subject. The fee is based on the total number of employees that the owner or operator has employed in the state.

When do I pay the annual registration fees? The annual registration fees are due by March 1 of each year. The filing fee is a one-time fee due within 60 days of the time a facility becomes subject to Section 302.

NOTE: Any change in the identity of the owner/operator of a Section 302 facility requires a new Section 302 notification and filing fee.

What is the definition of an employee? Employee means any employee who is eligible for coverage by Unemployment Compensation Insurance under the laws of the State of Florida as of December of the preceding year.

How do I determine the number of employees? Use the number of employees statewide that you register with the Department of Labor and Employment Security, Division of Unemployment Compensation (UC), on your quarterly unemployment compensation tax and wage report for the quarter that includes December of the preceding year. You can find the number of employees on LES FORM UCT-6W (Rev. 7/86) or LES FORM UCS-1 (10/83).

NOTE: Agricultural facilities which have chemicals which qualify for exemptions under Section 311(e) of EPCRA should determine number of employees based on non-seasonal employees (see above for fees and for a list of exemptions).

What are the penalties for not complying in a timely manner? Late fees are assessed for failure to pay the fee or submit a report due in a timely manner. Late fees can be assessed in amounts of up to twice the amount of the annual registration or filing fee required for timely submission, up to \$4,000 per late submission.

How do I submit the annual registration fee? You must submit the annual registration fee along with your Tier II Forms to the SERC. Reminder: you must also submit a copy of your Tier II Form to the appropriate LEPC and local fire department.

How do I make out my check? Checks must be made out to the Florida Division of Emergency Management.

Where do I send my check? Checks must be mailed to the State Emergency Response Commission, 2555 Shumard Oak Boulevard, Tallahassee, Florida 32399-2100.

Are there any exemptions to the annual registration fee? Governmental bodies are exempt from paying the annual registration fee.

Is there a fee for Section 313 Form R Reports? Yes, a fee of \$150 is assessed for each chemical reported on a Toxic Chemical Release Inventory Report, due July 1 of each year.

Under Section 313, is there a fee for the Certification Form (Form A)? Yes, a \$75 fee applies for each chemical reported on the Certification Form (Form A).

What are the statutory authorities for the fees? Section 252.85(1)(2), Florida Statutes. For definitions and late fees, see Section 252.85(3)(a), (b), Florida Statutes, and Rule 9G-14, Florida Administrative Code.

Whom do I call if I have additional questions? The Compliance Planning Section at (800) 635-7179 or (850) 413-9970 (between 8:00 a.m. and 5:00 p.m., Monday through Friday) is available to respond to questions. They also have available, at no charge, reporting forms, chemical lists, "How-To-Comply" manuals, and other information about EPCRA, the state law, and the administrative rule. This information may also be obtained from the State Emergency Response Commission's Web Site.

General Provisions

The general provisions of EPCRA address trade secret protection, provision of information to health professionals, public availability of information, enforcement, citizen suits, and the exemption for transportation.

SECTION 322 - TRADE SECRETS

Specific chemical identity of a trade secret chemical can be withheld from an **SDS, Emergency Inventory Reporting Form**, or Toxic Chemical Release Form. Applications for trade secret protection are made to EPA. There are penalties for frivolous claims for trade secret protection. The withholder must show each of the following:

- 1) the information has not been disclosed to any other person other than a member of the LEPC, a government official, an employee of such person, or someone bound by a confidentiality agreement, that measures have been taken to protect the confidentiality, and that the withholder intends to continue to take such measures;
- 2) the information is not required to be disclosed to the public under any other federal or state law;
- 3) the information is likely to cause substantial harm to the competitive position of the person; and
- 4) the chemical identity is not readily discoverable through reverse engineering.

SECTION 323 - INFORMATION FOR HEALTH PROFESSIONALS

This section requires disclosure of information including trade secret chemical identity information to health professionals, doctors, and nurses, in certain specified situations.

SECTION 324 - PUBLIC AVAILABILITY OF INFORMATION

Each emergency response plan, SDS, SDS list, Chemical Inventory Form (Tier II), Toxic Chemical Release Form, and follow-up emergency notice shall be made available to the general public upon request.

NOTE: There is a copying charge of 15 cents per page for up to 25 pages and one dollar per page for over 25 pages of copy requested. You may schedule an appointment to view our files by calling (800) 635-7179 or (850) 413-9970 between 8:00 a.m. and 5:00 p.m., Monday through Friday.

SECTION 325 - FEDERAL ENFORCEMENT PENALTIES

Section 325 provides for administrative, civil and criminal penalties for violations under the following sections:

<u>Requirement</u>	<u>Section</u>	<u>Administrative</u>	<u>Civil</u>	<u>Criminal</u>
Emergency Planning Notification	302		\$27,500	
Facility Representative	303		\$ 27,500	
Emergency Release Notification	304	\$27,500 or \$82,500	\$27,500 or \$82,500	\$27,500/2Y or \$55,000/5Y
SDS Submission	311	\$11,000	\$11,000	
Chemical Inventory	312	\$27,500	\$27,500	
Toxic Release Inventory	313	\$27,500	\$27,500	
Trade Secret Claim	322	\$27,500	\$27,500	

Section 252.86, Florida Statutes, provides for civil and criminal penalties for the provision of false information. Furthermore, any provision of Section 325 or 326 of EPCRA which creates a federal cause of action, other than an administrative proceeding, provides a corresponding cause of action under the state law, with jurisdiction in the circuit courts. Sections 252.86(3)(a) and (b) provide for the assessment of late fees for failure to submit a report that substantially complies with the requirements of EPCRA or Section 252.87, Florida Statutes, by the specified date or for failure to pay any fee required under Section 252.85, Florida Statutes.

SECTION 326 - CIVIL ACTIONS

This section authorizes citizen suits, and civil suits by state or local governments, against owners or operators of a facility, for failure to comply with specific provisions of the Act. It also authorizes citizen suits against the EPA Administrator and state officials for failure to comply with the obligations imposed on them by the Act.

SECTION 327 - EXEMPTION FOR TRANSPORTATION

The transportation exemption applies to substances being transported, not to particular facilities. Substances present at a terminal which are being transported, or stored while waiting for transport, are exempt from reporting requirements. The exemption does not apply to the emergency reporting of chemical release requirements of Section 304.

ATTACHMENT A - CONSOLIDATED LIST OF LISTS

U. S. Environmental Protection Agency Title III List of Lists

NOTE: As previously mentioned, this is **NOT** an all-inclusive list of hazardous materials as there is no such list. This list only covers those substances subject to the following:

Section 302 (Extremely Hazardous Substances)

Section 304 (Emergency Release Notification)

Section 313 (Toxic Release Inventory)

Resource Conservation and Recovery Act (RCRA)

Comprehensive Environmental Response, Compensation and Liability Act (CERCLA)

Clean Air Act – Section 112(r)

THIS PAGE INTENTIONALLY LEFT BLANK

	Page
Introduction	i
List of Lists – Consolidated List of Chemicals (by CAS #) Subject to the Emergency Planning and Community Right-to-Know Act (EPCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and Section 112(r) of the Clean Air Act	1
Appendix A: Alphabetical Listing of Consolidated List	A-1
Appendix B: Radionuclides Listed Under CERCLA	B-1
Appendix C: RCRA Waste Streams and Unlisted Hazardous Wastes	C-1
Appendix D: EPCRA Section 313, Toxic Release Inventory (TRI) Chemical Categories	D-1
Appendix E: CERCLA Hazardous Substances- Chemical Categories.....	E-1

LIST OF LISTS

Consolidated List of Chemicals Subject to the Emergency Planning and Community Right-to-Know Act (EPCRA), Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and Section 112(r) of the Clean Air Act

This consolidated chemical list includes chemicals subject to reporting requirements under the Emergency Planning and Community Right-to-Know Act (EPCRA), also known as Title III of the Superfund Amendments and Reauthorization Act of 1986 (SARA), the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and section 112(r) of the Clean Air Act (CAA). This consolidated list does not include all hazardous chemicals subject to the reporting requirements in EPCRA sections 311 and 312, for which SDS's must be developed under the Hazard Communication Standard (29 CFR 1910.1200). These hazardous chemicals are identified by broad criteria, rather than by enumeration. There are over 500,000 products that satisfy the criteria. See 40 CFR Part 370 for more information.

This consolidated list has been prepared to help firms handling chemicals determine whether they need to submit reports under sections 302 and 313 of EPCRA and determine if releases of chemicals are reportable under section 102 and 103 of CERCLA and section 304 of EPCRA. It will also help firms determine whether they will be subject to accident prevention regulations under CAA section 112(r). Separate lists are also provided of Resource Conservation and Recovery Act (RCRA) waste streams and unlisted hazardous wastes, of radionuclides reportable under CERCLA and of definitions or explanation of chemical categories listed under EPCRA section 313 and CERCLA. These lists should be used as a reference tool, not as a definitive source of compliance information. Compliance information for EPCRA is published in the Code of Federal Regulations (CFR), 40 CFR parts 355, 370, and 372. Compliance information for CERCLA is published in 40 CFR part 302 and for CAA section 112(r) is published in 40 CFR part 68.

The chemicals on the consolidated list are ordered both by the Chemical Abstracts Service (CAS) registry number and alphabetically. Categories of chemicals which generally do not have CAS registry numbers, but which are cited under CERCLA, have N.A. listed in place of the CAS number. If the category of chemical is an EPCRA section 313, then the section 313 category code is also included in the CAS number column.

The lists include chemicals referenced under five federal statutory provisions, discussed below. More than one chemical name may be listed for one CAS number because the same chemical may appear on different lists under different names. For example, for CAS number 8001-35-2, the names toxaphene (from the section 313 list), camphechlor (from the section 302 list), and camphene, octachloro- (from the CERCLA list) all appear on this consolidated list. The chemical names on the consolidated lists generally are those names used in the regulatory programs developed under EPCRA, CERCLA, and CAA section 112(r), but each chemical may have other synonyms that do not appear on these lists.

(1) EPCRA Section 302 Extremely Hazardous Substances (EHSs)

The presence of EHSs in quantities at or above the Threshold Planning Quantity (TPQ) requires certain emergency planning activities to be conducted. The extremely hazardous substances and their TPQs are listed in 40 CFR part 355, Appendices A and B. For section 302 EHSs, Local Emergency Planning Committees (LEPCs) must develop emergency response plans and facility owner or operator must notify the State Emergency Response Commission (SERC) or Tribal Emergency Response Commission and their LEPC if a chemical is present at the facility or above the EHS's TPQ. Additionally if the TPQ is equaled or exceeded, facilities with a listed EHS are subject to the reporting requirements of EPCRA section 311 (provide material safety data sheet or a list of covered chemicals to the SERC or TERC, LEPC, and local fire department) and section 312 (submit inventory form -Tier I or Tier II). The minimum threshold for section 311-312 reporting for EHS substances is 500 pounds or the TPQ, whichever is less.

TPQ. The consolidated list presents the TPQ (in pounds) for section 302 chemicals in the column following the CAS number. For chemicals that are solids, there are two TPQs given (e.g., 500/10,000). In these cases, the lower quantity applies for solids in powder form with particle size less than 100 microns, or if the substance is in solution or in molten form. Otherwise, the 10,000 pound TPQ applies. If a solid EHS is in molten form, the facility must multiply the amount of EHS on-site by 0.3 before comparing to the lower listed TPQ. If a solid EHS is in solution form, the facility must multiply amount EHS on-site by 0.2 before comparing to the lower listed TPQ. The reducing factors of 0.3 for molten solids and 0.2 for solids in solution are not to be used for the 12 solid reactive chemicals that are noted by footnote "a" in Appendix A and B in 40 CFR part 355. These twelve chemicals are not listed with two TPQs and higher threshold quantity of 10,000 pounds; they only have one TPQ.

