

COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 7, 2020 verified as of Oct 8, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	286,855
Total persons of high, medium, or unknown risk	283,214
High/medium/unknown risk still being monitored	21,546

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	5,475,395	21,590
Positive	717,148	8,865
Negative	4,751,065	12,680
Inconclusive	7,182	45

Cases: people with positive PCR or antigen test result

Total cases	726,013
Florida residents	717,148
Non-Florida residents	8,865

Type of testing	
Florida residents	717,148
Positive by BPHL/CDC	25,590
Positive by commercial/hospital lab	691,558
PCR positive	697,188
Antigen positive	19,960
Non-Florida residents	8,865
Positive by BPHL/CDC	261
Positive by commercial/hospital lab	8,604
PCR positive	8,321
Antigen positive	544

Characteristics	
Florida residents hospitalized	45,483
Florida resident deaths	15,068
Non-Florida resident deaths	186

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents

Traveled	6,092
Contact with a known case	265,465
Traveled and contact with a known case	6,455
Neither	439,136
No travel and no contact	92,989
Travel is unknown	243,465
Contact is unknown	188,462
Contact is pending	138,414

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

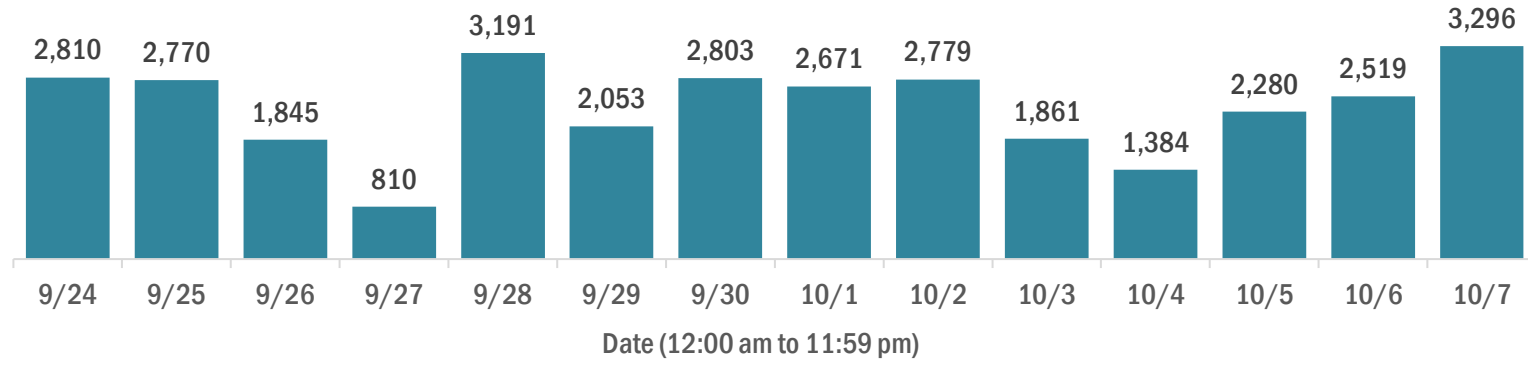

COVID-19: cases and laboratory testing over time

Data through Oct 7, 2020 verified as of Oct 8, 2020 at 09:25 AM

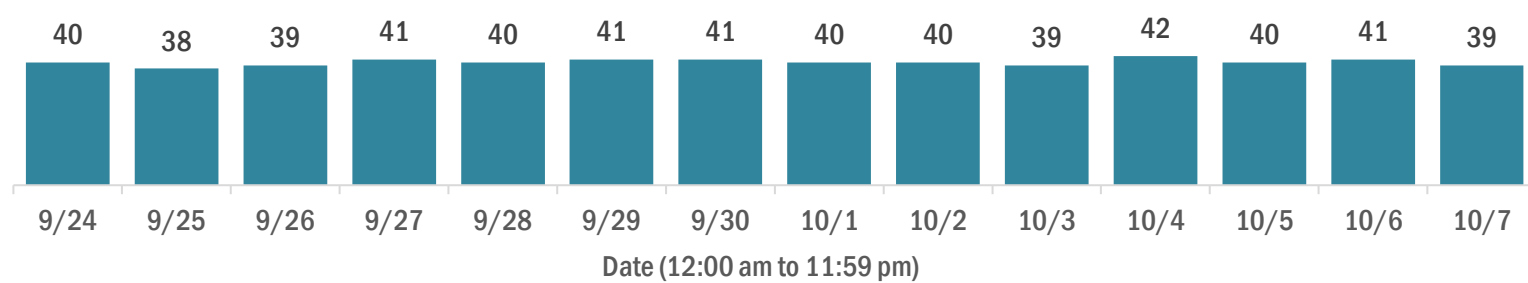

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

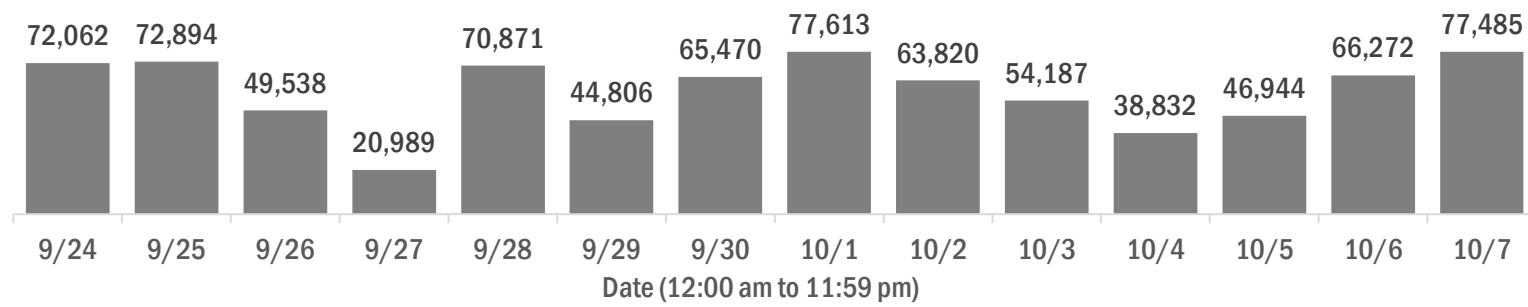

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

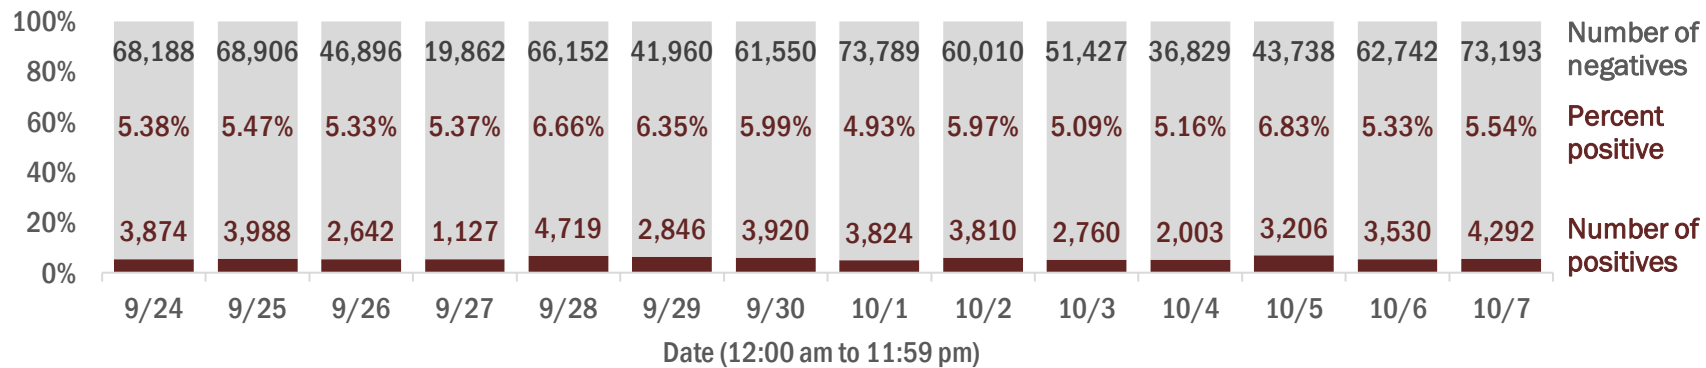

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.93% to 6.83% over the past 2 weeks and was 5.54% yesterday.

