COVID-19: cases and laboratory testing over time

Data through Oct 13, 2020 verified as of Oct 14, 2020 at 09:25 AM

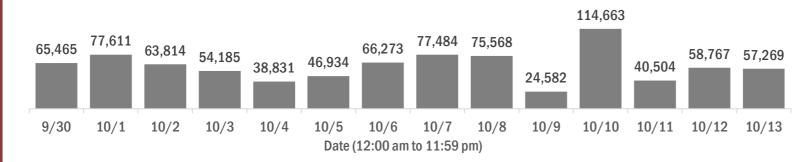

Data in this report are provisional and subject to change.

Laboratory testing for Florida residents over the past 2 weeks

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

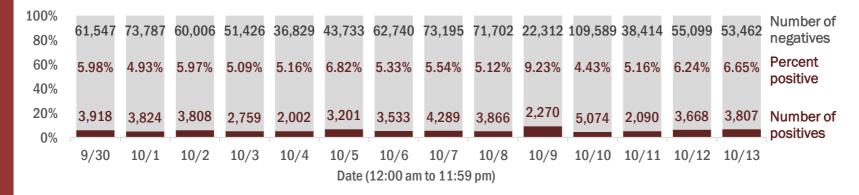

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.43% to 9.23% over the past 2 weeks and was 6.65% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day.

People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

COVID-19: cases and laboratory testing over time

Data through Oct 13, 2020 verified as of Oct 14, 2020 at 09:25 AM

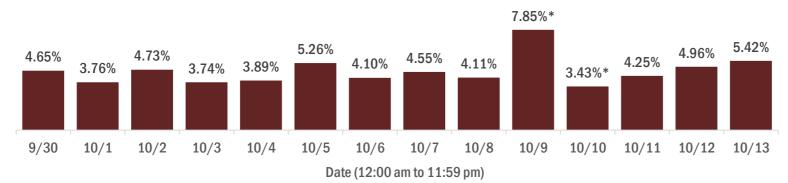

Data in this report are provisional and subject to change.

Laboratory testing for Florida residents over the past 2 weeks

Percent positivity for new cases in Florida residents

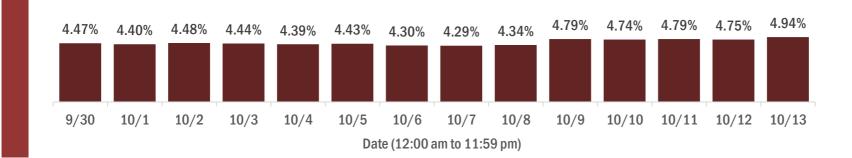

The percent of positive results ranged from 3.43% to 7.85% over the past 2 weeks and was 5.42% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* A data dump of previously reported lab results prevented the reporting system from normal processing of lab results on Oct 9, causing an inaccurate representation of data for Oct 9 and 10. The most accurate way to interpret percent positivity for these 2 days is as a 2-day average, which was 4.21%.

7-day average percent positivity for new cases in Florida residents

Data through Oct 13, 2020 verified as of Oct 14, 2020 at 09:25 AM
