For this webinar, your microphones have been muted. Please include all questions in the chat.

Hello! We will begin 5 minutes after the start time to allow time for all participants to join the briefing. Please note, for this webinar, your microphones have been muted.
Hello, ladies and gentlemen and welcome to the State of Florida, Division of Emergency Management's Hurricane Nicole (DR-4680) Applicant Briefing for our Local Governments and State Agencies. We are here today to review FEMA’s Public Assistance program’s application procedures, administrative requirements, funding, and program eligibility criteria.

My name is Rebecca Hart, and I am the Education and Training Administrator for the Recovery Bureau here at the Florida Division of Emergency Management (FDEM). We also have subject matter experts in disaster recovery monitoring the chat, so please include all questions there and they will answer them as they come in.

A copy of this presentation and the recording is uploaded to FloridaPA.org. We will refer to additional resources throughout this presentation. We have compiled all these links and a helpful list of acronyms for you to reference in the pdf: Hurricane Nicole (DR-4680) State Applicant Briefing Additional Resources which is also uploaded to Florida PA and linked for you in the chat.
First, let’s review Hurricane Nicole’s incident period.

When a Major Disaster Declaration is signed by the president, FEMA specifies an “Incident Period.” This establishes the date range for damage or losses to be eligible for federal disaster assistance.

You, as the applicant, are responsible for showing that the work was required in response to the declared incident or to address damage caused by the declared incident.

For Hurricane Nicole, the incident is November 7, 2022, until November 30, 2022, and

The Declaration date is December 13, 2022
This map shows DR-4680’s Florida Disaster Declaration for Hurricane Nicole and its FEMA disaster designations as of December 13, 2022. We will go over the designated areas for each category of work next.

*Map image: https://www.fema.gov/disaster/4680/designated-areas*
The counties listed here have been declared for Categories A-G including Direct Federal Assistance at a 75/25 cost share split with a 75% Federal Cost Share, and a 25% non-Federal Share.
To be eligible for assistance, damages must have occurred within the declared counties you see listed on the screen.

Additional designations continue to be made and can be made if requested by the state and justified by further damage assessments.

DR-4680 Designated Areas: https://www.fema.gov/disaster/4680/designated-areas
The counties listed on this slide have been declared only for Category B Emergency Protective Measures including Direct Federal Assistance at a 75/25 cost share split with a 75% Federal Cost Share, and a 25% non-Federal Share.

As a reminder, to be eligible for assistance, damages must have occurred within the declared counties you see listed on the screen.

Additional designations continue to be made and can be made at a later date if requested by the state and justified by further damage assessments.

DR-4680 Designated Areas: https://www.fema.gov/disaster/4680/designated-areas
Direct Federal Assistance (DFA)

When the impact of an incident is so severe that the State and local governments lack the capability to perform or contract eligible Emergency Work, the Recipient (State) may request the Federal government provide assistance directly. FEMA issues a “Mission Assignment” to task the work and refers to it as Direct Federal Assistance (DFA). DFA has the same cost-share provisions applicable to the declaration.

Direct Federal Assistance or DFA is when the impact of an incident is so severe that the State and local governments lack the capability to perform or contract eligible Emergency Work, then the Recipient may request that the Federal government provide this assistance directly. FEMA may task another Federal agency to perform or contract the work provided it is an eligible activity, unless the work falls under the authority of another Federal agency. FEMA issues a “Mission Assignment” to task the work and refers to it as Direct Federal Assistance (DFA). DFA has the same cost-share provisions applicable to the declaration.
Let's go over some important dates:

**The incident start and end dates:** Damage or losses must have occurred between November 7 and November 30 to be eligible for federal disaster assistance.