EHS RQ. Releases of reportable quantities (RQ) of EHSs are subject to state and local reporting under section 304 of EPCRA. EPA has adjusted RQs for EHSs without CERCLA RQs to levels equal to their TPQs. The EHS RQ column lists these adjusted RQs for EHSs not listed under CERCLA and the CERCLA RQs for those EHSs that are CERCLA hazardous substances (see the next section for a discussion of CERCLA RQs).

Note that ammonium hydroxide is not covered under section 302; the EHS RQ is based on anhydrous ammonia. Ammonium hydroxide (which is also known as aqueous ammonia) is subject to CERCLA, with its own RQ.

(2) CERCLA Hazardous Substances

Releases of CERCLA hazardous substances, in quantities equal to or greater than their reportable quantity (RQ), are subject to reporting to the National Response Center under CERCLA. Notification requirements for these releases are found in 40 CFR 302. Such releases are also subject to state and local reporting under section 304 of EPCRA. CERCLA hazardous substances, and their reportable quantities, are listed in 40 CFR part 302, Table 302.4. Radionuclides listed under CERCLA are provided in a separate list in Appendix B of this document, with RQs in Curies. Chemical categories under CERCLA (including metal

compound categories), which have N.A. listed for the CAS Number in the consolidated table, are also listed in Appendix E of this document with further explanation of each chemical category, where information was available.

RQ. The CERCLA RQ column in the consolidated list shows the RQs (in pounds) for chemicals that are CERCLA hazardous substances.

Metals. For metals listed under CERCLA (antimony, arsenic, beryllium, cadmium, chromium, copper, lead, nickel, selenium, silver, thallium, and zinc), no reporting of releases of the solid form is required if the mean diameter of the pieces of the solid metal released is greater than 100 micrometers (0.004 inches) (Ref: Footnote after Table 302.4 in 40 CFR 302.4). The RQs shown on the consolidated list apply to smaller particles.

Note that the consolidated list does not include all CERCLA regulatory synonyms. See 40 CFR part 302, Table 302.4 for a complete list.

Sulfur monochloride. (formula S_2Cl_2) is listed with an incorrect CAS number of 12771-08-3, which is found on the CERCLA Hazardous Substances list. The correct CAS number should be 10025-67-9, however, the List of Lists will still include the CAS number of 12771-08-3 because it has not been changed on the CERCLA list. According to the Chemical Abstract Services which assigns CAS numbers, the correct CAS number for sulfur monochloride is 10025-67-9, which is now included on the List of Lists with an explanatory footnote.

CAS number 12771-08-3 is assigned to the substance sulfur chloride (formula SCl) which was listed as a synonym for sulfur monochloride when EPA finalized the Clean Water Act Designation of Hazardous Substances rule (43 FR 10474, March 13, 1978). The CAS number 10025-67-9 is used for sulfur monochloride on EPA's TSCA Inventory and EPA's Substance Registry Services lists.

(3) CAA Section 112(r) List of Substances for Accidental Release Prevention

Under the accident prevention provisions of section 112(r) of the CAA, EPA developed a list of 77 toxic substances and 63 flammable substances. Threshold quantities (TQs) were established for these substances. The list and TQs identify processes subject to accident prevention regulations. The list of substances and TQs and the requirements for risk management programs for accidental release prevention are found in 40 CFR part 68. This consolidated list includes both the common name for each listed chemical under section 112(r) and the chemical name, if different from the common name, as separate listings.

The CAA section 112(r) list includes several substances in solution that are covered only in concentrations above a specified level. These substances include ammonia (concentration 20% or greater) (CAS number 7664-41-7); hydrochloric acid (37% or greater) (7647-01-0); hydrogen fluoride/hydrofluoric acid (50% or greater) (7664-39-3); and nitric acid (80% or greater) (7697-37-2). Hydrogen chloride (anhydrous) and ammonia (anhydrous) are listed, in addition to the solutions of these substances, with different TQs. Only the anhydrous form of sulfur dioxide (7446-09-5) is covered. These substances are presented on the consolidated list with the concentration limit or specified form (e.g., anhydrous), as they are listed under CAA section

112(r). Flammable fuels used as a fuel or held for sale as a fuel at a retail facility are not subject to the rule.

TQ. The CAA section 112(r) TQ column in the consolidated list shows the TQs (in pounds) for chemicals listed for accidental release prevention. The TQ applies to the quantity of substance in a process, not at the facility as a whole.

(4) EPCRA Section 313 Toxic Chemicals (a.k.a Toxics Release Inventory (TRI) Chemicals)

Emissions, transfers, and waste management data for chemicals listed under section 313 must be reported annually as part of the community right-to-know provisions of EPCRA (40 CFR part 372). These reports are also known as Toxics Release Inventory (TRI) reports.

Section 313. The notation “313” in the column for section 313 indicates that the chemical is subject to reporting under section 313 and section 6607 of the Pollution Prevention Act under the name listed. In cases where a chemical is listed under section 313 with a second name in parentheses or brackets, the second name is included on this consolidated list with an “X” in the section 313 column. An “X” in this column also may indicate that the same chemical with the same CAS number appears on another list with a different chemical name. The “X” listed with the chemical name “Ammonia (anhydrous)” and “Ammonia (concentration of 20% or greater)” does not mean that the section 313 reporting for these substances are limited to those forms, but it does not include them.

Diisocyanates, Dioxins and Dioxin-like Compounds, and PACs. In the November 30, 1994, expansion of the section 313 list, 20 specific chemicals were added as members of the diisocyanate category, and 19 specific chemicals were added as members of the polycyclic aromatic compounds (PAC) category. The PAC category was expanded to 25 total chemicals by additions made in October 1999 and November 2010. In October 1999, EPA added a category of dioxin and dioxin-like compounds that includes 17 specific chemicals. These chemicals are included in the CAS order listing on this consolidated list, although chemicals belonging to these categories are reportable under section 313 by category, rather than by individual chemical name. The symbol “#” following the “313” notation in the section 313 column identifies diisocyanates, the symbol “!” identifies the dioxin and dioxin-like compounds, and the symbol “+” identifies PACs, as noted in the Summary of Codes.

Ammonium Salts. The EPCRA section listing for ammonia includes the following qualifier “includes anhydrous ammonia and aqueous ammonia from water dissociable ammonium salts and other sources; 10 percent of total aqueous ammonia is reportable under this listing.” The qualifier for ammonia means that anhydrous forms of ammonia are 100% reportable and aqueous forms are limited to 10% of total aqueous ammonia. Therefore, when determining threshold and releases and other waste management quantities all anhydrous ammonia is included but only 10% of total aqueous ammonia is included. Any evaporation of ammonia from aqueous ammonia solutions is considered anhydrous ammonia and should be included in threshold determinations and release and other waste management calculations.

In this document ammonium salts are not specifically identified as being reportable EPCRA section 313 chemicals. However, water dissociable ammonia salts, such as ammonium chloride, are reportable if they are placed in water. When ammonium salts are placed in water, reportable aqueous ammonia is manufactured. As indicated in the ammonia qualifier, all aqueous ammonia solutions from water dissociable ammonium salts are covered by the ammonia listing. For example, ammonium chloride is a water-dissociable ammonium salt and reportable aqueous ammonia will be manufactured when it is placed in water.

Unlike other ammonium salts, ammonium hydroxide is specifically identified as being a reportable EPCRA section 313 chemical. This is because the chemical ammonium hydroxide (NH₄OH) is a misnomer. It is a common name used to describe a solution of ammonia in water (i.e., aqueous ammonia), typically a concentrated solution of 28 to 30 percent ammonia. EPA has consistently responded to questions regarding the reportability of these purported ammonium hydroxide solutions under the EPCRA section 313 ammonia listing by stating that these are 28 to 30 percent solutions of ammonia in water and that the solutions are reportable under the EPCRA section 313 ammonia listing. For a more detailed discussion, see page 34175 of the Federal Register final rule of June 30, 1995 (60 FR 34172). (See also EPA's EPCRA section 313, *Guidance for Reporting Aqueous Ammonia*, EPA 745-R00-005, <http://www2.epa.gov/toxics-release-inventory-tri-program/guidance-aqueous-ammonia>)

Stayed TRI Chemicals. There are two EPCRA section 313 chemicals that are listed in the CFR but for which the Agency has issued an administrative stay that excludes them from reporting until the stays are lifted. These chemicals, identified by "313s" in the Sec. 313 table column, are methyl mercaptan (CAS number 74-93-1), and 2,2-dibromo-3-nitropropionamide (CAS number 10222-01-2). Check the TRI Web site <http://www2.epa.gov/toxics-release-inventory-tri-program/tri-listed-chemicals> for updated regulatory information. On October 11, 2011, EPA reinstated the TRI reporting requirements for hydrogen sulfide. This action will be effective for the 2012 TRI reporting year, with the first 2012 TRI reports due from facilities by July 1, 2013. For more information, see <http://www2.epa.gov/toxics-release-inventory-tri-program/hydrogen-sulfide-lifting-administrative-stay>

New TRI Chemical, o-Nitrotoluene. On November 7, 2013, the chemical o-nitrotoluene (CAS number 88-72-2) to the TRI list (78 FR 66848). The action is effective for the 2014 TRI reporting year with the first reports due from facilities by July 1, 2015. For more information, see <http://www2.epa.gov/toxics-release-inventory-tri-program/addition-ortho-nitrotoluene-final-rule>

New TRI Category, Nonylphenols. On September 20, 2014, the category of nonylphenol (Category code N530) was added to the TRI chemicals list (79 FR 58686). The action is effective for the 2015 TRI reporting year with the first reports due from facilities by July 1, 2016. For more information, see <http://www2.epa.gov/toxics-release-inventory-tri-program/addition-nonylphenol-category-final-rule>. The nonylphenol category covers six specific chemicals identified by chemical name and CAS number. These chemicals are included in the CAS order listing on this consolidated list, although chemicals belonging to these categories are reportable under section 313 by category, rather than by individual chemical name. The symbol "\$" following the "313" notation in the section 313 column identifies nonylphenols, as noted in the Summary of Codes.

TRI Reporting Thresholds. Reporting under EPCRA section 313 is triggered by the quantity of a chemical that is manufactured, processed, or otherwise used during the calendar year. For most TRI chemicals, the thresholds are 25,000 pounds manufactured or processed or 10,000 pound otherwise used. Sixteen TRI chemicals and four TRI chemical categories that meet the criteria for persistence and bioaccumulation have lower thresholds, such as 10 or 100 pounds and 0.1 grams. These 20 chemical listings and their reporting thresholds can be found at <http://www2.epa.gov/toxics-release-inventory-tri-program/persistent-bioaccumulative-toxic-pbt-chemicals-covered-tri>

(5) Chemical Categories

The CERCLA and EPCRA section 313 lists include a number of chemical categories as well as specific chemicals. Categories appear on this consolidated list at the beginning of the CAS number order listing. The specific chemicals or substances that are included in the CERCLA category Radionuclides can be found in Appendix B. Appendix D contains explanations and definitions for the EPCRA section 313 (TRI) chemical categories. For the CERCLA listed categories reported with CAS number of N.A., Appendix E contains information available on the CERCLA chemical categories from their original statutory and regulatory sources.

Specific chemicals listed as members of the diisocyanates, dioxin and dioxin-like compounds, nonylphenol, and PAC categories under EPCRA section 313 are included in the list of specific chemicals by CAS number, not in the category listing.

EPA has attempted to identify those chemicals on the consolidated list that are clearly reportable under one or more of the EPCRA section 313 (TRI) chemical categories. For example, mercuric acetate (CAS number 1600-27-7), listed under section 302, is not specifically listed under section 313, but is reportable under the section 313 “Mercury Compounds” category (no CAS number). Listed chemicals that have been identified as being reportable under one or more EPCRA section 313 categories are identified by “313c” in the Sec. 313 table column.

