

COVID-19: summary of persons being monitored, persons tested, and cases

Data through Jul 30, 2020 verified as of Jul 31, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of an airline/ship contact investigation

Total reports	142,223
Total persons of high, medium, or unknown risk	138,543
High/medium/unknown risk still being monitored	14,572

Persons tested: Includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

Total tested	3,633,393
Positive	470,386
Negative	3,157,702
Inconclusive	5,305
Awaiting testing	3,363

Cases: people with positive PCR or antigen test result

Total cases	470,386
Florida residents	465,030
Non-Florida residents	5,356

Type of testing	
Florida residents	465,030
Positive by BPHL/CDC	15,033
Positive by commercial/hospital lab	449,997
Non-Florida residents	5,356
Positive by BPHL/CDC	199
Positive by commercial/hospital lab	5,157

Characteristics	
Florida residents hospitalized	26,533
Florida resident deaths	6,843
Change in deaths since previous report	+257
Non-Florida resident deaths	123

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	3,645
Contact with a known case	126,690
Traveled and contact with a known case	3,648
Neither	331,047
No travel and no contact	46,845
Travel is unknown	232,393
Contact is unknown	82,394
Contact is pending	193,588

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

COVID-19: cases and laboratory testing over time

Data through Jul 30, 2020 verified as of Jul 31, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

Median age of cases by day

Laboratory testing for Florida residents and non-Florida residents over the past 2 weeks

Number of people tested per day

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of positive labs

The percent of positive results ranged from 13.50% to 18.14% over the past 2 weeks and was 13.99% yesterday.

These counts include the number of people for whom the department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases

The percent of positive results ranged from 10.57% to 14.82% over the past 2 weeks and was 10.57% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

COVID-19: characteristics of 465,030 Florida resident cases

Data through Jul 30, 2020 verified as of Jul 31, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: additional surveillance information

Data through Jul 30, 2020 verified as of Jul 31, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Statewide emergency department (ED) chief complaint and admission data

Daily percent of ED visits statewide that mention cough by age group

The Electronic Surveillance System for the Early Notification of Community-Based Epidemics (ESSENCE-FL) includes chief complaint data from 211 of 212 Florida EDs. Data are transmitted electronically to ESSENCE-FL daily or hourly.

COVID-19: All persons with tests reported

Data through Jul 30, 2020 verified as of Jul 31, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The table below includes persons with laboratory results that the Department of Health has received electronically or by mail/fax for Florida residents and non-Florida residents.

County	Awaiting testing	Inconclusive	Negative	Positive	Percent positive	Total tested

COVID-19: testing by laboratory

Data through Jul 30, 2020 verified as of Jul 31, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