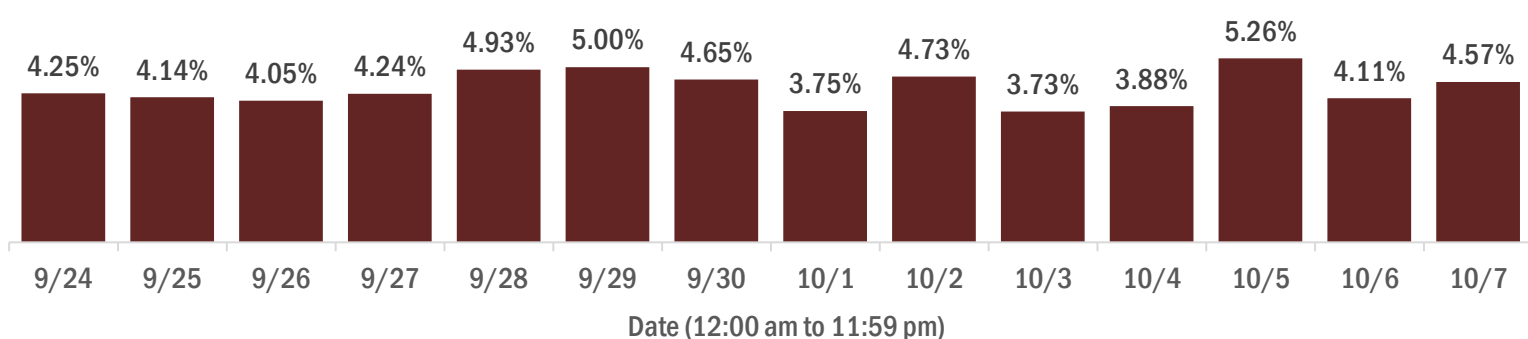

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.73% to 5.26% over the past 2 weeks and was 4.57% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 717,148 Florida resident cases

Data through Oct 7, 2020 verified as of Oct 8, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Oct 7, 2020 verified as of Oct 8, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 7, 2020 verified as of Oct 8, 2020 at 09:25 AM

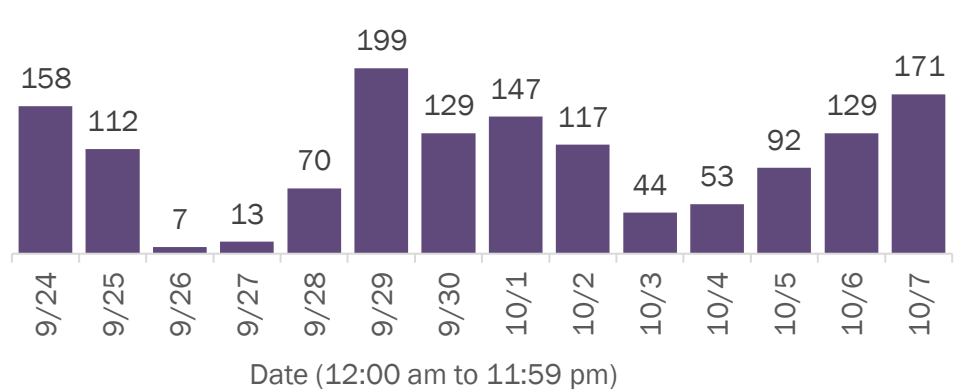

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 7, 2020 verified as of Oct 8, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 7, 2020 verified as of Oct 8, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
