

COVID-19: summary of persons monitored, persons tested, and cases

Data through Sep 10, 2020 verified as of Sep 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

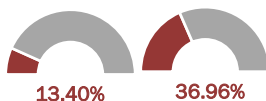

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

Total reports	226,476
Total persons of high, medium, or unknown risk	222,820
High/medium/unknown risk still being monitored	16,588

Persons tested: Includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,863,570	20,210
Positive	650,922	7,459
Negative	4,205,652	12,723
Inconclusive	6,996	28
Awaiting testing	3,587	30

Cumulative percent positivity (based on positive and negative results from March 1 - present)

Cases: people with positive PCR or antigen test result

Total cases	658,381
Florida residents	650,922
Non-Florida residents	7,459
Type of testing	
Florida residents	650,922
Positive by BPHL/CDC	23,289
Positive by commercial/hospital lab	627,633
PCR positive	639,124
Antigen positive	11,798
Non-Florida residents	7,459
Positive by BPHL/CDC	248
Positive by commercial/hospital lab	7,211
PCR positive	7,113
Antigen positive	346

Characteristics

Florida residents hospitalized	41,021
Florida resident deaths	12,502
Non-Florida resident deaths	156

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents

Traveled	5,082
Contact with a known case	225,317
Traveled and contact with a known case	5,400
Neither	415,123
No travel and no contact	79,305
Travel is unknown	245,979
Contact is unknown	158,049
Contact is pending	160,468

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

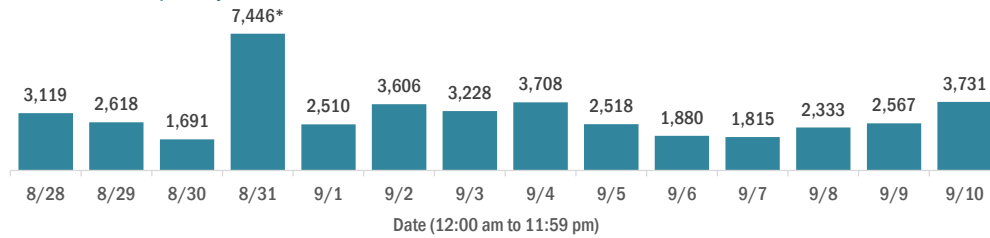

COVID-19: cases and laboratory testing over time

Data through Sep 10, 2020 verified as of Sep 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

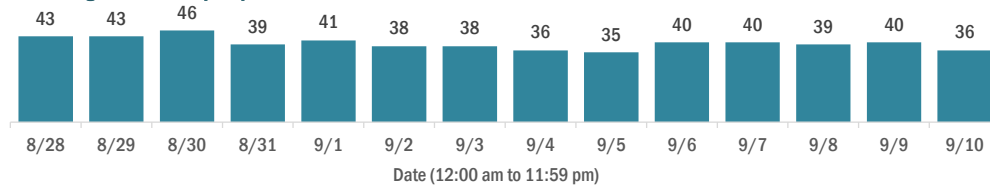

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

* Includes a one-time historical data submission of 3,797 cases from a large laboratory. The number of new cases on 8/31 excluding the historical data submission was 3,649. See graph on next page for excess cases by specimen collection date.

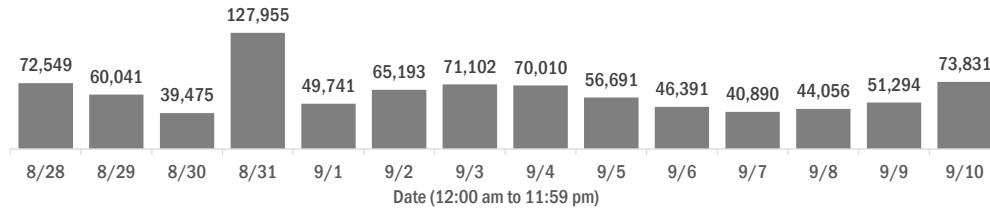

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

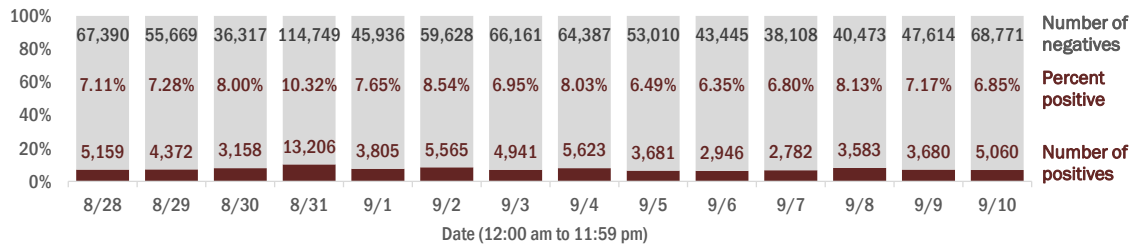

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 6.35% to 10.32% over the past 2 weeks and was 6.85% yesterday.

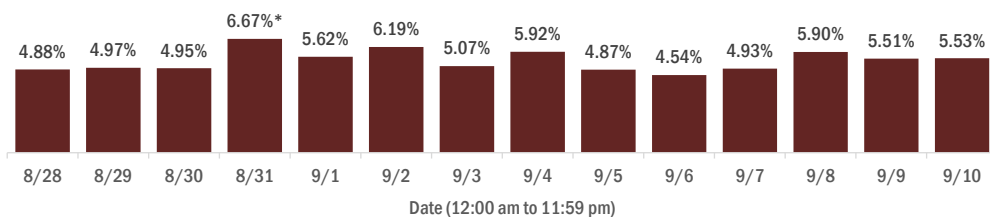

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.54% to 6.67% over the past 2 weeks and was 5.53% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* Includes a one-time historical data submission from a large laboratory. The percent positivity on 8/31 excluding the historical data submission was 5.58%. See

COVID-19: testing by laboratory

Data through Sep 10, 2020 verified as of Sep 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 10, 2020 verified as of Sep 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 10, 2020 verified as of Sep 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 10, 2020 verified as of Sep 11, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 10, 2020 verified as of Sep 11, 2020 at 09:25 AM

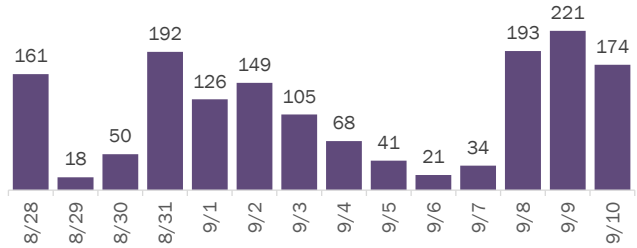

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
