

COVID-19: summary of persons monitored, persons tested, and cases

Data through Sep 12, 2020 verified as of Sep 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	230,836
Total persons of high, medium, or unknown risk	227,182
High/medium/unknown risk still being monitored	17,350

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,910,702	20,272
Positive	656,485	7,509
Negative	4,247,200	12,736
Inconclusive	7,017	27
Awaiting testing	3,664	32

Cumulative percent positivity (based on positive and negative results from March 1 - present)

Cases: people with positive PCR or antigen test result

Total cases	663,994
Florida residents	656,485
Non-Florida residents	7,509

Type of testing	
Florida residents	656,485
Positive by BPHL/CDC	23,558
Positive by commercial/hospital lab	632,927
PCR positive	644,180
Antigen positive	12,305
Non-Florida residents	7,509
Positive by BPHL/CDC	249
Positive by commercial/hospital lab	7,260
PCR positive	7,155
Antigen positive	354

Characteristics	
Florida residents hospitalized	41,297
Florida resident deaths	12,608
Non-Florida resident deaths	156

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	5,149
Contact with a known case	228,898
Traveled and contact with a known case	5,463
Neither	416,975
No travel and no contact	80,124
Travel is unknown	246,172
Contact is unknown	159,771
Contact is pending	159,659

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

COVID-19: cases and laboratory testing over time

Data through Sep 12, 2020 verified as of Sep 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

* Includes a one-time historical data submission of 3,797 cases from a large laboratory. The number of new cases on 8/31 excluding the historical data submission was 3,647. See graph on next page for excess cases by specimen collection date.

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 5.56% to 10.32% over the past 2 weeks and was 5.56% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 4.26% to 6.67% over the past 2 weeks and was 4.26% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* Includes a one-time historical data submission from a large laboratory. The percent positivity on 8/31 excluding the historical data submission was 5.59%. See graph on next page for excess cases by specimen collection date.

COVID-19: cases and laboratory testing over time

Data through Sep 12, 2020 verified as of Sep 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Excess cases counted on 8/31 by specimen collection date

Number of cases per day

On 8/31, the Department received a one-time historical data submission from a large laboratory resulting in 3,797 cases being created from specimens collected before 8/27. Below is the number of cases by the earliest specimen collection date.

COVID-19: characteristics of 656,485 Florida resident cases

Data through Sep 12, 2020 verified as of Sep 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Sep 12, 2020 verified as of Sep 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

Data through Sep 12, 2020 verified as of Sep 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 12, 2020 verified as of Sep 13, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
