

COVID-19: summary of cases and monitoring

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Cases: people with positive PCR or antigen test result

Total cases	800,216
Florida residents	789,714
Non-Florida residents	10,502
Type of testing	
Florida residents	789,714
Positive by BPHL/CDC	29,222
Positive by commercial/hospital lab	760,492
PCR positive	755,749
Antigen positive	33,965
Non-Florida residents	10,502
Positive by BPHL/CDC	303
Positive by commercial/hospital lab	10,199
PCR positive	9,506
Antigen positive	996
Characteristics	
Florida residents hospitalized	49,185
Florida resident deaths	16,720
Non-Florida resident deaths	207

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Cases: people with positive PCR or antigen test result

Risk factors for Florida residents	
Traveled	7,123
Contact with a known case	299,349
Traveled and contact with a known case	7,874
Neither	475,368
No travel and no contact	105,717
Travel is unknown	254,921
Contact is unknown	206,267
Contact is pending	142,456

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

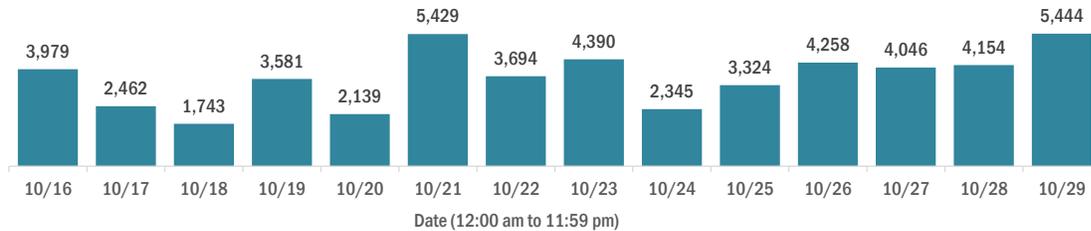

COVID-19: summary of laboratory testing

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

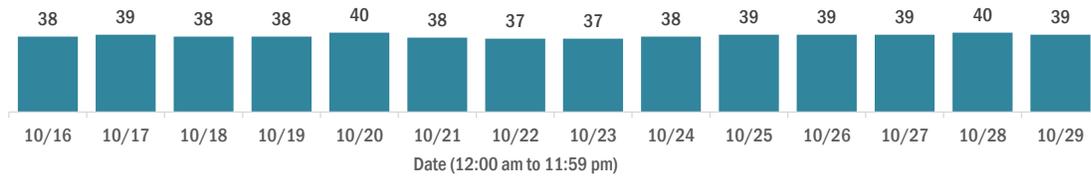

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

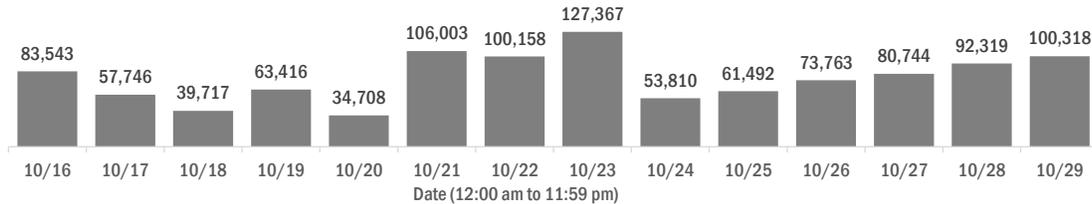

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

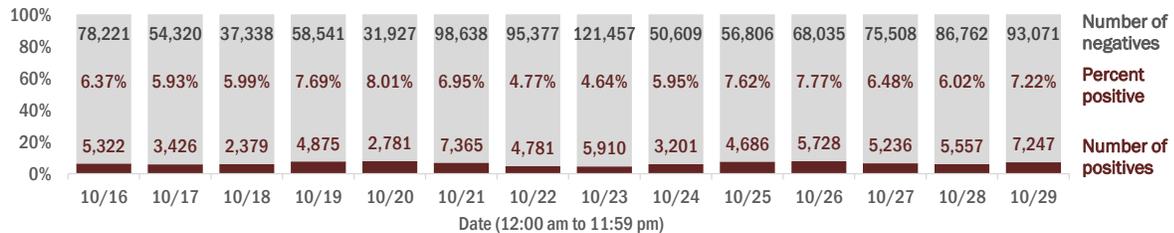

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 4.64% to 8.01% over the past 2 weeks and was 7.22% yesterday.

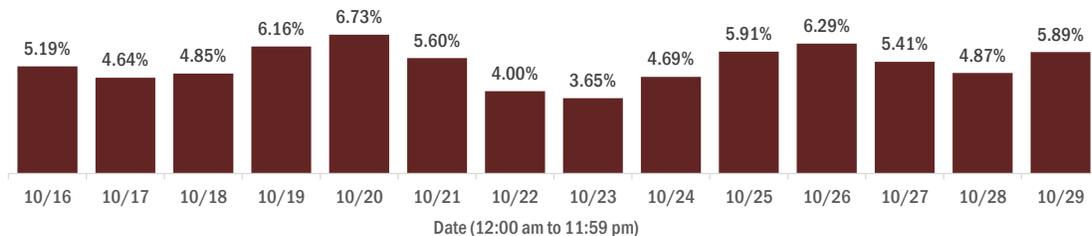

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.65% to 6.73% over the past 2 weeks and was 5.89% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 789,714 Florida resident cases

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: additional surveillance information

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Statewide emergency department (ED) chief complaint and admission data

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 211 of 211 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

COVID-19: testing by laboratory

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Oct 29, 2020 verified as of Oct 30, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
