

COVID-19: summary of persons monitored, persons tested, and cases

Data through Aug 16, 2020 verified as of Aug 17, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

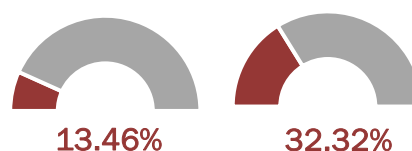

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

Total reports	176,214
Total persons of high, medium, or unknown risk	172,545
High/medium/unknown risk still being monitored	12,434

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,240,770	18,803
Positive	570,024	6,070
Negative	3,664,071	12,711
Inconclusive	6,675	22
Awaiting testing	3,764	35

Percent positivity (based on positive and negative results)

Cases: people with positive PCR or antigen test result

Total cases	576,094
Florida residents	570,024
Non-Florida residents	6,070

Type of testing	
Florida residents	570,024
Positive by BPHL/CDC	20,160
Positive by commercial/hospital lab	549,864
PCR positive	564,528
Antigen positive	5,496
Non-Florida residents	6,070
Positive by BPHL/CDC	213
Positive by commercial/hospital lab	5,857
PCR positive	5,839
Antigen positive	231

Characteristics	
Florida residents hospitalized	34,194
Florida resident deaths	9,539
Non-Florida resident deaths	135

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	4,283
Contact with a known case	177,769
Traveled and contact with a known case	4,452
Neither	383,520
No travel and no contact	64,467
Travel is unknown	245,861
Contact is unknown	124,830
Contact is pending	179,587

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

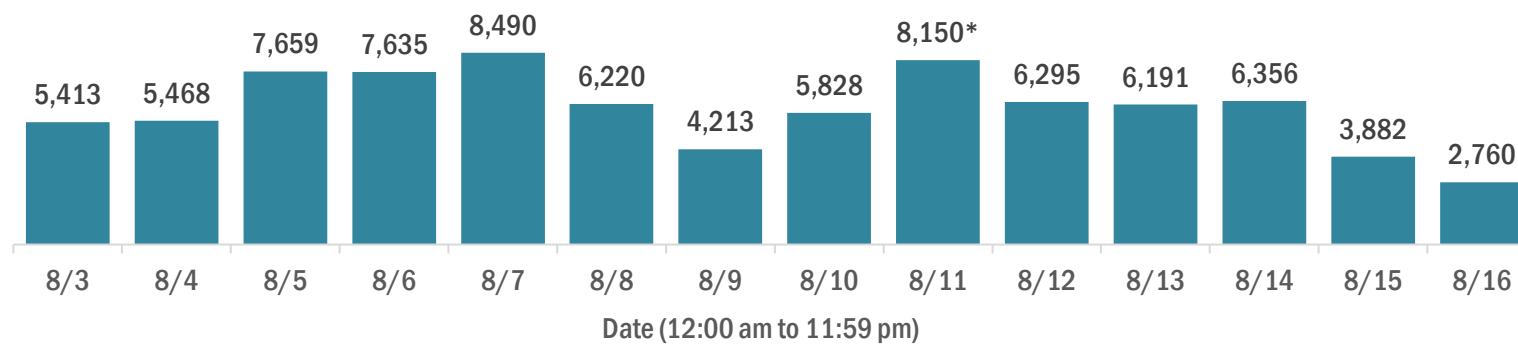

COVID-19: cases and laboratory testing over time

Data through Aug 16, 2020 verified as of Aug 17, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