The chemicals on the consolidated list have not been systematically evaluated to determine whether they fall into any of the CERCLA listed categories. Some chemicals not specifically listed under CERCLA may be subject to CERCLA reporting as part of a category. For example, strychnine sulfate (CAS number 60-41-3), listed under EPCRA section 302, is not individually listed on the CERCLA list, but is subject to CERCLA reporting under the listing for strychnine and salts (CAS number 57-24-9), with an RQ of 10 pounds. Similarly, nicotine sulfate (CAS number 65-30-5) is subject to CERCLA reporting under the listing for nicotine and salts (CAS number 54-11-5, RQ 100 pounds), and warfarin sodium (CAS number 129-06-6) is subject to CERCLA reporting under the listing for warfarin and salts, concentration >0.3% (CAS number 81-81-2, RQ 100 pounds).

Note that some CERCLA listings, although they include CAS numbers, are for general categories and are not restricted to the specific CAS number (e.g., warfarin and salts). The CERCLA list also includes a number of generic categories that have not been assigned RQs; chemicals falling into these categories are considered CERCLA hazardous substances, but they are not required to be reported under CERCLA unless otherwise listed under CERCLA with an RQ.

(6) RCRA Hazardous Wastes

The consolidated list includes specific chemicals from the RCRA P and U lists only (40 CFR 261.33). This listing is provided as an indicator that companies may already have data on a specific chemical that may be useful for EPCRA reporting. It is not intended to be a comprehensive list of RCRA P and U chemicals. RCRA hazardous wastes consisting of waste streams on the F and K lists, and wastes exhibiting the characteristics of ignitability, corrosivity, reactivity, and toxicity, are provided in Appendix C in this document. This list also includes K181 hazardous waste with a statutory one-pound RQ (indicated by an asterisk “*” following the RQ.” The descriptions of the F and K waste streams have been abbreviated; see 40 CFR part 302, Table 302.4, or 40 CFR part 261 for complete descriptions.

RCRA Code. The letter-and-digit code in the RCRA Code column is the chemical's RCRA hazardous waste code.

Summary of Codes

Codes in Section 313 column

+	Member of EPCRA Section 313 PAC category.
#	Member of EPCRA Section 313 diisocyanate category.
c	Although not listed by name and CAS number, this chemical is reportable under one or more of the EPCRA section 313 chemical categories.
s	Indicates that this chemical is currently under an administrative stay of the EPCRA section 313 reporting requirements, therefore, no Toxics Release Inventory reports are required until the stay is removed.
!	Member of the EPCRA section 313 dioxin and dioxin-like compounds category.
X	Indicates that this is a second name for an EPCRA section 313 chemical already included on this consolidated list. May also indicate that the same chemical with the same CAS number appears on another list with a different chemical name.
\$	Member of the EPCRA section 313 nonylphenol category.

Codes in CERCLA RQ column

*	The Agency may adjust the statutory RQ for this RCRA hazardous substance (K181 waste) in a future rulemaking; until then the statutory one-pound RQ applies.
PMN	This EHS chemical was identified from a Premanufacture Review Notice (PMN) submitted to EPA. The submitter has claimed certain information on the submission to be confidential, including specific chemical identity.
&	Indicates that no RQ is assigned to this generic or broad class, although the class is a CERCLA hazardous substance. See 50 Federal Register 13456 (April 4, 1985).
@	Releases in amounts less than 1,000 pounds per 24 hours of nitrogen oxide or nitrogen dioxide to the air that are the result of combustion and combustion related activities are exempt from the notification requirements of EPCRA section 304 and CERCLA.

Zirconium-86	40	100 (3.7E 12)
Zirconium-88	40	10 (3.7E 11)
Zirconium-89	40	100 (3.7E 12)
Zirconium-93	40	1 (3.7E 10)
Zirconium-95	40	10 (3.7E 11)
Zirconium-97	40	10 (3.7E 11)
NOTES:		
Ci—Curie. The curie represents a rate of radioactive decay. One curie is the quantity of any radioactive nuclide which undergoes 3.7E 10 disintegrations per second.		
Bq—Becquerel. The becquerel represents a rate of radioactive decay. One becquerel is the quantity of any radioactive nuclide which undergoes one disintegration per second. One curie is equal to 3.7E 10 becquerel.		

Radionuclide Name	Atomic Number	Final RQ Curies (Bq)
Ytterbium-162	70	1000 (3.7E 13)
Ytterbium-166	70	10 (3.7E 11)
Ytterbium-167	70	1000 (3.7E 13)
Ytterbium-169	70	10 (3.7E 11)
Ytterbium-175	70	100 (3.7E 12)
Ytterbium-177	70	1000 (3.7E 13)
@—Final RQs for all radionuclides apply to chemical compounds containing the radionuclides and elemental forms regardless of the diameter of pieces of solid material.		
&—The adjusted RQ of one curie applies to all radionuclides not otherwise listed. Whenever the RQs in the Consolidated List of Chemicals subject to EPCRA, CERCLA and Section 112(r) of CAA and this Appendix B are in conflict, the lowest RQ shall apply. For example, uranyl acetate and uranyl nitrate have adjusted RQs shown in the CAS number ordered chemical list and the alphabetical chemical list (Appendix A) of 100 pounds, equivalent to about one-tenth the RQ level for uranium-238 listed in this appendix.		
E—Exponent to the base 10. For example, 1.3E 2 is equal to 130 while 1.3E 3 is equal to 1300.		
m—Signifies a nuclear isomer which is a radionuclide in a higher energy metastable state relative to the parent isotope.		
φ—Notification requirements for releases of mixtures or solutions of radionuclides can be found in 40 CFR §302.6(b)(2). Final RQs for the following four common radionuclide mixtures are provided: radium-226 in secular equilibrium with its daughters (0.053 curie); natural uranium (0.1 curie); natural uranium in secular equilibrium with its daughters (0.052 curie); and natural thorium in secular equilibrium with its daughters (0.011 curie).		

APPENDIX C - RCRA WASTE STREAMS AND UNLISTED HAZARDOUS WASTES

**THE LIST BELOW CONTAINS RCRA WASTE STREAMS AND UNLISTED HAZARDOUS WASTES.
THE DESCRIPTIONS OF THE WASTE STREAMS HAVE BEEN TRUNCATED.**

**THE LIST SHOULD BE USED FOR REFERENCE ONLY.
COMPLIANCE INFORMATION CAN BE FOUND IN 40 CFR PART 302 AND TABLE 302.4**

RCRA CODE	CERCLA RQ	NAME
F001	10	The following spent halogenated solvents used in degreasing:
	100	(a) Tetrachloroethylene (CAS No. 127-18-4, RCRA Waste No. U210)
	100	(b) Trichloroethylene (CAS No. 79-01-6, RCRA Waste No. U228)
	1,000	(c) Methylene chloride (CAS No. 75-09-2, RCRA Waste No. U080)
	1,000	(d) 1,1,1-Trichloroethane (CAS No. 71-55-6, RCRA Waste No. U226)
	10	(e) Carbon tetrachloride (CAS No. 56-23-5, RCRA Waste No. U211)
	5,000	(f) Chlorinated fluorocarbons
F002	10	The following spent halogenated solvents:
	100	(a) Tetrachloroethylene (CAS No. 127-18-4, RCRA Waste No. U210)
	1,000	(b) Methylene chloride (CAS No. 75-09-2, RCRA Waste No. U080)
	100	(c) Trichloroethylene (CAS No. 79-01-6, RCRA Waste No. U228)
	1,000	(d) 1,1,1-Trichloroethane (CAS No. 71-55-6, RCRA Waste No. U226)
	100	(e) Chlorobenzene (CAS No. 108-90-7, RCRA Waste No. U037)
	5,000	(f) 1,1,2-Trichloro-1,2,2-trifluoroethane (CAS No. 76-13-1)
	100	(g) o-Dichlorobenzene (CAS No. 95-50-1, RCRA Waste No. U070)
	5,000	(h) Trichlorofluoromethane (CAS No. 75-69-4, RCRA Waste No. U121)
	100	(i) 1,1,2-Trichloroethane (CAS No. 79-00-5, RCRA Waste No. U227)
F003	100	The following spent non-halogenated solvents and still bottoms from recovery:
	1,000	(a) Xylene (CAS No. 1330-20-7, RCRA Waste No. U239)
	5,000	(b) Acetone (CAS No. 67-64-1, RCRA Waste No. U002)
	5,000	(c) Ethyl acetate (CAS No. 141-78-6, RCRA Waste No. U112)
	1,000	(d) Ethylbenzene (CAS No. 100-41-4)
	100	(e) Ethyl ether (CAS No. 60-29-7, RCRA Waste No. U117)
	5,000	(f) Methyl isobutyl ketone (CAS No. 108-10-1, RCRA Waste No. U161)
	5,000	(g) n-Butyl alcohol (CAS No. 71-36-3, RCRA Waste No. U031)
	5,000	(h) Cyclohexanone (CAS No. 108-94-1, RCRA Waste No. U057)
	5,000	(i) Methanol (CAS No. 67-56-1, RCRA Waste No. U154)
F004	100	The following spent non-halogenated solvents and still bottoms from recovery:
	100	(a) Cresols/cresylic acid (CAS No. 1319-77-3, RCRA Waste No. U052)
	1,000	(b) Nitrobenzene (CAS No. 98-95-3, RCRA Waste No. U169)
F005	100	The following spent non-halogenated solvents and still bottoms from recovery:
	1,000	(a) Toluene (CAS No. 108-88-3, RCRA Waste No. U220)
	5,000	(b) Methyl ethyl ketone (CAS No. 78-93-3, RCRA Waste No. U159)
	100	(c) Carbon disulfide (CAS No. 75-15-0, RCRA Waste No. P022)
	5,000	(d) Isobutanol (CAS No. 78-83-1, RCRA Waste No. U140)
	1,000	(e) Pyridine (CAS No. 110-86-1, RCRA Waste No. U196)
F006	10	Wastewater treatment sludges from electroplating operations (w/some exceptions)
F007	10	Spent cyanide plating bath solns. from electroplating

