

# COVID-19: summary of cases and monitoring

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

Cases: people with positive PCR or antigen test result	
<b>Total cases</b>	<b>2,302,489</b>
Florida residents	2,259,494
Non-Florida residents	42,995
<b>Type of testing</b>	
Florida residents	2,259,494
Positive by BPHL/CDC	82,614
Positive by commercial/hospital lab	2,176,880
PCR positive	1,798,914
Antigen positive	460,580
Non-Florida residents	42,995
Positive by BPHL/CDC	1,031
Positive by commercial/hospital lab	41,964
PCR positive	29,267
Antigen positive	13,728
<b>Characteristics</b>	
Florida residents hospitalized	93,815
Florida resident deaths	36,347
Non-Florida resident deaths	729
Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.	
More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at <a href="http://www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm">www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm</a> .	

Cases: people with positive PCR or antigen test result	
<b>Risk factors for Florida residents</b>	
Traveled	18,180
Contact with a known case	907,464
Traveled and contact with a known case	24,581
Neither	1,309,269
No travel and no contact	275,337
Travel is unknown	731,588
Contact is unknown	503,226
Contact is pending	460,912
Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.	

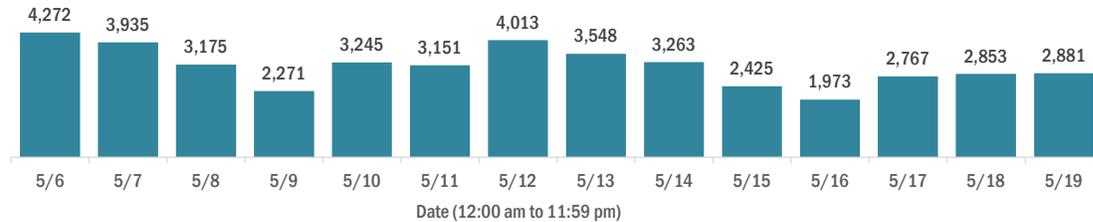

# COVID-19: summary of laboratory testing

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

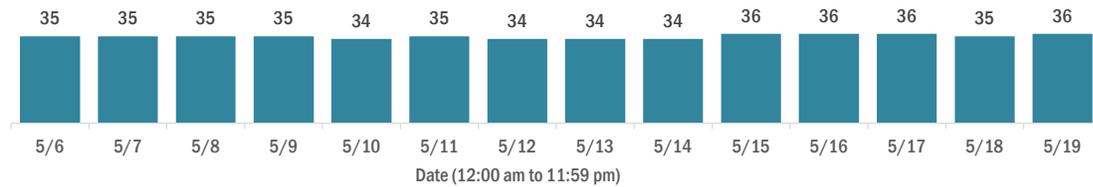

Data in this report are provisional and subject to change.

## Cases in Florida residents per day for the past 2 weeks

### Number of cases per day

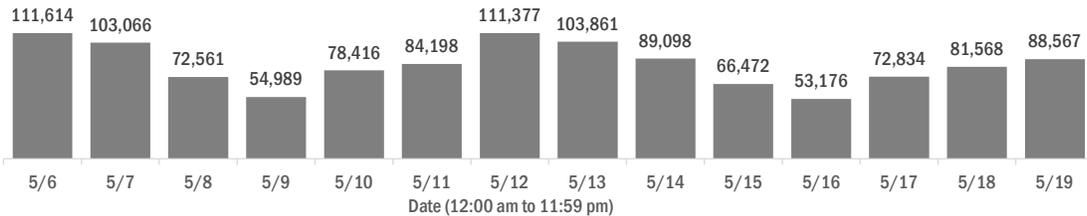

### Median age of cases by day

## Laboratory testing for Florida residents over the past 2 weeks

### Number of Florida residents tested per day

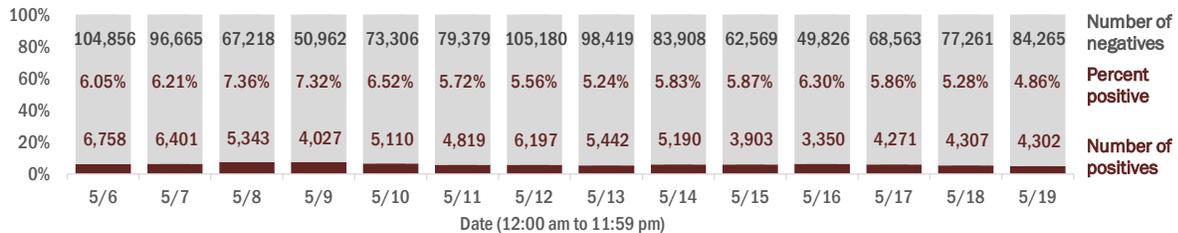

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

### Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.86% to 7.36% over the past 2 weeks and was 4.86% yesterday.

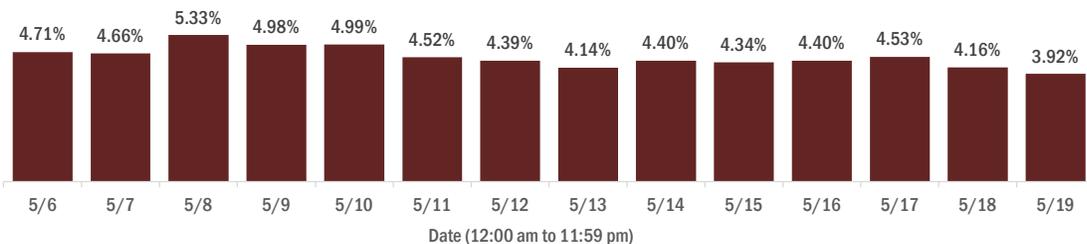

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

### Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.92% to 5.33% over the past 2 weeks and was 3.92% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

# COVID-19: characteristics of 2,259,494 Florida resident cases

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

# COVID-19: additional surveillance information

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

## Statewide emergency department (ED) chief complaint and admission data

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 211 of 211 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through May 19, 2021 verified as of May 20, 2021 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
