

COVID-19: summary of persons monitored, persons tested, and cases

Data through Sep 14, 2020 verified as of Sep 15, 2020 at 11:02 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

Total reports	234,066
Total persons of high, medium, or unknown risk	230,412
High/medium/unknown risk still being monitored	17,462

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,955,265	20,661
Positive	660,946	7,900
Negative	4,287,279	12,722
Inconclusive	7,040	39
Awaiting testing	3,725	35

Cumulative percent positivity (based on positive and negative results from March 1 - present)

Cases: people with positive PCR or antigen test result

Total cases	668,846
Florida residents	660,946
Non-Florida residents	7,900

Type of testing	
Florida residents	660,946
Positive by BPHL/CDC	23,571
Positive by commercial/hospital lab	637,375
PCR positive	648,279
Antigen positive	12,667
Non-Florida residents	7,900
Positive by BPHL/CDC	249
Positive by commercial/hospital lab	7,651
PCR positive	7,537
Antigen positive	363

Characteristics	
Florida residents hospitalized	41,654
Florida resident deaths	12,787
Non-Florida resident deaths	159

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	5,239
Contact with a known case	232,035
Traveled and contact with a known case	5,534
Neither	418,138
No travel and no contact	81,147
Travel is unknown	245,296
Contact is unknown	161,876
Contact is pending	157,595