RCRA CODE	CERCLA RQ	NAME
F008	10	Plating bath residues from electroplating where cyanides are used
F009	10	Spent stripping/cleaning bath solns. from electroplating where cyanides are used
F010	10	Quenching bath residues from metal heat treating where cyanides are used
F011	10	Spent cyanide soln. from salt bath pot cleaning from metal heat treating
F012	10	Quenching wastewater sludges from metal heat treating where cyanides are used
F019	10	Wastewater treatment sludges from chemical conversion aluminum coating
F020	1	Wastes from production or use of tri/tetrachlorophenol or derivative intermediates
F021	1	Wastes from production or use of pentachlorophenol or intermediates for derivatives
F022	1	Wastes from use of tetra/penta/hexachlorobenzenes under alkaline conditions
F023	1	Wastes from mat. production on equipment previously used for tri/tetrachlorophenol
F024	1	Wastes from production of chlorinated aliphatic hydrocarbons (C1-C5)
F025	1	Lights ends, filters from production of chlorinated aliphatic hydrocarbons (C1-C5)
F026	1	Waste from equipment previously used to production tetra/penta/hexachlorobenzenes
F027	1	Discarded formulations containing tri/tetra/pentachlorophenols or derivatives
F028	1	Residues from incineration of soil contaminated w/ F020,F021,F022,F023,F026,F027
F032	1	Wastewaters, process residuals from wood preserving using chlorophenolic solns.
F034	1	Wastewaters, process residuals from wood preserving using creosote formulations
F035	1	Wastewaters, process residuals from wood preserving using arsenic or chromium
F037	1	Petroleum refinery primary oil/water/solids separation sludge
F038	1	Petroleum refinery secondary (emulsified) oil/water/solids separation sludge
F039	1	Multisource leachate
K001	1	Wastewater treatment sludge from creosote/pentachlorophenol wood preserving
K002	10	Wastewater treatment sludge from production of chrome yellow and orange pigments
K003	10	Wastewater treatment sludge from production of molybdate orange pigments
K004	10	Wastewater treatment sludge from production of zinc yellow pigments
K005	10	Wastewater treatment sludge from production of chrome green pigments
K006	10	Wastewater treatment sludge from production of chrome oxide green pigments
K007	10	Wastewater treatment sludge from production of iron blue pigments
K008	10	Oven residue from production of chrome oxide green pigments
K009	10	Dist. bottoms from production of acetaldehyde from ethylene
K010	10	Dist. side cuts from production of acetaldehyde from ethylene
K011	10	Bottom stream from wastewater stripper in acrylonitrile production
K013	10	Bottom stream from acetonitrile column in acrylonitrile production
K014	5,000	Bottoms from acetonitrile purification column in acrylonitrile production
K015	10	Still bottoms from the dist. of benzyl chloride
K016	1	Heavy ends or dist. residues from production of carbon tetrachloride
K017	10	Heavy ends from the purification column in epichlorohydrin production
K018	1	Heavy ends from the fractionation column in ethyl chloride production
K019	1	Heavy ends from the dist. of ethylene dichloride during its production
K020	1	Heavy ends from the dist. of vinyl chloride during production of the monomer
K021	10	Aqueous spent antimony catalyst waste from fluoromethanes production
K022	1	Dist. bottom tars from production of phenol/acetone from cumene
K023	5,000	Dist. light ends from production of phthalic anhydride from naphthalene
K024	5,000	Dist. bottoms from production of phthalic anhydride from naphthalene
K025	10	Dist. bottoms from production of nitrobenzene by nitration of benzene
K026	1,000	Stripping still tails from the production of methyl ethyl pyridines
K027	10	Centrifuge/dist. residues from toluene diisocyanate production
K028	1	Spent catalyst from hydrochlorinator reactor in production of 1,1,1-trichloroethane

RCRA CODE	CERCLA RQ	NAME
K029	1	Waste from product steam stripper in production of 1,1,1-trichloroethane
K030	1	Column bottoms/heavy ends from production of trichloroethylene and perchloroethylene
K031	1	By-product salts generated in the production of MSMA and cacodylic acid
K032	10	Wastewater treatment sludge from the production of chlordane
K033	10	Wastewater/scrubwater from chlorination of cyclopentadiene in chlordane production
K034	10	Filter solids from filtration of hexachlorocyclopentadiene in chlordane production
K035	1	Wastewater treatment sludges from the production of creosote
K036	1	Still bottoms from toluene reclamation distillation in disulfoton production
K037	1	Wastewater treatment sludges from the production of disulfoton
K038	10	Wastewater from the washing and stripping of phorate production
K039	10	Filter cake from filtration of diethylphosphorodithioic acid in phorate production
K040	10	Wastewater treatment sludge from the production of phorate
K041	1	Wastewater treatment sludge from the production of toxaphene
K042	10	Heavy ends/residues from dist. of tetrachlorobenzene in 2,4,5-T production
K043	10	2,6-Dichlorophenol waste from the production of 2,4-D
K044	10	Wastewater treatment sludge from manuf. and processing of explosives
K045	10	Spent carbon from treatment of wastewater containing explosives
K046	10	Wastewater sludge from manuf.,formulating,loading of lead-based initiating compd
K047	10	Pink/red water from TNT operations
K048	10	Dissolved air flotation (DAF) float from the petroleum refining industry
K049	10	Slop oil emulsion solids from the petroleum refining industry
K050	10	Heat exchanger bundle cleaning sludge from petroleum refining industry
K051	10	API separator sludge from the petroleum refining industry
K052	10	Tank bottoms (leaded) from the petroleum refining industry
K060	1	Ammonia still lime sludge from coking operations
K061	10	Emission control dust/sludge from primary production of steel in electric furnaces
K062	10	Spent pickle liquor generated by steel finishing (SIC codes 331 and 332)
K064	10	Acid plant blowdown slurry/sludge from blowdown slurry from primary copper production
K065	10	Surface impoundment solids at primary lead smelting facilities
K066	10	Sludge from treatment of wastewater/acid plant blowdown from primary zinc production
K069	10	Emission control dust/sludge from secondary lead smelting
K071	1	Brine purification muds from mercury cell process in chlorine production
K073	10	Chlorinated hydrocarbon waste from diaphragm cell process in chlorine production
K083	100	Distillation bottoms from aniline extraction
K084	1	Wastewater sludges from production of veterinary pharm. from arsenic compds.
K085	10	Distillation or fractionation column bottoms in production of chlorobenzenes
K086	10	Wastes/sludges from production of inks from chromium and lead-containing substances
K087	100	Decanter tank tar sludge from coking operations
K088	10	Spent potliners from primary aluminum reduction
K090	10	Emission control dust/sludge from ferrochromiumsilicon production
K091	10	Emission control dust/sludge from ferrochromium production
K093	5,000	Dist. light ends from production of phthalic anhydride by ortho-xylene
K094	5,000	Dist. bottoms in production of phthalic anhydride by ortho-xylene
K095	100	Distillation bottoms in production of 1,1,1-trichloroethane
K096	100	Heavy ends from dist. column in production of 1,1,1-trichloroethane
K097	1	Vacuum stripper discharge from the chlordane chlorinator in production of chlordane
K098	1	Untreated process wastewater from the production of toxaphene
K099	10	Untreated wastewater from the production of 2,4-D

RCRA CODE	CERCLA RQ	NAME
K100	10	Waste leaching soln from emission control dust/sludge in secondary lead smelting
K101	1	Dist. tar residue from aniline in production of veterinary pharm. from arsenic compd.
K102	1	Residue from activated carbon in production of veterinary pharm. from arsenic compds.
K103	100	Process residues from aniline extraction from the production of aniline
K104	10	Combined wastewater streams generated from production of nitrobenzene/aniline
K105	10	Aqueous stream from washing in production of chlorobenzenes
K106	1	Wastewater treatment sludge from mercury cell process in chlorine production
K107	10	Column bottoms from separation in production of UDMH from carboxylic acid hydrazides
K108	10	Condensed column overheads and vent gas from production of UDMH from -COOH hydrazides
K109	10	Spent filter cartridges from purif. of UDMH production from carboxylic acid hydrazides
K110	10	Condensed column overheads from separation in UDMH production from -COOH hydrazides
K111	10	Product washwaters from production of dinitrotoluene via nitration of toluene
K112	10	Reaction by-product water from drying in toluenediamine prod from dinitrotoluene
K113	10	Condensed liquid light ends from purification of toluenediamine during its production
K114	10	Vicinals from purification of toluenediamine during its production from dinitrotoluene
K115	10	Heavy ends from toluenediamine purification during production from dinitrotoluene
K116	10	Organic condensate from solvent recovery system in production of toluene diisocyanate
K117	1	Wastewater from vent gas scrubber in ethylene bromide prod by ethene bromination
K118	1	Spent absorbent solids in purification of ethylene dibromide in its production
K123	10	Process wastewater from the production of ethylenebisdithiocarbamic acid and salts
K124	10	Reactor vent scrubber water from prod of ethylenebisdithiocarbamic acid and salts
K125	10	Filtration/other solids from production of ethylenebisdithiocarbamic acid and salts
K126	10	Dust/sweepings from the production of ethylenebisdithiocarbamic acid and salts
K131	100	Wastewater and spent sulfuric acid from the production of methyl bromide
K132	1,000	Spent absorbent and wastewater solids from the production of methyl bromide
K136	1	Still bottoms from ethylene dibromide purif. in production by ethene bromination
K141	1	Process residues from coal tar recovery in coking
K142	1	Tar storage tank residues from coke production from coal or recovery of coke by-prods
K143	1	Process residues from recovery of light oil in coking
K144	1	Wastewater residues from light oil refining in coking
K145	1	Residues from naphthalene collection and recovery from coke by-products
K147	1	Tar storage tank residues from coal tar refining in coking
K148	1	Residues from coal tar distillation, including still bottoms, in coking
K149	10	Distillation bottoms from the production of chlorinated toluenes/benzoyl chlorides
K150	10	Organic residuals from Cl gas and HCl recovery from chlorinated toluene production
K151	10	Wastewater treatment sludge from production of chlorotoluenes/benzoyl chlorides
K156	10	Organic waste from production of carbamates and carbamoyl oximes
K157	10	Wastewaters from production of carbamates and carbamoyl oximes (not sludges)
K158	10	Bag house dusts & filter/separation solids from prod of carbamates, carb oximes
K159	10	Organics from treatment of thiocarbamate waste
K161	1	Purif. solids/bag house dust/sweepings from prod of dithiocarbamate acids/salts
K169	10	Crude oil storage tank sediment from refining operations
K170	1	Clarified slurry oil tank sediment of in-line filter/separation solids
K171	1	Spent hydrotreating catalyst
K172	1	Spent hydrotreating catalyst
K174	1	Wastewater treatment sludges from the production of ethylene dichloride or vinyl chloride monomer, (including sludges that result from commingled EDC or VCM wastewater and other wastewater), unless the sludges meet certain disposal conditions. (See 40 CFR 261.32)

RCRA CODE	CERCLA RQ	NAME
K175	1	Wastewater treatment sludges from the production vinyl chloride monomer using mercuric chloride catalyst in an acetylene-based process (See 40 CFR 261.32)
K176	1	Baghouse filters from the production of antimony oxide, including filters from the production of intermediates (e.g., antimony metal or crude antimony oxide)
K177	5000	Slag from the production of antimony oxide that is speculatively accumulated or disposed, including slag from the production of intermediates (e.g., antimony metal or crude antimony oxide)
K178		Residues from manufacturing and manufacturing-site storage of ferric chloride from acids formed during the production of titanium dioxide using the chloride-ilmenite process
K181	1*	Non-wastewaters generated from the production of certain dyes, pigments, and FD&C colorants, exceeding constituent mass loading levels, subject to disposal exceptions in 40 CFR 261.32
D001	100	Unlisted hazardous wastes characteristic of ignitability
D002	100	Unlisted hazardous wastes characteristic of corrosivity
D003	100	Unlisted hazardous wastes characteristic of reactivity
		Unlisted hazardous wastes characteristic of toxicity:
D004	1	Arsenic
D005	1,000	Barium
D006	10	Cadmium
D007	10	Chromium
D008	10	Lead
D009	1	Mercury
D010	10	Selenium
D011	1	Silver
D012	1	Endrin
D013	1	Lindane
D014	1	Methoxychlor
D015	1	Toxaphene
D016	100	2,4-D
D017	100	2,4,5-TP
D018	10	Benzene
D019	10	Carbon tetrachloride
D020	1	Chlordane
D021	100	Chlorobenzene
D022	10	Chloroform
D023	100	o-Cresol
D024	100	m-Cresol
D025	100	p-Cresol
D026	100	Cresol
D027	100	1,4-Dichlorobenzene
D028	100	1,2-Dichloroethane
D029	100	1,1-Dichloroethylene
D030	10	2,4-Dinitrotoluene
D031	1	Heptachlor (and epoxide)
D032	10	Hexachlorobenzene
D033	1	Hexachlorobutadiene
D034	100	Hexachloroethane
D035	5,000	Methyl ethyl ketone
D036	1,000	Nitrobenzene
D037	10	Pentachlorophenol

RCRA CODE	CERCLA RQ	NAME
D038	1,000	Pyridine
D039	100	Tetrachloroethylene
D040	100	Trichloroethylene
D041	10	2,4,5-Trichlorophenol
D042	10	2,4,6-Trichlorophenol
D043	1	Vinyl chloride

APPENDIX D - SECTION 313, TOXIC RELEASE INVENTORY

(TRI) CHEMICAL CATEGORIES

The EPCRA Section 313, Toxic Release Inventory (TRI) has 31 chemical categories (including four categories containing 68 specifically-listed chemicals). Each chemical category is listed below with its category code and category name.

