

# COVID-19: summary of persons monitored, persons tested, and cases

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

<b>Total reports</b>	<b>297,768</b>
Total persons of high, medium, or unknown risk	294,129
High/medium/unknown risk still being monitored	22,471

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	5,578,731	21,885
Positive	729,591	9,158
Negative	4,841,994	12,681
Inconclusive	7,146	46

Cases: people with positive PCR or antigen test result

<b>Total cases</b>	<b>738,749</b>
Florida residents	729,591
Non-Florida residents	9,158

<b>Type of testing</b>	
Florida residents	729,591
Positive by BPHL/CDC	25,984
Positive by commercial/hospital lab	703,607
PCR positive	708,010
Antigen positive	21,581
Non-Florida residents	9,158
Positive by BPHL/CDC	273
Positive by commercial/hospital lab	8,885
PCR positive	8,549
Antigen positive	609

<b>Characteristics</b>	
Florida residents hospitalized	46,225
Florida resident deaths	15,531
Non-Florida resident deaths	191

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at [www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm](http://www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm).

<b>Risk factors for Florida residents</b>	
Traveled	6,271
Contact with a known case	271,057
Traveled and contact with a known case	6,692
Neither	445,571
No travel and no contact	95,378
Travel is unknown	244,953
Contact is unknown	192,188
Contact is pending	138,294

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

# COVID-19: cases and laboratory testing over time

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

## Cases in Florida residents per day for the past 2 weeks

### Number of cases per day

### 7-day average number of cases

### Median age of cases by day

## Laboratory testing for Florida residents over the past 2 weeks

### Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

### Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.43% to 9.23% over the past 2 weeks and was 6.26% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

# COVID-19: cases and laboratory testing over time

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

## Laboratory testing for Florida residents over the past 2 weeks

### Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.43% to 7.85% over the past 2 weeks and was 4.99% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

\* A data dump of previously reported lab results prevented the reporting system from normal processing of lab results on Oct 9, causing an inaccurate representation of data for Oct 9 and 10. The most accurate way to interpret percent positivity for these 2 days is as a 2-day average, which was 4.21%.

### 7-day average percent positivity for new cases in Florida residents

# COVID-19: characteristics of 729,591 Florida resident cases

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

# COVID-19: testing by laboratory

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

# COVID-19: testing by laboratory

Data through Oct 12, 2020 verified as of Oct 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