**The presidential declaration date of** December 13th is the benchmark for the submission of Requests for Public Assistance (RPAs). The RPA for the original 10 counties declared for Categories A-G needs to be submitted by **January 11, 2023.**

**On December 22, 2022 FEMA issued an Amendment to DR-4680 and** an additional 51 counties were designated to be included in the major disaster declaration. As such, the RPA deadline for those 51 counties to claim Category B work is **January 20, 2023.**

44 C.F.R. § 206.32(f); and, PAPPG, v4 (2020). Chapter 1. Pre-Award Activities. IV. Presidential Declaration., B. Incident Period.

44 C.F.R. § 206.202(c): You must send Requests to the Regional Administrator within 30 days after designation of the area where the damage occurred.
Public Assistance Overview

The mission of FEMA's Public Assistance Program is to provide assistance to State, Territorial, Tribal, and Local governments, and certain types of private nonprofit organizations so that communities can quickly respond to and recover from major disasters or emergencies declared by the President.

Public Assistance or PA is FEMA’s largest grant program providing funds to assist communities responding to and recovering from major disasters or emergencies declared by the President.

- FEMA – manages the program, provides technical assistance, and approves grants.
- State, or Recipient – educates applicants, works with FEMA to manage the program, and implements and monitors grants awarded.
- "YOU", the Applicant, or Subrecipient – are responsible for identifying the damages, providing documentation, and managing the funded projects.
Throughout the presentation, you will hear us mention the PAPPG or the Public Assistance Program and Policy Guide, version 4. This FEMA document is a reference guide that includes policy and procedures for the PA program. As mentioned previously, the link to this document as well as all other policies mentioned in this briefing is available in the Additional Resources pdf.

*Public Assistance Program and Policy Guide, Version 4*

The FEMA Public Assistance National Workflow details the process steps that take place in the FEMA PA Program. As you look at the slide, you see that You the APPLICANT, the State of Florida the Recipient, and FEMA, ALL have a role in the program delivery process from the start of the Incident which triggers the Pre-Award Activities all the way to the last step, Final Reconciliation & Closeout. The purpose of this slide is to show you everyone’s responsibility as we navigate the FEMA PA program.
This figure focuses on the Applicant’s portion of the PA award process. 
**The Applicant Briefing**: this is what you are attending today. (transition) 
Next, submit your **Request for Public Assistance or RPA** by the deadline for your designated area (transition) 
Then, you will have your **Exploratory Call**: The FEMA Program Delivery Manager or PDMG should initiate the call within 7 days of an Applicant’s assignment to a PDMG. (transition) 
Following that will be your **Recovery Scoping Meeting or RSM**: FEMA will conduct the RSM within 21 days of an Applicant’s assignment to a PDMG.
Once your organization receives notice that your RPA was approved, and you have your Exploratory Call, FEMA will contact you to schedule a Recovery Scoping Meeting (RSM). To help prepare for your RSM, you should compile a list of claims (specified by location) to include:

- Damage Description(s)
- Scope of Work (SOW)
- Nature of Work
- Estimated Cost

You may also want to gather Maintenance Records and your entire Insurance Policy.

Please note, You will have 60 days following your RSM to:
Make claims and identify damages via your Damage Inventory, and Submit your request for an Expedited Project, if desired.

So, be sure to document the date of your RSM so that you don’t miss these important deadlines.
Next, we will discuss program eligibility.
This is the eligibility pyramid, Applicant, Facility, Work and Cost. Please note, you must have all four tiers of this pyramid to be eligible for reimbursement.

That being said, the first step is to determine if you are an eligible Applicant.
Eligible Applicants

- State
- Local governments
  - Declared Counties;
  - Municipalities, cities, towns, boroughs, and townships;
  - Local public authorities;
  - School districts;
  - Agencies or instrumentalities of local governments;
  - Special districts established under State law
- State Agencies
- Certain Private Nonprofit Organizations
- Other State Political sub-divisions

Eligible applicants include:

State
Local governments
State Agencies
Certain Private Nonprofit Organizations
Other State Political sub-divisions
The next step is to determine if you have an eligible facility. As stated previously, you MUST have all four tiers of this pyramid to be eligible for reimbursement.