Source: <http://www2.epa.gov/toxics-release-inventory-tri-program/tri-listed-chemicals>

Also see 40 CFR 372.65.

N010 Antimony Compounds *Includes any unique chemical substance that contains antimony as part of that chemical's infrastructure.*

N020 Arsenic Compounds *Includes any unique chemical substance that contains arsenic as part of that chemical's infrastructure.*

N040 Barium Compounds *Includes any unique chemical substance that contains barium as part of that chemical's infrastructure. This category does not include: Barium sulfate CAS Number 7727-43-7*

N050 Beryllium Compounds *Includes any unique chemical substance that contains beryllium as part of that chemical's infrastructure.*

N078 Cadmium Compounds *Includes any unique chemical substance that contains cadmium as part of that chemical's infrastructure.*

N084 Chlorophenols *Includes any chemical substance with the following chemical formula:*

N090 Chromium Compounds *Includes any unique chemical substance that contains chromium as part of that chemical's infrastructure (except for chromite ore mined in the Transvaal Region of South Africa and the unreacted ore component of the chromite ore processing residue (COPR). COPR is the solid waste remaining after aqueous extraction of oxidized chromite ore that has been combined with soda ash and kiln roasted at approximately 2,000 deg.F.)*

APPENDIX D - EPCRA SECTION 313

TOXIC RELEASE INVENTORY (TRI) CHEMICAL CATEGORIES

N096 Cobalt Compounds *Includes any unique chemical substance that contains cobalt as part of that chemical's infrastructure.*

N100 Copper Compounds *Includes any unique chemical substance that contains copper as part of that chemical's infrastructure. This category does not include copper phthalocyanine compounds that are substituted with only hydrogen, and/or chlorine, and/or bromine.*

N106 Cyanide Compounds *Includes any chemical substance with the following chemical formula:*

$X+CN^-$ where $X = H^+$ or any other group where a formal dissociation can be made. For example KCN or $Ca(CN)_2$.

N120 Diisocyanates *This category includes only those chemicals listed below.*

CAS Number	Diisocyanate Chemical Name
38661-72-2	1,3-Bis(methylisocyanate)-cyclohexane
10347-54-3	1,4-Bis(methylisocyanate)-cyclohexane
2556-36-7	1,4-Cyclohexanediisocyanate
134190-37-7	Diethyldiisocyanatobenzene
4128-73-8	4,4'-Diisocyanatodiphenyl ether
75790-87-3	2,4'-Diisocyanatodiphenyl sulfide
91-93-0	3,3'-Dimethoxybenzidine-4,4'-diisocyanate
91-97-4	3,3'-Dimethyl-4,4'-diphenylene diisocyanate
139-25-3	3,3'-Dimethyldiphenyl methane-4,4'-diisocyanate
822-06-0	Hexamethylene-1,6-diisocyanate
4098-71-9	Isophorone diisocyanate
75790-84-0	4-Methyldiphenylmethane-3,4-diisocyanate
5124-30-1	1,1-Methylenebis(4-isocyanatocyclohexane)
101-68-8	Methylenebis(phenylisocyanate) (MDI)
3173-72-6	1,5-Naphthalene diisocyanate
123-61-5	1,3-Phenylene diisocyanate
104-49-4	1,4-Phenylene diisocyanate
9016-87-9	Polymeric diphenylmethane diisocyanate

APPENDIX D - EPCRA SECTION 313

TOXIC RELEASE INVENTORY (TRI) CHEMICAL CATEGORIES

16938-22-0	2,2,4-Trimethylhexamethylenediisocyanate
15646-96-5	2,4,4-Trimethylhexamethylene diisocyanate

N150 Dioxin and Dioxin-Like Compounds (Manufacturing; and the processing or otherwise use of dioxin and dioxin-like compounds if the dioxin and dioxin-like compounds are present as contaminants in a chemical and if they were created during the manufacturing of that chemical.) This category includes only those chemicals listed below.

CAS Number	Dioxin Chemical Name
1746-01-6	2,3,7,8- Tetrachlorodibenzo- <i>p</i> -dioxin
40321-76-4	1,2,3,7,8-Pentachlorodibenzo- <i>p</i> -dioxin
39227-28-6	1,2,3,4,7,8-Hexachlorodibenzo- <i>p</i> -dioxin
57653-85-7	1,2,3,6,7,8-Hexachlorodibenzo- <i>p</i> -dioxin
19408-74-3	1,2,3,7,8,9-Hexachlorodibenzo- <i>p</i> -dioxin
35822-46-9	1,2,3,4,6,7,8-Heptachlorodibenzo- <i>p</i> -dioxin
3268-87-9	1,2,3,4,6,7,8,9-Octachlorodibenzo- <i>p</i> -dioxin
51207-31-9	2,3,7,8-Tetrachlorodibenzofuran
57117-41-6	1,2,3,7,8-Pentachlorodibenzofuran
57117-31-4	2,3,4,7,8-Pentachlorodibenzofuran
70648-26-9	1,2,3,4,7,8-Hexachlorod-benzofuran
57117-44-9	1,2,3,6,7,8-Hexachlorodibenzofuran
72918-21-9	1,2,3,7,8,9-Hexachlorodibenzofuran
60851-34-5	2,3,4,6,7,8-Hexachlorodibenzofuran
67562-39-4	1,2,3,4,6,7,8-Heptachlorodibenzofuran
55673-89-7	1,2,3,4,7,8,9-Heptachlorodibenzofuran
39001-02-0	1,2,3,4,6,7,8,9-Octachlorodibenzofuran

N171 Ethylenebisdithiocarbamic acid, salts and esters (EBDCs) *Includes any unique chemical substance that contains an EBDC or an EBDC salt as part of that chemical's infrastructure.*

APPENDIX D - EPCRA SECTION 313

TOXIC RELEASE INVENTORY (TRI) CHEMICAL CATEGORIES

N230 Certain Glycol Ethers *Includes any chemical substance with the following chemical formula:*

where $n = 1, 2, \text{ or } 3$

R = alkyl C7 or less; or

R = phenyl or alkyl substituted phenyl;

R' = H, or alkyl C7 or less; or

OR' = consisting of carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate.

N420 Lead Compounds *Includes any unique chemical substance that contains lead as part of that chemical's infrastructure.*

N450 Manganese Compounds *Includes any unique chemical substance that contains manganese as part of that chemical's infrastructure.*

N458 Mercury Compounds *Includes any unique chemical substance that contains mercury as part of that chemical's infrastructure.*

N495 Nickel Compounds *Includes any unique chemical substance that contains nickel as part of that chemical's infrastructure.*

N503 Nicotine and salts *Includes any unique chemical substance that contains nicotine or a nicotine salt as part of that chemical's infrastructure.*

N511 Nitrate compounds (water dissociable; reportable only when in aqueous solution)

N530 Nonylphenol. *This category includes only those chemicals listed below:*

This category was added to the TRI chemical list in September 2014. Facilities that meet TRI reporting thresholds for nonylphenol should begin collecting release information on January 1, 2015 (reporting forms due by July 1, 2016).

CAS Number	PAC Chemical Name
104-40-5	4-Nonylphenol
11066-49-2	Isononylphenol
25154-52-3	Nonylphenol
26543-97-5	4-Isononylphenol
84852-15-3	4-Nonylphenol, branched
90481-04-2	Nonylphenol, branched

APPENDIX D - EPCRA SECTION 313

TOXIC RELEASE INVENTORY (TRI) CHEMICAL CATEGORIES

N575 Polybrominated Biphenyls (PBBs) *Includes any chemical substance with the following chemical formula:*

Where $x = 1$ to 10

N583 Polychlorinated alkanes (C₁₀ to C₁₃) (except for those members of the category that have an average chain length of 12 carbons and contain an average chlorine content of 60% by weight which are subject to the 0.1% *de minimis*). *Includes any chemical substance with the following chemical formula:*

where $x = 10$ to 13 ; $y = 3$ to 12 ; and

the average chlorine content ranges from 40-70% with the limiting molecular formulas C₁₀H₁₉Cl₃ and C₁₃H₁₆Cl₁₂.

N590 Polycyclic aromatic compounds (PACs) *This category includes the chemicals listed below*

CAS Number	PAC Chemical Name
56-55-3	Benz(a)anthracene
205-99-2	Benzo(b)fluoranthene
205-82-3	Benzo(j)fluoranthene
207-08-9	Benzo(k)fluoranthene
206-44-0	Benzo(j,k)fluorene
189-55-9	Benzo(r,s,t)pentaphene
218-01-9	Benzo(a)phenanthrene
50-32-8	Benzo(a)pyrene
226-36-8	Dibenz(a,h)acridine
224-42-0	Dibenz(a,j)acridine
53-70-3	Dibenzo(a,h)anthracene
194-59-2	7H-Dibenzo(c,g)carbazole

APPENDIX D - EPCRA SECTION 313
TOXIC RELEASE INVENTORY (TRI) CHEMICAL CATEGORIES

5385-75-1	Dibenzo(a,e)fluoranthene
192-65-4	Dibenzo(a,e)pyrene
189-64-0	Dibenzo(a,h)pyrene
191-30-0	Dibenzo(a,l)pyrene
57-97-6	7,12-Dimethylbenz(a)-anthracene
42397-64-8	1,6-Dinitropyrene
42397-65-9	1,8-Dinitropyrene
193-39-5	Indeno(1,2,3-cd)pyrene
56-49-5	3-Methylcholanthrene
3697-24-3	5-Methylchrysene
7496-02-8	6-Nitrochrysene
5522-43-0	1-Nitropyrene
57835-92-4	4-Nitropyrene

N725 Selenium Compounds *Includes any unique chemical substance that contains selenium as part of that chemical's infrastructure.*

N740 Silver Compounds *Includes any unique chemical substance that contains silver as part of that chemical's infrastructure.*

N746 Strychnine and salts *Includes any unique chemical substance that contains strychnine or a strychnine salt as part of that chemical's infrastructure.*

N760 Thallium Compounds *Includes any unique chemical substance that contains thallium as part of that chemical's infrastructure.*

N770 Vanadium Compounds *Includes any unique chemical substance that contains vanadium as part of that chemical's infrastructure.*

N874 Warfarin and salts *Includes any unique chemical substance that contains warfarin or a warfarin salt as part of that chemical's infrastructure.*

N982 Zinc Compounds *Includes any unique chemical substance that contains zinc as part of that chemical's infrastructure.*

For more details on how to report TRI chemical categories, see <http://www2.epa.gov/toxics-release-inventory-tri-program/reporting-tri-facilities>

EPA has more detailed chemical-specific guidance documents for the EPCRA Section 313 chemical categories on its webpage http://www2.epa.gov/toxics-release-inventory-tri-program/guidance-documents-tri-reporting#chemical_sp Documents are available for:

- Lead and Lead Compounds
- Mercury and Mercury Compounds
- Polycyclic Aromatic Compounds
- Pesticides and Other Persistent Bioaccumulative Toxic (PBT) Chemicals
- Dioxin and Dioxin-like Compounds Category
- Aqueous Ammonia
- Nitrate Compounds
- Hydrochloric acid aerosols
- Sulfuric acid aerosols
- Certain glycol ethers
- Chlorophenols
- List of Toxic Chemicals with Ethylenebisdithiocarbamic Acid, Salts and Esters Category and List of Mixtures that Contain the Individually listed Chemicals Maneb, Netiram, Nabam, and Zineb
- Nicotine and salts
- Polychlorinated alkanes
- Strychnine and salts
- Warfarin and salts

THIS PAGE INTENTIONALLY LEFT BLANK

APPENDIX E - CERCLA HAZARDOUS SUBSTANCE CHEMICAL CATEGORIES

This Appendix provides further definition or clarification, where available, of CERCLA chemical categories that are listed with N.A. as the CAS Registry Number in the consolidated list. Dichlorobenzidine and diphenylhydrazine are also included in this Appendix for completeness sake because they are listed on the consolidated list with CAS No. of N.A., although technically each is not considered a category containing several chemical substances. Radionuclides listed under CERCLA are provided in a separate list in Appendix B of this document, with RQs in Curies. EPCRA section 313 (TRI) Chemical Category definitions are found in Appendix C. Each CERCLA chemical category in this Appendix was designated as a CERCLA hazardous substance based on a statutory source (See NOTE following 40 CFR 302.4 (b)). Statutory Code (1), (2), (3), or (4), shown after each category name, refers to a statutory source, which is listed at the end of this Appendix. Other numbers in parenthesis are reference codes for the source of information used to define or clarify the category. These references appear at the end of the Appendix. Many chemicals that are also members of a category may also be listed separately as a CERCLA chemical with its own RQ. For example, cobaltous bromide, CAS 7789-43-7, appears on the CERCLA list separately.

