

COVID-19: summary of persons monitored, persons tested, and cases

Data through Aug 14, 2020 verified as of Aug 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Monitored persons: people the Florida Department of Health was notified of for possible monitoring because they are a contact of a case, traveled from China, or were identified by the Centers for Disease Control and Prevention (CDC) as a part of a airline/ship contact investigation

Total reports	173,026
Total persons of high, medium, or unknown risk	169,357
High/medium/unknown risk still being monitored	12,505

Persons tested: includes PCR and antigen test results received by the Department of Health from the state public health laboratory (BPHL), as well as commercial and hospital laboratories

	Florida residents	Non-Florida residents
Total tested	4,190,626	18,749
Positive	563,628	6,009
Negative	3,620,370	12,718
Inconclusive	6,628	22
Awaiting testing	3,756	34

Percent positivity
(based on positive and negative results)

Cases: people with positive PCR or antigen test result

Total cases	569,637
Florida residents	563,628
Non-Florida residents	6,009

Type of testing	
Florida residents	563,628
Positive by BPHL/CDC	19,906
Positive by commercial/hospital lab	543,722
PCR positive	558,171
Antigen positive	5,457
Non-Florida residents	6,009
Positive by BPHL/CDC	213
Positive by commercial/hospital lab	5,796
PCR positive	5,783
Antigen positive	226

Characteristics	
Florida residents hospitalized	33,661
Florida resident deaths	9,345
Non-Florida resident deaths	135

Hospitalized counts include anyone who was hospitalized at some point during their illness. It does not reflect the number of people currently hospitalized.

More information on deaths identified through death certificate data is available on the National Center for Health Statistics website at www.cdc.gov/nchs/nvss/vsrr/COVID19/index.htm.

Risk factors for Florida residents	
Traveled	4,232
Contact with a known case	174,264
Traveled and contact with a known case	4,395
Neither	380,737
No travel and no contact	63,379
Travel is unknown	245,538
Contact is unknown	122,157
Contact is pending	181,016

Travel can be unknown and contact can be unknown or pending for the same case, these numbers will sum to more than the "neither" total.

COVID-19: cases and laboratory testing over time

Data through Aug 14, 2020 verified as of Aug 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

Cases in Florida residents per day for the past 2 weeks

Number of cases per day

* Includes a one-time historical data submission from a laboratory newly enrolled in the Department's electronic laboratory reporting (ELR) process. The number of new cases on 8/11 excluding the historical data submission was 5,218.

Median age of cases by day

Laboratory testing for Florida residents over the past 2 weeks

Number of Florida residents tested per day

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received.

Number and percent of Florida residents with positive test results

The percent of positive results ranged from 10.69% to 16.29% over the past 2 weeks and was 10.97% yesterday.

These counts include the number of people for whom the Department received PCR or antigen laboratory results by day. People tested on multiple days will be included for each day a new result was received. A person is only counted once for each day they are tested, regardless of whether multiple specimens are tested or multiple results are received. If a person has a positive specimen and a negative specimen in the same day, only the positive result is counted.

Percent positivity for new cases in Florida residents

The percent of positive results ranged from 7.71% to 11.90% over the past 2 weeks and was 7.71% yesterday.

This percent is the number of people who test PCR- or antigen-positive for the first time divided by all the people tested that day, excluding people who have previously tested positive.

* Includes a one-time historical data submission from a laboratory newly enrolled in the Department's electronic laboratory reporting (ELR) process. The percent positivity on 8/11 excluding the historical data submission was 9.35%.

COVID-19: characteristics of 563,628 Florida resident cases

Data through Aug 14, 2020 verified as of Aug 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

COVID-19: testing by laboratory

Data through Aug 14, 2020 verified as of Aug 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Aug 14, 2020 verified as of Aug 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**

COVID-19: testing by laboratory

Data through Aug 14, 2020 verified as of Aug 15, 2020 at 09:25 AM

Data in this report are provisional and subject to change.

The numbers in the table below represent the number of Florida and non-Florida residents for whom test results were received by the Department of Health. A person can be tested by more than one laboratory and can have both positive and negative results. **Therefore, the sum of the numbers in each column will be larger than the total number of people tested.**