For example, an eligible applicant [transition 1] that performed eligible work [transition 2] but did not have an eligible facility [transition 3] would be considered [transition 4] ineligible for reimbursement. That facility may be eligible under a different applicant, but this information must be submitted correctly during [transition 5] the RPA enrollment period. [transition 6] This is why it is of utmost importance to know who holds the legal responsibility of your facility.
Facility Eligibility

To be eligible, facilities must:

• Be damaged as a result of the Hurricane Nicole
• Be located within the Presidentially Declared Area
• Be the Legal Responsibility of an eligible Applicant
• Not be under the Authority of another Federal Agency

To be eligible, facilities must

Be damaged as a result of Hurricane Nicole
Be located within the Presidentially Declared Area
Be the Legal Responsibility of an eligible Applicant
**AND** cannot be under the Authority of another Federal Agency such as,
- Army Corps of Engineers or the Federal Highway Administration
Legal Responsibility

Documents that support legal responsibility can include, but are not limited to:

- Deeds;
- Titles;
- Lease agreements (required for leased facilities); and
- Contracts (required for facilities under construction at the time of the incident).
Next, determine if you have performed eligible work.
Work Eligibility

To be eligible, Work must be:

- Direct result of event
- Location: the work must be within the designated disaster area.
- Legal Responsibility: the work must be the legal responsibility of an eligible applicant.
- Not the responsibility of another federal agency

The work must meet the following criteria to be eligible for public assistance funding:
The work must:
- Be a direct result of Hurricane Nicole
- Be located within the designated disaster area,
- Be the legal responsibility of an eligible Applicant
- **AND** not the responsibility of another federal agency
Last step is to determine if costs are eligible
Cost Eligibility

To be eligible, Cost must be:

- In Compliance with federal, state, and local laws and regulations.
- Authorized and not prohibited under Federal, State, Territorial, Tribal, or local government laws or regulations.
- Consistent with the Applicant’s internal policies
- Reasonable and necessary to accomplish the work

To be eligible for reimbursement, the cost must be reasonable and necessary to accomplish eligible work

The cost must be:
- Authorized and not prohibited under Federal, State, Territorial, Tribal, or local government laws or regulations.
- And the cost must be consistent with the Applicant’s internal policies, regulations, and procedures that apply uniformly to both Federal awards and other activities of the Applicant.
Examples of Ineligible Costs

- Duplication of Benefits (DOB)- the Applicant receives disaster related funding from two sources for the same item of work
  - Funding from another Federal agency, insurance, etc.
  - Loss of revenue & tax revenue

Ineligible costs include but are not limited to:
- Ding! Ding! Ding! Duplication of Benefits, meaning the Applicant receives disaster related funding from two sources for the same item of work. For example, funding from another Federal agency or insurance for the same item of work for which the applicant is requesting FEMA funding.
- Additional examples of ineligible costs include
- Loss of revenue & tax revenue

Duplication of Benefits (DOB) definition [https://emilms.fema.gov/is_1024/groups/57.html](https://emilms.fema.gov/is_1024/groups/57.html)
The assistance FEMA provides through its PA Program is subject to a cost share. The federal cost-share is no less than 75 percent Federal and 25 percent non-federal. Now, the State of Florida will split the non-federal share with the Local Government Applicants. So, you will be responsible for 12.5% and the state will match the remaining 12.5%. Please note, if you cannot provide the 12.5% cost share, you could jeopardize your ability to receive full PA funding.

Local governments who identify as fiscally constrained are able to apply for a waiver for the match portion they would otherwise be responsible for. This application must be received by the Governor’s Office within the first 18 months after the disaster declaration date and for Hurricane Nicole, that’s by June 13, 2024 (F.F. 252.37):
For state agencies, the federal cost-share is no less than 75 percent Federal and 25 percent non-federal. Meaning, State Agencies are responsible for the full 25 percent non-federal share. Please note, if you cannot provide the 25% cost share, you could jeopardize your ability to receive full PA funding.