For each CERCLA chemical category (other than metal compounds) from the section 307(a) of Clean Water Act, the individual chemicals that are part of the category that appear in this Appendix, were taken from Reference 6, where EPA had listed 126 specific substances as "priority toxic pollutants."

Arsenic and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains arsenic as part of that chemical's infrastructure (5).

Arsenic Compounds (inorganic including arsine) (7).

Antimony and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains antimony as part of that chemical's infrastructure (5).

For antimony and compounds, the term *compounds* shall include organic and inorganic compounds (8).

Beryllium and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains beryllium as part of that chemical's infrastructure (5).

Cadmium and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains cadmium as part of that chemical's infrastructure (5).

APPENDIX E
CERCLA Hazardous Substances- Chemical Categories

Chromium and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains chromium as part of that chemical's infrastructure (5).

Chlorinated Benzenes (2)

Chlorobenzene	(6)
1,2-dichlorobenzene	(6)
1,3-dichlorobenzene	(6)
1,4-dichlorobenzene	(6)
1,2,4-trichlorobenzene	(6)
Hexachlorobenzene	(6)

Chlorinated Ethanes (2)

Chloroethane	(6)
1,1-dichloroethane	(6)
1,2-dichloroethane	(6)
1,1,1-trichloroethane	(6)
1,1,2-trichloroethane	(6)
1,1,2,2-tetrachloroethane	(6)
Hexachloroethane	(6)

Chlorinated Phenols (2)

2-chlorophenol	(6)
2,4-dichlorophenol	(6)
2,4,6-trichlorophenol	(6)
Parametachlorocresol (4-chloro-3-methyl phenol)	(6)

Chloroalkyl Ethers (2)

Bis(2-chloroethoxy)methane	(6)
Bis(2-chloroethyl) ether	(6)
2-chloroethyl vinyl ether (mixed)	(6)

Cobalt and Compounds (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains cobalt as part of that chemical's infrastructure (5).

Coke Oven Emissions (3)

Copper and Compounds (2)

Creosote (4)

RCRA Toxic hazardous waste code U051 40 CFR 261.33 (f)

APPENDIX E

CERCLA Hazardous Substances- Chemical Categories

Creosote, as defined by the American Wood Preservers Association, is a distillate derived from coal tar, derived by the high temperature carbonization of bituminous coal. Creosote consists primarily of liquid, solid polycyclic aromatic hydrocarbons (PAHs), other heteronuclear aromatic substances, and some tar acids and bases. Creosote Oil (Common Name) has the following active ingredients:

Coal Tar	CAS Number 8007-45-2
Creosote Oil	CAS Number 61789-28-4
Coal Tar Creosote	CAS No. 8001-58-9

Currently there are thirteen creosote industrial wood preservative products registered as pesticides with USEPA under FIFRA. All have “creosote” as part of the product name. (14)

Cyanides (2), (3)

Cyanide and Compounds (2), (3)

X'CN where X = H' or any other group where a formal dissociation may occur. For example KCN or Ca(CN)₂. (9)

Cyanides (soluble salts and complexes, not otherwise specified) P030 Haz. Waste (4)

DDT and Metabolites (2)

4,4-DDT	(6)
4,4-DDE (p,p-DDX)	(6)
4,4-DDD (p,p-TDE)	(6)

DDT means the compounds DDT, DDD, and DDE as identified by the chemical names: (DDT)-1,1,1-trichloro-2,2-bis(p-chlorophenyl) ethane and some o,p'-isomers; (DDD) or (TDE)-1,1-dichloro-2,2-bis(p-chlorophenyl) ethane and some o,p'-isomers; (DDE)-1,1-dichloro-2,2-bis(p-chlorophenyl) ethylene. (10)

Dichlorobenzidine (2)

3,3-dichlorobenzidine	(6)
-----------------------	-----

Diphenylhydrazine (2)

1,1-diphenylhydrazine	(6)
-----------------------	-----

Diphenylhydrazine (2)

1,1-diphenylhydrazine	(6)
-----------------------	-----

Endosulfan and Metabolites (2)

Alpha-endosulfan	(6)
Beta-endosulfan	(6)
Endosulfan sulfate	(6)

APPENDIX E
CERCLA Hazardous Substances- Chemical Categories

Endrin and metabolites	(2)
Endrin	(6)
Endrin aldehyde	(6)

Endrin means the compound endrin as identified by the chemical name 1,2,3,4,10,10-hexachloro-6,7-epoxy-1,4,4a,5,6,7,8,8a-octahydro-1,4-endo-5,8-endodimethanonaphthalene. (10)

Fine Mineral Fibers (3)

Includes mineral fiber emissions from facilities manufacturing or processing glass, rock, or slag fibers (or other mineral derived fibers) of average diameter 1 micrometer or less (9).

Glycol Ethers (3)

Glycol ethers include mono- and di-ethers of ethylene glycol, diethylene glycol, and triethylene glycol R-(OCH₂CH₂)_n-OR'. Where:

n = 1, 2, or 3;

R = alkyl C7 or less; or

R = phenyl or alkyl substituted phenyl;

R' = H or alkyl C7 or less; or

OR' consisting of carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate. (11)

The substance ethylene glycol monobutyl ether (EGBE, 2-Butoxyethanol) (CAS Number 111-76-2) is deleted from the list of hazardous air pollutants established by 42 U.S.C. 7412(b)(1)[Section 112(b)(1) of CAA]. (12)

Haloethers (2)

4-chlorophenyl phenyl ether (6)

2-bromophenyl phenyl ether (6)

Bis(2-chloroisopropyl) ether (6)

Haloethers (other than those listed elsewhere; includes chlorophenylphenyl ethers, bromophenylphenyl ether, bis(dichloroisopropyl) ether, bis-(chloroethoxy) methane and polychlorinated diphenyl ethers) (13).

Halomethanes (2)

Methylene chloride (dichloromethane) (6)

Methyl chloride (chloromethane) (6)

Methyl Bromide (bromomethane) (6)

Bromoform (tribromomethane) (6)

Dichlorobromomethane (6)

Chlorodibromomethane (6)

Halomethanes (other than those listed elsewhere; includes methylene chloride, methylchloride, methylbromide, bromoform, dichlorobromomethane) (13).

APPENDIX E
CERCLA Hazardous Substances- Chemical Categories

Heptachlor and Metabolites (2)
Heptachlor (6)
Heptachlor epoxide (BHC-hexachlorocyclohexane) (6)

Lead and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains lead as part of that chemical's infrastructure (5).

Manganese and Compounds (3)
Unless otherwise specified, this listing is defined as including any unique chemical substance that contains manganese as part of that chemical's infrastructure (5).

Mercury and Compounds (2), (3)
Unless otherwise specified, this listing is defined as including any unique chemical substance that contains mercury as part of that chemical's infrastructure (5).

Nickel and Compounds (2), (3)
Unless otherwise specified, this listing is defined as including any unique chemical substance that contains nickel as part of that chemical's infrastructure (5).

Nitrosamines (2)
N-nitrosodimethylamine (6)
N-nitrosodiphenylamine (6)
N-nitrosodi-n-propylamine (6)

Nitrophenols (other than chlorinated) (2)
2-nitrophenol (6)
4-nitrophenol (6)
2,4-dinitrophenol (6)
4,6-dinitro-o-cresol (4,6-dinitro-2-methylphenol) (6)
Pentachlorophenol (6)
Phenol (6)
2,4-dimethylphenol (6)

Nitrophenols (including 2,4-dinitrophenol, dinitrocresol) (13).

Phthalate Esters (2)
Bis(2-ethylhexyl)phthalate (6)
Butyl benzyl phthalate (6)
Di-N-butyl phthalate (6)

APPENDIX E
CERCLA Hazardous Substances- Chemical Categories

Di-n-octyl phthalate	(6)
Diethyl phthalate	(6)
Dimethyl phthalate	(6)

Polychlorinated Biphenyls (PCBs) (1),(2),(3)

PCB-1242 (Arochlor 1242)	(6)
PCB-1254 (Arochlor 1254)	(6)
PCB-1221 (Arochlor 1221)	(6)
PCB-1232 (Arochlor 1232)	(6)
PCB-1248 (Arochlor 1248)	(6)
PCB-1260 (Arochlor 1260)	(6)
PCB-1016 (Arochlor 1016)	(6)

Polychlorinated Biphenyls (PCBs) means a mixture of compounds composed of the biphenyl molecule which has been chlorinated to varying degrees (10).

Polycyclic Organic Matter (3)

Includes organic compounds with more than one benzene ring, and which have a boiling point greater than or equal to 100 ° C (9).

Polynuclear Aromatic Hydrocarbons (PAHs) (2)

Acenaphthene	(6)
1,2-benzanthracene (benzo(a) anthracene)	(6)
Benzo(a)pyrene (3,4-benzo-pyrene)	(6)
3,4-benzofluoranthene (benzo(b) fluoranthene)	(6)
11,12-benzofluoranthene (benzo(k) fluoranthene)	(6)
Chrysene	(6)
Acenaphthalene	(6)
Anthracene	(6)
1,12-benzoperylene (benzo (ghi) perylene)	(6)
Fluorene	(6)
Fluoranthene	(6)
Phenanthrene	(6)
1,2,5,6-bibenzanthracene (dibenzo(ah) anthracene)	(6)
Indeno (1,2,3-cd) pyrene (2,3-o-phenylene pyrene)	(6)
Pyrene	(6)

Polynuclear aromatic hydrocarbons (including benzanthracenes, benzopyrenes, benzofluoranthene, chrysenes, dibenz-anthracenes, and indenopyrenes) (13).

Radionuclides (3) See Appendix B in this document.

A type of atom which spontaneously undergoes radioactive decay (9).

APPENDIX E
CERCLA Hazardous Substances- Chemical Categories

Selenium and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains selenium as part of that chemical's infrastructure (5).

Silver and Compounds (2), (3)

Unless otherwise specified, this listing is defined as including any unique chemical substance that contains silver as part of that chemical's infrastructure (5).

