Data in this report are provisional and subject to change.

Laboratory testing for Florida residents and non-Florida residents over the past 2 weeks

Number of people tested per day

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of positive labs

The percent of positive results ranged from 13.50% to 18.15% over the past 2 weeks and was 16.25% yesterday.

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases

The percent of positive results ranged from 10.56% to 14.80% over the past 2 weeks and was 12.26% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.