*Florida Statute 252.37(5)(a)*

Eligible work is broken into the following public assistance categories:

- Cat. A (Debris Removal) & Cat. B (Emergency Protective Measures) are both considered Emergency Work.
  - The deadline to complete Emergency Work is 6-months from the declaration date
  - Within its discretion, the State, as the Recipient, has the authority to grant a time extension of up to 6 months, and then FEMA may grant additional time extensions
- Cat. C – G are considered Permanent Work.
  - The deadline to complete Permanent Work is 18-months from the declaration date
  - Within its discretion, the State, as the Recipient, may grant a time extension for up to 30-months for Permanent work on a project-by-project basis. 44 C.F.R. §206.204

Now let’s review emergency work.
A few items to note for Emergency Work and Force Account Labor, which by the way means: labor performed by non-contracted forces. For Emergency Work, budgeted employees straight time is not eligible only their overtime, and for unbudgeted employees you can claim both straight time and overtime.

When you submit your documentation for force account labor, please ensure you include the following:

The employees’
- Name
- Their Job Title and Function
- What type of Employee they are: if they’re full-time, temporary, Exempt, or Non-exempt
- The days and hours they worked and for this, please include the time they clocked in and out
- Their Pay rates with fringe benefits
- A description of work performed which includes their location, and you can provide in this in daily logs, activity reports, or other methods.
- Timesheets, and your
- Pay Policy

Please note, we’re reviewing labor costs now. But equipment, materials, and supplies can also be found eligible as long as they are documented properly.
Now, let’s go over Category A - Debris Removal:
Debris removal work eliminates an immediate threat to lives, public health and safety. It promotes the economic recovery of the affected area to benefit the community at large. Debris includes, but is not limited to
• vegetative debris, construction and demolition debris, and vehicle and vessel wreckage.
Clearance, removal, and disposal, will be considered if the removal is in the public interest, meaning it’s not merely benefiting an individual or a limited group of individuals.
On September 6, 2022, in FEMA’s Memo *Simplifying Public Assistance Part 2* new FEMA debris guidance was released that changed the measurement requirements. However, applicants must ensure they adhere to the contract terms in place with pre-existing and standby debris vendor contracts.
A link to this document is included in the Additional Resources pdf. *PAPPGv4v4, Chapter 7. Emergency Work Eligibility, I. Debris Removal*
Alternative Procedures for Debris Removal

Applicants may elect to participate in the Alternative Procedures for debris removal and receive reimbursement for straight-time for the Applicant’s budgeted employees that conduct debris removal activities.

The Applicant opts-in by including straight-time in their debris removal (Category A) project claims.

Now, let’s go over some alternative procedures for Debris Removal:

Applicants may elect to participate in the Alternative Procedures for debris removal and receive reimbursement for **straight-time** for the Applicant’s **budgeted** employees that conduct debris removal activities. The Applicant opts-in simply by including straight-time in their debris removal (Category A) project claims.

Work with your FEMA PDMG to include straight time of your budgeted employees who conduct debris removal activities in your CAT A projects.
Debris removal from private property (PPDR) is the responsibility of the property owner and is usually ineligible under the PA Program. However, in limited circumstances, based on the severity of the impact of an incident and whether debris on private property is so widespread that it threatens public health and safety or the economic recovery of the community, FEMA may determine that debris removal from private property is eligible under the PA Program.

In such cases, FEMA works with the State, Local, Territorial, and Tribal governments (SLTT) to designate specific areas where debris removal from private property, including private waterways, is eligible.

There is an approval process for PPDR. You can reference the PAPPG version 4 for more information

Next, let’s take a look at private roads.
Private roads are those that are not owned, operated or maintained by SLTT governments. These private roads can include orphan roads, roads in gated communities, and homeowners’ association roads.
FEMA categorizes private roads into one of two categories, those that are open to the public, and those that are rarely used or have limited public access.
For private roads to be considered open to the public, the public must have unrestricted access (meaning no locks, gates, or guards on the road) and the public must frequently use the private road.
If that is the case, then removal and disposal of the debris, including debris placed at the curbside by residents, is in the public interest and the Applicant is not required to submit documentation demonstrating the debris removal is in the public interest.
Please note, this does not include debris on private driveways or parking lots.