Thallium and Compounds (2)

Zinc and Compounds (2)

STATEMENT OF DETERMINATION

Facility Name		
Physical Address (Street only)		
City	County	LEPC District

I have determined that this facility is / is not subject to the following section(s) of EPCRA, Title III, for the reporting year(s) indicated (circle all applicable):

SECTION	2001	2002	2003	2004	2005	2006	2007	2008	2009	2010	2011
302 / 303	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N
311 / 312	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N
313	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N	Y / N

If “No” was indicated on any of the above, please check appropriate box(s) why:

Sections 302/303	Extremely Hazardous Substances (EHSs) are / were present only in amounts less than established Threshold Planning Quantities (TPQs).		
	No EHSs are Present.		
	No EHSs were present on-site during the year.		
Sections 311/ 312	Hazardous chemicals/EHSs are/were present only in amounts below established reporting thresholds.		
	No hazardous chemicals/EHSs are/were present.		
	No hazardous chemicals were present on-site during the year.		
Section 313	Not within covered SIC Codes.		
	Within covered SIC Codes, but less than ten (10) employees.		
	Within covered SIC Codes, but no Section 313 chemicals were present or were below Section 313 reporting thresholds.		
Other	Closed facility YES / NO	Chemicals removed YES / NO	Chemicals reduced below threshold/TPQ YES / NO
	Date Effective:		
	New Facility. Date chemicals brought on site meeting / exceeding TPQ:		

Further explanation if necessary:

CERTIFICATION:

I understand the requirements of the law(s) circled above. I also understand that ultimate compliance responsibility lies with me and failure to comply, if required, can result in civil and criminal penalties under federal and state laws.

Owner Name: _____ Operator Name: _____

Facility Representative: _____ Phone: _____

It is the facility's option to use this form or to submit Safety Data Sheets (SDSs) for certain chemicals at your facility under EPCRA, Section 311; however, the list must be grouped in the five Hazard Categories listed below. This is a one-time reporting requirement. However, within ninety days of discovering significant new information on a chemical or acquiring a new chemical that is covered, a facility must submit an SDS or a new list for those chemicals.

Date of initial submittal or update: _____ Initial _____ Update _____

A copy of this submittal must be sent to: 1) Local fire department; 2) Local Emergency Planning Committee; and, 3) State Emergency Response Commission.

You must report on: 1) the Extremely Hazardous Substances in excess of the Threshold Planning Quantity, or 500 pounds, whichever is less; and 2) any of the hazardous chemicals that meet or exceed 10,000 pounds for which the OSHA requires an SDS to be maintained.

Check **all** the below listed physical and chemical categories that apply:
F - Fire Hazard; P - Sudden Release of Pressure; R - Reactivity; AH - Immediate (Acute) Health Hazard; and CH - Delayed (Chronic) Health Hazard.
(If additional space is needed, use the reverse of this form.)

INSTRUCTIONS

TIER II INVENTORY FORM

Submission of this Tier II form (when requested) is required under section 312 of the Emergency Planning and Community Right-to-Know Act (EPCRA) which was enacted as Title III of the Superfund Amendments and Reauthorization Act of 1986, Public Law 99-499, 42 U.S.C. Section 11022.

The purpose of this Tier II form is to provide State and local officials and the public with specific information on hazardous chemicals present at your facility during the past year.

CERTIFICATION

The owner or operator or the officially designated representative of the owner or operator must certify that all information included in the Tier II submission is true, accurate, and complete. On the first page of the Tier II report, enter your full name and official title. Sign your name and enter the current date. Also, enter the total number of pages included in the Confidential and Non-Confidential Information Sheet as well as all attachments. An original signature is required on at least the first page of the submission. Subsequent pages must contain either an original signature, or a signature stamp. *Note: Check with your State for specific requirements for the submission and certification.*

YOU MUST PROVIDE ALL THE INFORMATION REQUESTED ON THIS FORM TO FULFILL TIER II REPORTING REQUIREMENTS.

This form may also be used as a worksheet for completing the Tier I form or may be submitted in place of the Tier I form. Your State may have specific requirements.

WHO MUST SUBMIT THIS FORM

Section 312 of EPCRA requires that the owner or operator of a facility submit their Tier II form if so requested by a State emergency response commission, a local emergency planning committee, or local fire department with jurisdiction over the facility.

This request may apply to the owner or operator of any facility that is required under regulations implementing the Occupational hazardous chemical present at your facility in quantities equal to or greater than established threshold amounts (discussed below), unless the chemicals are excluded under Section 311(e) of EPCRA.

Hazardous chemical means any hazardous chemical as defined under 29 CFR

Safety and Health Act of 1970, to prepare or have available a Safety Data Sheet (SDS) for a hazardous chemical present at the facility. SDS requirements are specified in the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (HCS), found in Title 29 of the Code of Federal Regulations (CFR) at Section 1910.1200.

This form does not have to be submitted if all of the chemicals located at your facility are excluded under Section 311(e) of EPCRA (discussed below).

WHAT CHEMICALS ARE INCLUDED

If you are submitting the Tier II form in lieu of Tier I, you must report the required information on this Tier II form for each

1910.1200(c) except that such term does not include substances excluded from section 311(e), as discussed below.

If you elect to submit Tier I rather than Tier II, you may still be required to submit Tier II information upon request.

WHAT CHEMICALS ARE EXCLUDED

Section 311(e) of EPCRA excludes the following substances:

- 1) Any food, food additive, color additive, drug, or cosmetic regulated by the Food and Drug Administration;
- 2) Any substance present as a solid in any manufactured item to the extent exposure to the substance does not occur under normal conditions of use;
- 3) Any substance to the extent it is used for personal, family, or household purposes, or is present in the same form and concentration as a product packaged for distribution and use by the general public;
- 4) Any substance to the extent it is used in a research laboratory or a hospital or other medical facility under the direct supervision of a technically qualified individual; and
- 5) Any substance to the extent it is used in routine agricultural operations or is a fertilizer held for sale by a retailer to the ultimate customer.

OSHA regulations, Section 1910.1200(b), stipulate exemptions from the requirement to prepare to have available an SDS.

REPORTING THRESHOLDS

Minimum thresholds have been established for Tier I/Tier II reporting in 40 CFR part 370). These thresholds are as follows:

For Extremely Hazardous Substances (EHSs) designated under EPCRA Section 302 the reporting threshold is 500 pounds (or 227 kg.) or the threshold planning quantity (TPQ), whichever is lower. (EHSs and their TPQs are listed in 40 CFR part 355, Appendix A and B.

For gasoline (all grades combined) at a retail gas station, the threshold level is 75,000 gallons (or approximately 283,900 liters), if the tank(s) was stored entirely underground and was in compliance at all times during the preceding calendar year with all applicable Underground Storage Tank (UST)

requirements at 40 CFR part 280 or requirements of the State UST program approved by the Agency under 40 CFR part 281.

For diesel fuel (all grades combined) at a retail gas station, the threshold level is 100,000 gallons (or approximately 378,500 liters), if the tank(s) was stored entirely underground and the tank(s) was in compliance at all times during the preceding calendar year with all applicable Underground Storage Tank (UST) requirements at 40 CFR part 280 or requirements of the State UST program approved by the Agency under 40 CFR part 281.

Note: A retail gas station means a retail facility engaged in selling gasoline and/or diesel fuel principally to the public for motor vehicle use on land.

For all other hazardous chemicals for which facilities are required to have or prepare an SDS, the minimum reporting threshold is 10,000 pounds (or 4,540 kg.).

You need to report hazardous chemicals that were present at your facility at any time during the previous calendar year at levels that equal or exceed these thresholds. For instructions on threshold determinations for components of mixtures, see “What About Mixtures?” in this document.

Note: States may have lower reporting thresholds and additional chemicals covered by the state right-to-know regulations. Contact your state for any specific requirements for that state.

WHEN TO SUBMIT THIS FORM

Owners or operators of facilities that have hazardous chemicals present at the facility in quantities equal to or greater than set threshold levels must submit either Tier I or Tier II form by March 1.

Note: All states currently require facilities to submit federal Tier II inventory form or the state developed form or format including on-line reporting and certification. Contact your state for the specific requirements for that state.

WHERE TO SUBMIT THIS FORM

Send the completed Tier II form(s) to each of the following organizations:

- 1) Your State Emergency Response Commission or Emergency Response Commission of the Tribe.
- 2) Your Local Emergency Planning Committee.
- 3) The fire department with jurisdiction over your facility.

CONFIDENTIAL INFORMATION

Under EPCRA Section 324, you may elect to withhold location information on a specific chemical from disclosure to the public. If you choose to do so, check the box marked "yes".

- On a separate Tier II Confidential Location Information Sheet, enter the name and CAS number of each chemical for which you are keeping the location confidential.
- Enter the appropriate location and storage information, as described above for non-confidential locations.
- Attach the Tier II Confidential Location Information Sheet to the Tier II form. This separates confidential locations from other information that will be disclosed to the public.

INSTRUCTIONS TO PAGE ONE OF THE TIER II INVENTORY FORM

Please read these instructions carefully. Print or type all responses.

REPORTING PERIOD

Enter the appropriate calendar year, beginning January 1 and ending December 31.

IDENTICAL INFORMATION

Check the box located at the top of page one of the form, if the information reported on page one is identical to that submitted last year.

Note: This data element may be only applicable starting reporting year 2014 since most of the information required on page one of the form is new for reporting year 2013.

Chemical descriptions, hazards, amounts, and locations must be provided in this year's form, even if the information is identical to that submitted last year.

FACILITY IDENTIFICATION

Enter the complete name and address of the location of your facility where the hazardous chemicals are stored. Enter the full street address or state road, county, city, state, and zip code.

Provide a general phone number for your facility. (*Note: This is an optional data element.*)

Provide the latitude and longitude for the location of your facility.

Indicate if the facility is manned or unmanned. If the facility is manned at least part of the day, check the box "manned". The box "unmanned" should only be checked if the facility is never manned. This information is useful for state and local emergency planners to include people at your facility in the emergency response plan and for planning evacuation during an emergency.

Estimate the maximum number of occupants that may be present at any one time at your facility. If the facility is manned at least part of a day, indicate the number of persons present. This information is useful for state and local emergency planners and responders in the emergency plan and for planning evacuation during an emergency. You should include contractors, vendors and people that may be present for any training or other events as well as employees. If the location is never manned, check the box marked "N/A".

Enter the primary North American Industry Classification System (NAICS) code and the Dun & Bradstreet number of your facility. The financial officer of your facility should be able to provide the Dun & Bradstreet number. If your firm does not have this information, contact the State or regional office of Dun & Bradstreet to obtain your facility number or have one assigned.

SUBJECT TO EMERGENCY PLANNING

Indicate if your facility is subject to the emergency planning notification requirement under EPCRA section 302, codified in 40 CFR part 355. Check the box "yes" or "no".

SUBJECT TO CHEMICAL ACCIDENT PREVENTION

Indicate if your facility is subject to chemical accident prevention provisions under section 112(r) of the Clean Air Act, also known as the Risk Management Program (RMP), codified in 40 CFR part 68. Check the box "yes" or "no".

IDENTIFICATION NUMBER UNDER THE TOXIC RELEASE INVENTORY (TRI) PROGRAM

If your facility is subject to the Toxic Release Inventory (TRI) program under section 313 of EPCRA, provide the identification number assigned by EPA. If your facility is not subject to this reporting requirement or if your facility has not been assigned a number under this program, check the box marked "N/A".

IDENTIFICATION NUMBER UNDER THE RISK MANAGEMENT PROGRAM (RMP)

If your facility is subject to the chemical accident prevention provisions codified in 40 CFR part 68, also known as the Risk Management Program, provide the RMP facility identification number assigned by EPA. If your facility is not subject to this provision or if your facility has not been assigned a number, check the box marked "N/A".

OWNER/OPERATOR

Enter the owner or operator's full name, mailing address, and phone number. Provide the email address of the owner or operator of the facility.