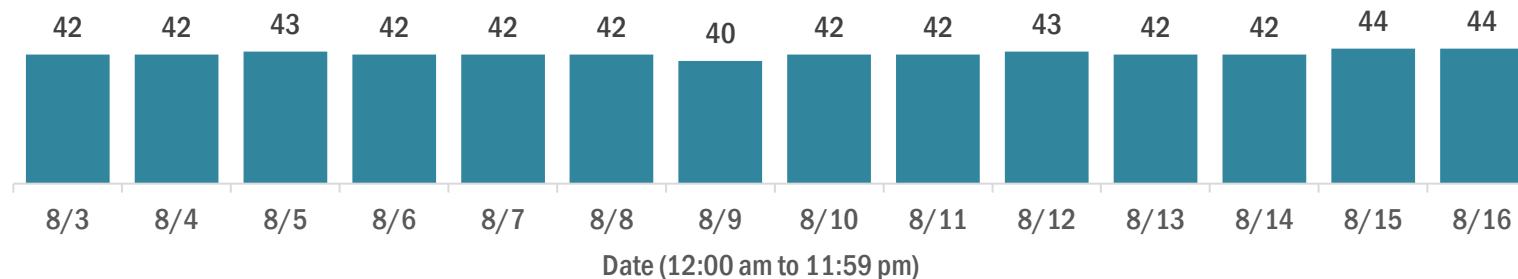

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

* Includes a one-time historical data submission from a laboratory newly enrolled in the Department's electronic laboratory reporting (ELR) process. The number of new cases on 8/11 excluding the historical data submission was 5,218.

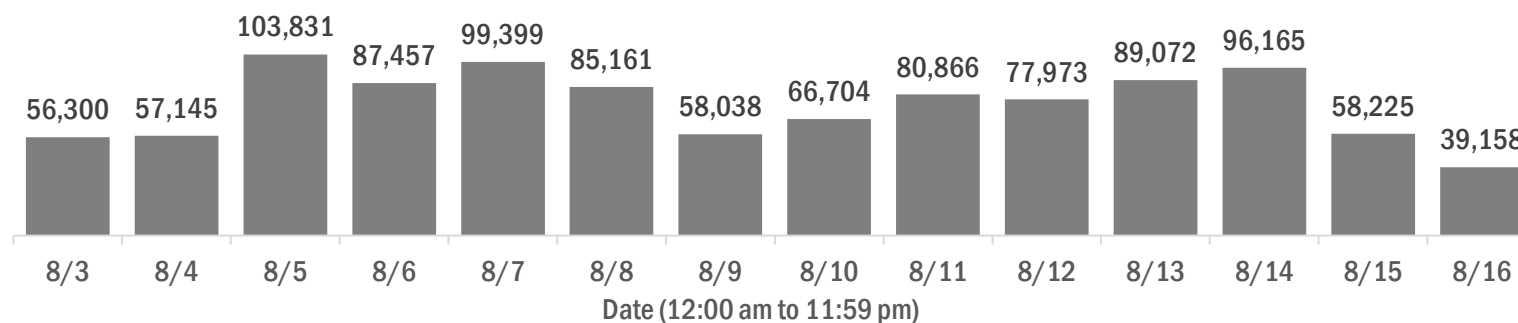

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

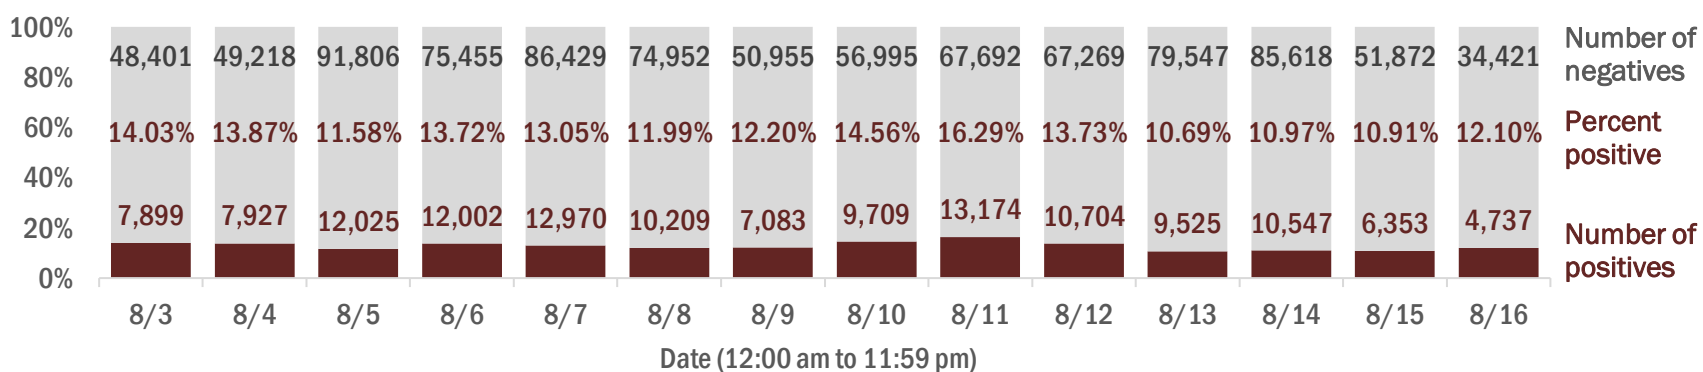

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 10.69% to 16.29% over the past 2 weeks and was 12.10% yesterday.