Private Property Debris Removal (PPDR)

Debris Removal from Private Roads
Rarely Used or Limited Public Access

If the public does not have unrestricted access (locks, gates, or guards), or the road is rarely used by the public, then removal and disposal of the debris, including debris placed at the curbside by residents, is typically not eligible for reimbursement.

Required documentation:
- Is in the public interest
- Related to health or economic impacts
- Legal responsibility of the Applicant
- Permission and Indemnification

Now, let's review private roads that are rarely used or have limited public access.

If the public does not have unrestricted access (meaning roads with locks, gates, or guards on them) or the road is rarely used by the public, then removal and disposal of the debris, including debris placed at the curbside by residents, is typically not eligible for reimbursement. However, to be considered eligible for reimbursement the Applicant is required to submit documentation demonstrating all of the following:

That the debris removal:
1. Is in the public interest
2. Is related to health or economic impacts
3. Is the legal responsibility of the Applicant
4. That the applicant has permission or Right of entry (Because this road is privately owned, the Applicant must show proof that they received permission to remove the debris), and
5. Indemnification – Proof that the owner of the private road will not file a lawsuit against the Applicant for removing the debris on their road.

Now, let’s look at Commercial Property Debris Removal
The most important item I want you to remember here is that Commercial Property debris removal requires FEMA’s Pre-approval.
Removal of debris from commercial properties, such as industrial parks, golf courses, cemeteries, apartments, condominiums, and trailer parks is usually not eligible because commercial enterprises are expected to retain insurance that covers debris removal. In very limited, extraordinary circumstances, FEMA may grant an exception. However, FEMA must approve the work prior to the Applicant removing the debris.
You may be wondering, what about first push??

Debris clearance (also known as first push or cut and toss) for emergency access may be eligible as Category B work if it meets the criteria in PAPPGv4.

First Push may even be eligible for PPDR even if the private road was rarely used or had limited public access. However, this is only considered a Category B, not A activity.

Now, let’s review Category B, Emergency Protective Measures

Emergency Protective Measures are activities taken **before, during, and after** a disaster and are necessary to **eliminate or reduce an imminent threat to life, public health or safety**, or they eliminate or reduce immediate threat of significant damage to improved public or private property.

In addition to the examples listed on this slide, you may also be required to submit the following:

- A narrative and methodology regarding how personnel costs were calculated
- And a statement including:
  - 1. that only Overtime and/or reassigned (unbudgeted) labor costs are included
  - 2. that no administrative leave hours were incorporated in documented costs, and
  - 3. that staging was not utilized and is not incorporated in documented costs
Most common activities for reimbursement occur within or at the direction of an **Emergency Operations Center or EOC**.

The Applicant may use its EOC to direct and coordinate resources and response activities for a period of time. Response activities conducted at EOCs are eligible provided they are associated with eligible work. Costs associated with operating the EOC are also eligible, including, but not limited to:

- Increased utility costs
- Costs to lease a facility
- Supply costs
- Meal costs

Please refer to the PAPPGv4 for guidance on limitations related to these costs.

*PAPPGv4 Chapter 7: Emergency Work Eligibility, II. I. Emergency Operations Centers*
Category B – Emergency Berms

Emergency Berms on Beaches

If a natural or engineered beach has eroded to a point where flooding from a 5-year storm could damage improved property, then cost-effective emergency protective measures on the beach that protect the improved property against damage from that 5-year storm are eligible.

Seeing as how Hurricane Nicole affected many beach communities in our State, let’s review emergency protective measures for beaches.

If a natural or engineered beach has eroded to a point where flooding from a 5-year storm could damage improved property, then cost-effective emergency protective measures on the beach that protect the improved property against damage from that 5-year storm are eligible.