PARENT COMPANY

Enter the name, mailing address, phone number, email address and Dun & Bradstreet number of the parent company. *Note: These are optional data elements.*

FACILITY EMERGENCY COORDINATOR

Enter the name, title, email address, phone number and 24-hour phone number of the facility emergency coordinator.

Note: This data element is only applicable to facilities subject to EPCRA section 302(c) emergency planning notification. Section 303(d)(1) of EPCRA requires facilities subject to the emergency planning notification requirement under Section 302(c) to designate a facility representative who will participate in the local emergency planning process as a facility emergency coordinator. This data element is also applicable to additional facilities designated by the Governor or the SERC under EPCRA section 302(b)(2)). EPA encourages facilities not subject to the emergency planning notification requirement also to provide this information, for effective emergency planning in your community.

TIER II INFORMATION CONTACT

Enter the name, title, email address and phone number of the person knowledgeable of the information contained in the Tier II inventory form.

EMERGENCY CONTACT

Enter the name, title, phone number and email address of at least one local person or office that can act as a referral if emergency responders need assistance in responding to a chemical accident at the facility. If there is more than one person assigned to this duty, provide the same information for that person.

Also, provide an emergency phone number where such emergency information will be available 24 hours a day, every day. This is mandatory. The facility must make some arrangement to ensure that a 24-hour contact is available.

INSTRUCTIONS TO PAGE TWO OF THE FORM

CHEMICAL INFORMATION SECTION

Description, Hazards, Amounts, and Locations

This section of the Tier II form requires facilities to report specific information on amounts and locations of hazardous chemicals. Separate fields are provided for reporting both pure chemicals and mixtures. For each entry, check the box indicating if the information is identical to the information submitted last year.

Chemical descriptions, hazards, amounts, and locations must be provided even if the information is identical to that submitted last year.

- What units should I use?

Calculate all amounts as *weight in pounds*. To convert gas or liquid volume to weight in pounds, multiply by an appropriate density factor.

- What about mixtures?

If a hazardous chemical is part of a mixture, you have the option of reporting the entire mixture or only the portion of the mixture that is a particular hazardous chemical (e.g., If a hazardous solution weighs 100 lbs. but is composed of only 5% of a particular hazardous chemical, you can indicate either 100 lbs. of the mixture *or* 5 lbs. of the chemical).

The option used for each mixture at your facility must be consistent with the option used in your Section 311 reporting.

Because EHSs are important to local emergency planning requirement under EPCRA section 303, EHSs have lower reporting thresholds under EPCRA section 312. The amount of an EHS at a facility (both pure EHSs and EHSs in mixtures) must be aggregated for purposes of threshold determination. It is suggested that the aggregation calculation be done as a first step in determining whether reporting threshold has been met or exceeded. Once you determine whether a threshold for an EHS has been reached, you may report the mixture or product name as it appears on the SDS. You must also report any EHSs present in the mixture. You do not need to report any non-EHSs in the mixture, but may if you wish to do so. Although you have an option to report either the mixture or the EHS, as provided in 40 CFR 370.14, you must be consistent with your EPCRA section 311 reporting.

For any mixture containing an EHS that the facility is reporting as a mixture, the facility must check the box “yes” to indicate that the mixture contains an above-threshold EHS. You must also write the name of the EHS(s) contained in the mixture on the line provided.

You are not required to list any non-EHSs in the mixture. This is optional.

CHEMICAL DESCRIPTION

Separate fields are provided for reporting pure chemicals and mixtures. For each entry, **check the box indicating if the information is identical to the information submitted last year.**

To report mixtures, facilities have the option to report by the component or the mixture itself. However, as stated in the regulations at 40 CFR 370.14(b), the reporting option used must be consistent for both MSDS and inventory reporting, unless it is not possible to do so. This means that, if the facility report on a specific mixture as a whole for SDS reporting, then the facility must report on that mixture as a whole for inventory reporting too.

Pure Chemical:

- Provide the chemical name (or common name of the chemical) as provided on the Safety Data Sheet (SDS). Enter the Chemical Abstract Service (CAS) registry number.
- Indicate if the chemical is an EHS. Check the box “yes” or “no”.
- Check box for the appropriate descriptor for the chemical: solid, liquid, or gas.

Mixture:

- Provide the name of the mixture, product name or trade name as provided on the safety data sheet (SDS).
- Enter the Chemical Abstract Service (CAS) number of the mixture or product, if available.
- Check box for the appropriate descriptor: solid, liquid, or gas.
- If the mixture contains any EHS, check the box “yes”, and then enter the name and CAS number of each EHS in the mixture.
- You are not required to list non-EHSs in the mixture, but may report if you wish to do so.

If you are withholding the name of a chemical or mixture as trade secret in accordance with criteria specified in EPCRA section 322, enter the generic class or category that is structurally descriptive of the chemical (e.g., list toluene diisocyanate as organic isocyanate) and check the box marked Trade Secret. Trade secret information should be submitted to EPA and must include a substantiation.

Trade secret regulations can be found in 40 CFR part 350.

Trade secret substantiation form and instructions can be accessed from EPA website at <http://www2.epa.gov/epcra-tier-i-and-tier-ii-reporting/epcra-trade-secret-forms-and-instructions>.

PHYSICAL AND HEALTH HAZARDS

For each chemical you have listed, check all the physical and health hazard boxes that apply. These hazard categories are defined in 40 CFR 370.66. The two health hazard categories and three physical hazard categories are a consolidation of the 23 hazard categories defined in the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

Hazard Category Comparison For Reporting Under Sections 311 and 312Page 8 of 11

EPA's Hazard Communication

Fire Hazard

OSHA's Hazard Categories

Flammable
Combustion
Liquid
Pyrophoric
Oxidizer

Sudden Release of Pressure	Explosive Compressed Gas
Reactive	Unstable Reactive Organic Peroxide Water Reactive
Immediate (Acute) Health Hazards	Highly Toxic Toxic Irritant Sensitizer Corrosive Other hazardous chemicals with an adverse effect with short term exposure
Delayed (Chronic) Health Hazard	Carcinogens Other hazardous chemicals with an adverse effect with long term exposure

MAXIMUM AMOUNT

- 1) For each pure chemical or mixture that you are reporting, estimate the maximum amount present at your facility on any single day during the reporting period.
- 2) If you are reporting a mixture, you must list any EHS(s) present in the mixture and report the maximum amount and the CAS number(s) of each EHS present in the mixture. Find the appropriate range value code in Table I.
- 3) Enter this range value as the maximum daily amount.

TABLE I - REPORTING RANGES

Range Value	Weight Range in Pounds	
	From	To
01	0	99
02	100	499
03	500	999
04	1,000	4,999
05	5,000	9,999
06	10,000	24,999
07	25,000	49,999
08	50,000	74,999
09	75,000	99,999
10	100,000	499,999
11	500,000	999,999
12	1,000,000	9,999,999
13	10,000,000	Greater than 10 million

EXAMPLE:

You received one large shipment of a solvent mixture last year. The shipment filled five 5,000-gallon storage tanks. You know that the solvent contains 10% benzene, which is a hazardous chemical.

You figure that 10% of 25,000 gallons is 2,500 gallons. You also know that the density of benzene is 7.29 pounds per gallon, so you multiply 2,500 gallons by 7.29 pounds per gallon to get a weight of 18,225 pounds.

Then you look at Table I and find that the range value 06 corresponds to 18,225. You enter 06 as the Maximum Amount.

AVERAGE DAILY AMOUNT

- 1) For each pure chemical or mixture that you are reporting, estimate the average weight in pounds that was present at your facility during the year.
- 2) To do this, total all daily weights and divide by the number of days the chemical was present on the site.
- 3) Find the appropriate range value in Table I.
- 4) Enter this range value as the Average Daily Amount.

EXAMPLE:

The 25,000-gallon shipment of solvent you received last year was gradually used up and completely gone in 315 days. The sum of the daily volume levels in the tank is 4,536,000 gallons. By dividing 4,536,000 gallons by 315 days on-site, you calculate an average daily amount of 14,400 gallons.

You already know that the solvent contains 10% benzene, which is a hazardous chemical. Since 10% of 14,400 is 1,440, you figure that you had an average of 1,440 gallons of benzene. You also know that the density of benzene is 7.29 pounds per gallon, so you multiply 1,440 by 7.29 to get a weight of 10,500 pounds.

Then you look at Table I and find that the range value 06 corresponds to 10,500. You enter 06 as the Average Daily Amount.

NUMBER OF DAYS ON-SITE

Enter the number of days that the hazardous chemical was present on-site.

EXAMPLE:

The solvent composed of 10% benzene was present for 315 days at your facility. Enter 315 in the space provided.

STORAGE TYPES, CONDITIONS AND LOCATIONS

List all non-confidential locations of hazardous chemicals along with storage types and conditions associated with each location. Please note that a particular chemical or mixture may be located in several places around the facility.

1. STORAGE TYPES AND CONDITIONS

Enter the types and conditions of storage for each chemical that you are reporting.

- a. *Table II.* This table lists examples of some of the common storage types that facilities use at their site. You may provide a detailed description for the storage type at your facility.
- b. *Table III.* For each location, find the appropriate storage types for pressure and temperature conditions. You may provide a description for the various conditions at your facility.

Table II - STORAGE TYPES

Above ground tank
Below ground tank
Tank inside building
Steel drum
Plastic or non-metallic drum
Can

Table III - PRESSURE AND TEMPERATURE CONDITIONS

(PRESSURE)
Ambient pressure;
Greater than ambient pressure
Less than ambient pressure
(TEMPERATURE)
Ambient temperature

Carboy
Silo

Fiber drum
Bag
Box
Cylinder
Glass bottles or jugs
Plastic bottles or jugs
Tote bin
Tank wagon
Rail car
Battery

Greater than ambient temperature
Less than ambient temperature but not
cryogenic
Cryogenic conditions

2. STORAGE LOCATIONS:

Indicate if your facility wishes to claim the location information for any of the pure chemical or mixture that you are reporting. Check the box “yes” or “no”.

If you wish to claim the location information confidential for any of the chemical or mixture that you are reporting, you must fill out the Confidential Location Information Sheet and you must submit it along with your Tier II inventory form. The Confidential Location Information Sheet can be found at EPA’s website at: <http://www2.epa.gov/epcra-tier-i-and-tier-ii-reporting/epcra-tier-ii-confidential-location-information-form>.

If the location is non-confidential, provide a brief description of the precise location of the chemical, so that emergency responders can locate the area easily. You may find it advantageous to provide the optional site plan or site coordinates as explained below.

For each chemical, indicate at a minimum the building or lot. Additionally, where practical, the room or area may be indicated. You may respond in narrative form with appropriate site coordinates or abbreviations.

If the chemical is present in more than one building, lot, or area location, list each location as appropriate.

OPTIONAL ATTACHMENTS

If you choose to attach one of the following, check the appropriate optional attachments box at the bottom of the chemical reporting section of the Tier II form.

- A site plan* with site coordinates indicated for buildings, lots, areas, etc. throughout your facility.
- A list of site coordinate abbreviations* that correspond to buildings, lots, areas, etc. throughout your facility.
- A description of dikes and other safeguard measures* for storage locations throughout your facility.

EXAMPLE:

You may have benzene in the main room of the main building, and in tank 2 in tank field 10. You may attach a site plan with coordinates as follows: main building = G-2, tank field 10 = B-6. Fill in the Storage Location as follows:

B-6 [Tank 2] G-2 [Main Room]

ADDITIONAL REPORTING INFORMATION (OPTIONAL)

This column is for facilities that may wish to report hazardous chemicals below the reporting thresholds and/or to report any additional state or local requirements. Check the appropriate box and follow the same procedures as described above for reporting each hazardous chemical or for any mixture that contains a hazardous chemical.
