

COVID-19: summary of persons being monitored, persons tested, and cases

Data through Jul 17, 2020 verified as of Jul 18, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	109,785
Total persons of high, medium, or unknown risk	106,100
High/medium/unknown risk still being monitored	15,022

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

Total tested	2,935,521
Positive	337,569
Negative	2,594,419
Inconclusive	3,533
Awaiting testing	2,320

Cases: people with positive PCR or antigen test result

Total cases	337,569
Florida residents	333,201
Non-Florida residents	4,368

Type of testing	
Florida residents	333,201
Positive by BPHL/CDC	11,549
Positive by commercial/hospital lab	321,652
Non-Florida residents	
Positive by BPHL/CDC	176
Positive by commercial/hospital lab	4,192

Characteristics	
Florida residents hospitalized	20,632
Florida resident deaths	4,895
Change in deaths since previous report	+90
Non-Florida resident deaths	107

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	3,111
Contact with a known case	88,969
Traveled and contact with a known case	3,034
Neither	238,087
No travel and no contact	33,030
Travel is unknown	170,539
Contact is unknown	53,098
Contact is pending	147,973

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

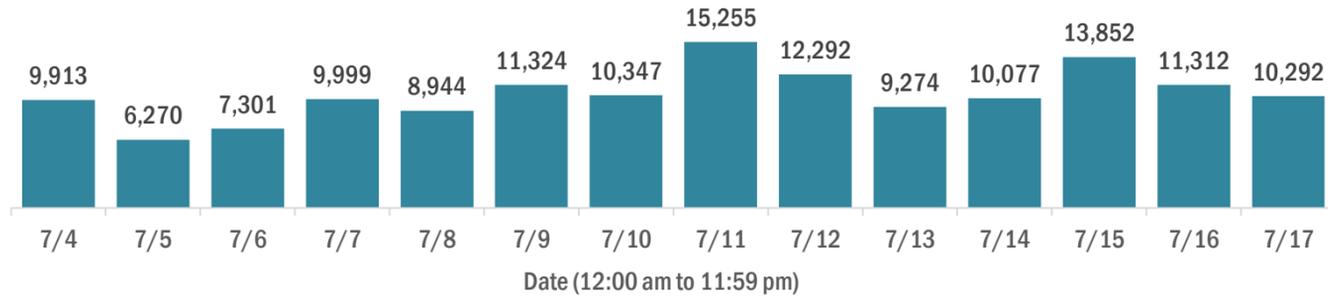

COVID-19: cases and laboratory testing over time

Data through Jul 17, 2020 verified as of Jul 18, 2020 at 09:25 AM

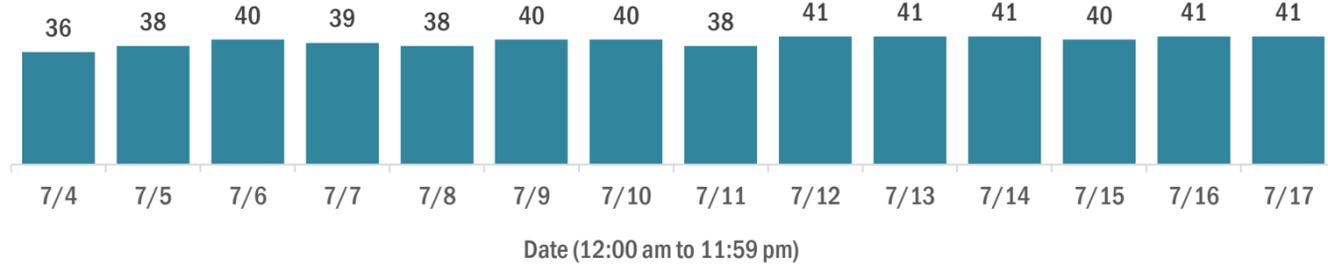

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

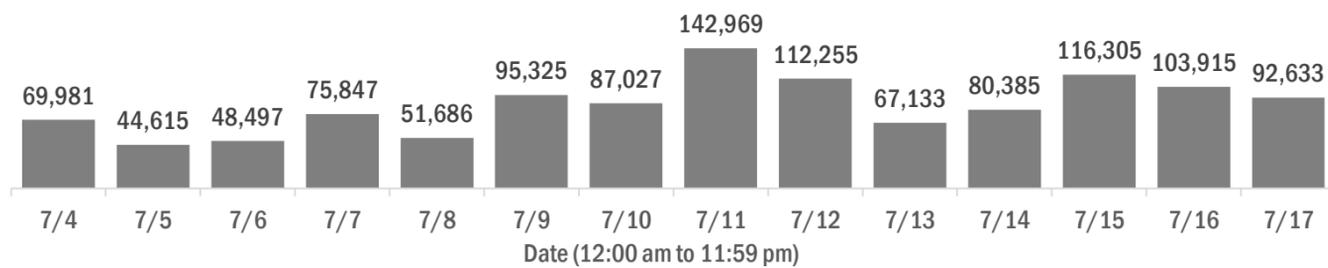

Median age of cases by day

Laboratory testing for Florida residents and non-Florida residents over the past 2 weeks

Number of people tested per day

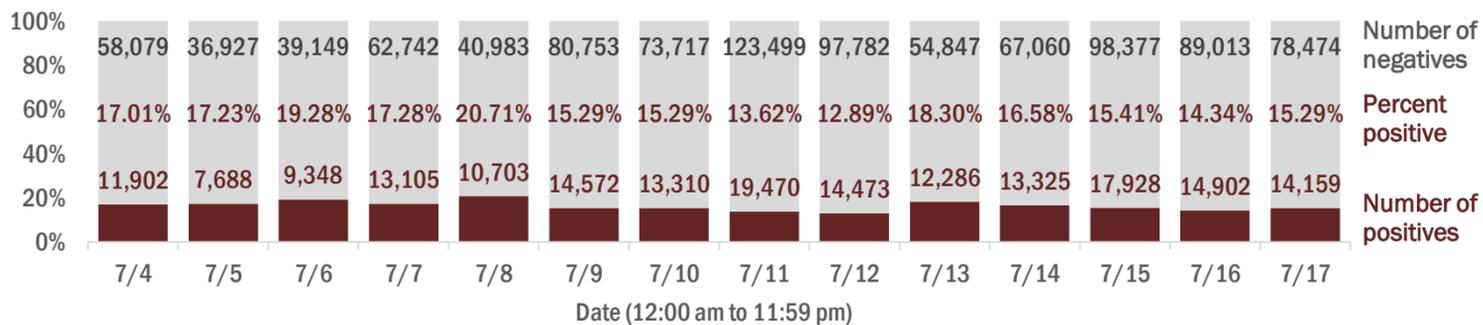

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of positive labs

The percent of positive results ranged from 12.89% to 20.71% over the past 2 weeks and was 15.29% yesterday.

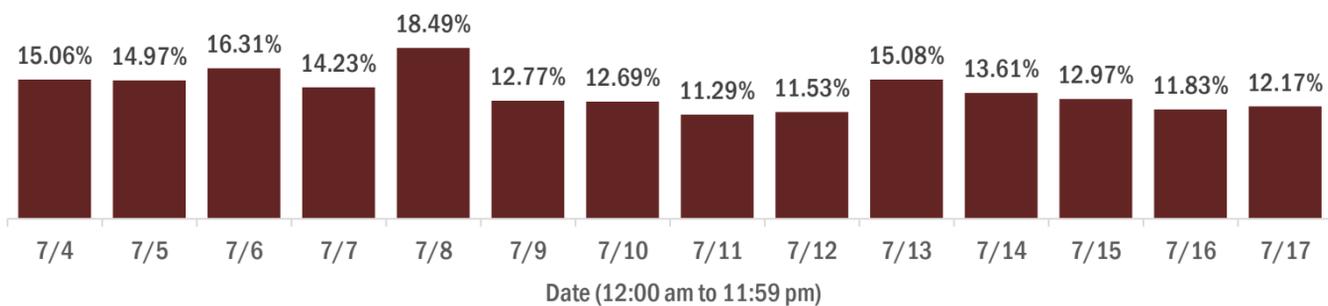

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases

The percent of positive results ranged from 11.29% to 18.49% over the past 2 weeks and was 12.17% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 333,201 Florida resident cases

Data through Jul 17, 2020 verified as of Jul 18, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Jul 17, 2020 verified as of Jul 18, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