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

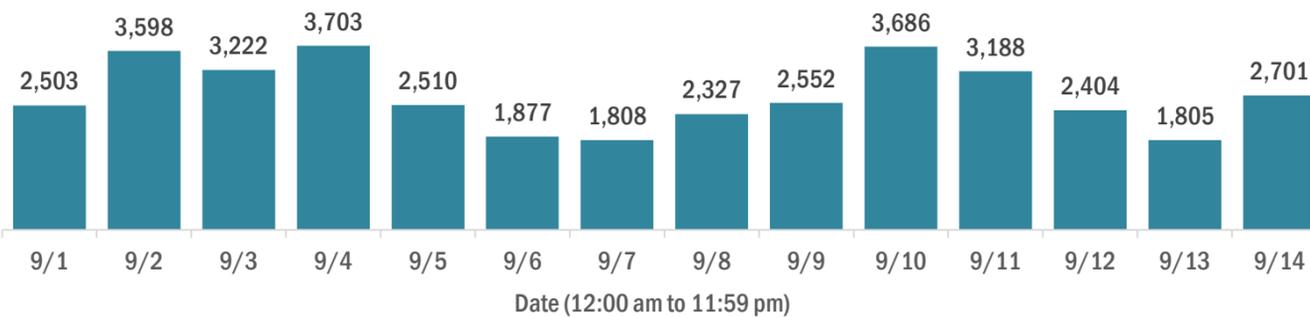

COVID-19: cases and laboratory testing over time

Data through Sep 14, 2020 verified as of Sep 15, 2020 at 11:02 AM

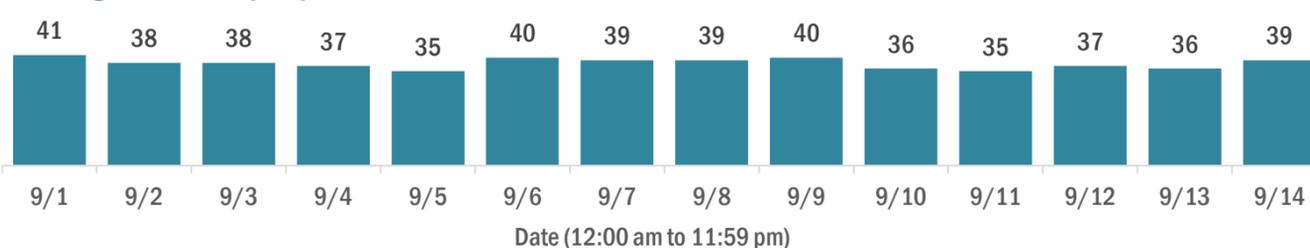

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

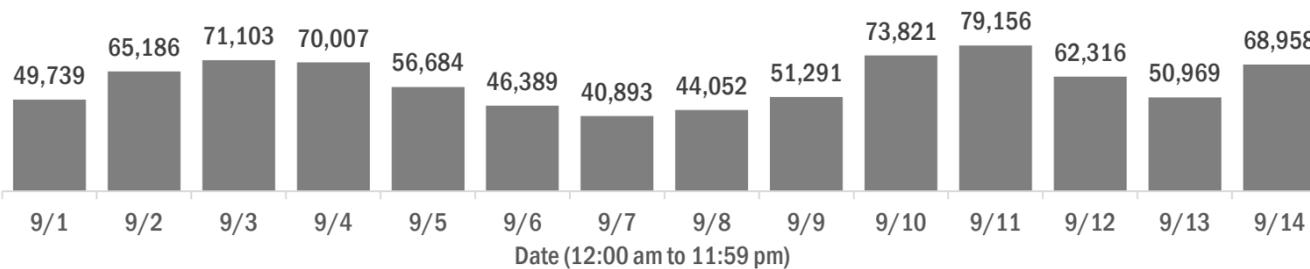

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

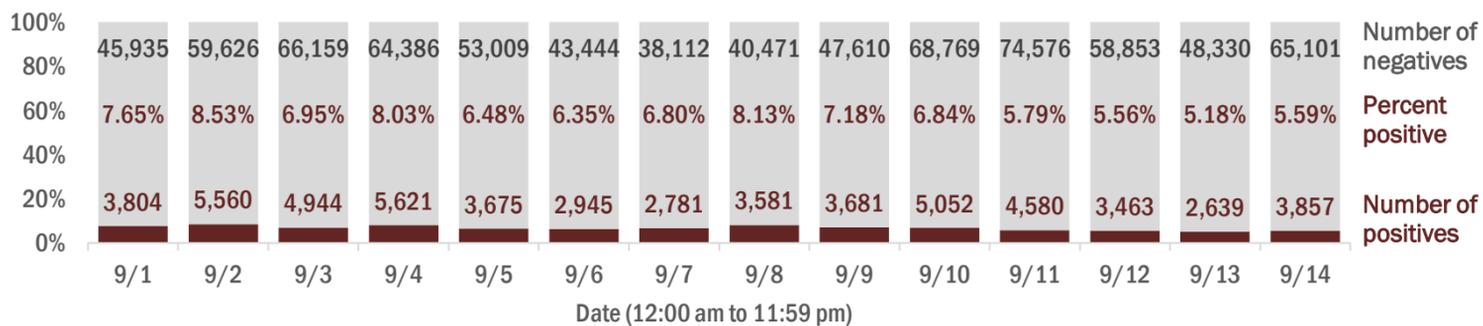

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 5.18% to 8.53% over the past 2 weeks and was 5.59% yesterday.

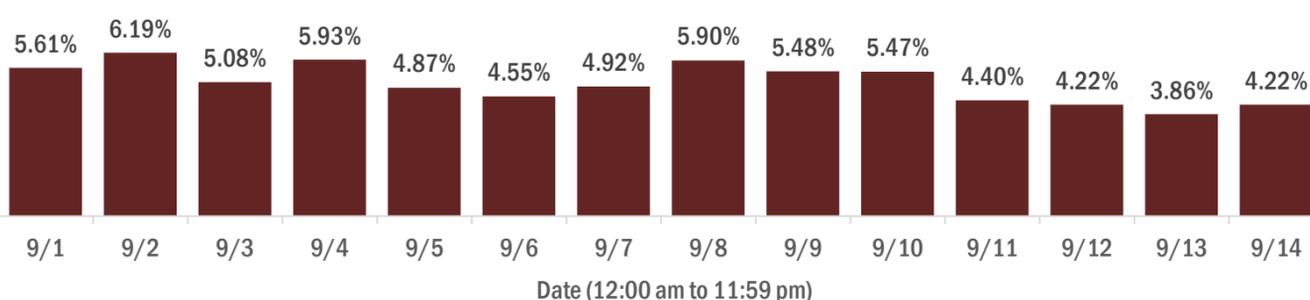

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 3.86% to 6.19% over the past 2 weeks and was 4.22% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 660,946 Florida resident cases

Data through Sep 14, 2020 verified as of Sep 15, 2020 at 11:02 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Sep 14, 2020 verified as of Sep 15, 2020 at 11:02 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 14, 2020 verified as of Sep 15, 2020 at 11:02 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Sep 14, 2020 verified as of Sep 15, 2020 at 11:02 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