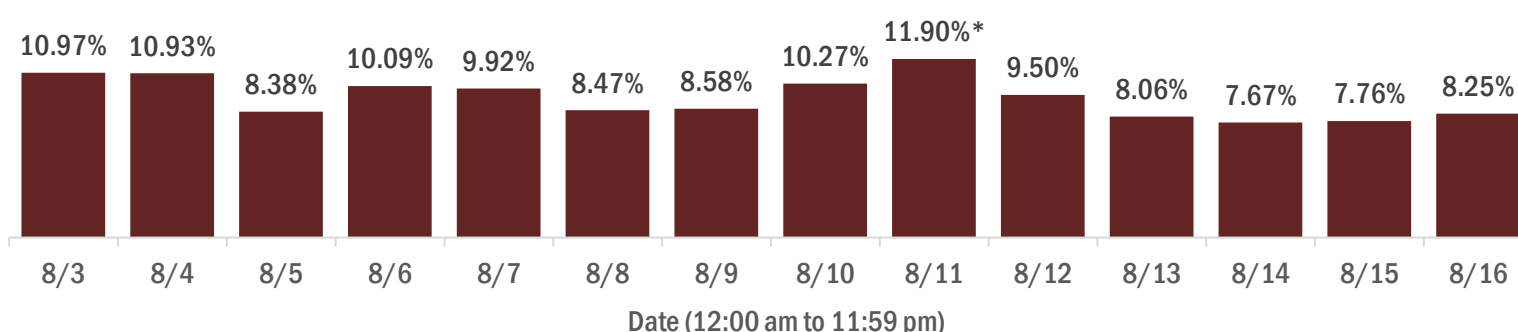

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 7.67% to 11.90% over the past 2 weeks and was 8.25% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* Includes a one-time historical data submission from a laboratory newly enrolled in the Department's electronic laboratory reporting (ELR) process. The percent positivity on 8/11 excluding the historical data submission was 9.35%.

COVID-19: characteristics of 570,024 Florida resident cases

Data through Aug 16, 2020 verified as of Aug 17, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Aug 16, 2020 verified as of Aug 17, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Aug 16, 2020 verified as of Aug 17, 2020 at 09:25 AM

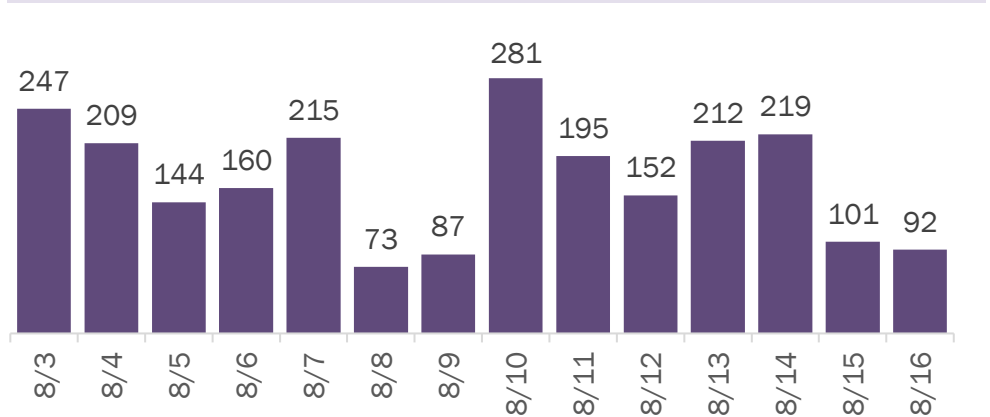

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Aug 16, 2020 verified as of Aug 17, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