- Emergency sand berms are not intended to permanently restore the beach; they are intended only to provide protection from immediate threats.
- Placement of dune grass on an emergency berm is only eligible if it is required by permit and is an established, enforced, uniform practice that applies to the construction of all emergency berms within the Applicant’s jurisdiction, regardless of the circumstance.

_PAPPGv4 Chapter 7 Emergency Work Eligibility II.X.4._
Now, let’s talk about power restoration. This is always a topic of discussion due to the administrative categorization of power restoration work. In short, FEMA recognizes that power restoration is unique. This work can both save lives and restore the functions of a facility, thus able to be categorized as Category B and Category F.

In the simple procedures memo released on September 6, 2022, FEMA is providing applicants flexibility in how they claim these costs. Applicants may either claim the work as Category B or Category F.

Let’s break those down,

If claimed as Category B- (Emergency Work) keep in mind that force account labor straight-time for budgeted employees is not eligible. 406 mitigation funding is also not eligible under emergency work.

If claimed as Category F- (Permanent Work) straight time for budgeted employees is eligible and so is 406 mitigation.

It’s important to note that temporary power restoration work that is not completed in accordance with applicable codes and standards will be categorized as Category B. You should work with your assigned PDMG to categorize work appropriately.

Now, let’s review donated resources

- Applicants may use the value of donated resources such as equipment, supplies, materials, or labor to offset the non-Federal share of their eligible projects. Remember, Local Governments that’s the 12.5% you’ll be responsible for, and State Agencies will be responsible for 25%. All donated resources being claimed must be documented. Make sure you show who, what, when, where, why, and how the donated resources activity occurred. For example, for your volunteers, make sure you include their:
  - Name, the days and hours they worked and for this, please include the time they clocked in and out, and
  - A description of work performed which includes their location. You can provide this in daily logs, activity reports, or other methods.
- FEMA considers unpaid individuals who volunteer their labor to an Applicant to be a third party even if they are officially members or employees of the Applicant’s organization
- FEMA prepares the donated resources project separate from the Emergency Work projects for the Applicant’s incurred costs. FEMA does not obligate the donated resources project until after it obligates all the Applicant’s Emergency Work projects.
- Please remember, if the donated resources are not sufficiently documented, they will not be considered eligible to offset the non-federal cost share.

Let’s move on to permanent work, Categories C-G.
Category C – Roads and Bridges

Includes:

- **Roads**: surfaces, bases, shoulders, ditches, drainage structures, low water crossings, etc.
- **Bridges**: decking, pavement, piers, girders, abutments, slope protection, approaches, etc.

Does not include:

- **Unmaintained roads/bridges**
- **FHWA roads/bridges**
- **Private roads, with exceptions**

Category C- Roads and Bridges

This includes repairs of roads, bridges and associated features such as bases, shoulders, and ditches.

YOU the Applicant must,

- Ensure that the road was maintained prior to the disaster – ONLY repairs of damages caused by the disaster are eligible.
  - Dirt roads, for example, may appear damaged by the disaster when in fact it may have been due to **lack of maintenance**. So, be prepared to submit maintenance records.
  - There is new policy guidance on this in FEMA’s Submerged Road Policy 104-009-013 that was published in April of 2021. As mentioned previously, the link to this document and others is included in the Additional Resources pdf.
- For Bridges also be sure to have the most recent safety inspections on hand or available.

Some ineligible examples of Category C projects include

- **Unmaintained** roads or bridges
- Federal Highway Administration roads
- And Private roads with some exceptions.

*PAPPGv4, Chapter 8. Permanent Work Eligibility, IX. Eligibility Considerations by Facility, A. Roads and Bridges*

*PAPPGv4, TERMS and DEFINITIONS*
Here are some best practices for unpaved roads:
Ensure Rural Communities have a plan for establishing pre-disaster condition
Record Road Conditions with photos and/or video on a regular basis; and
Keep Thorough Records of Maintenance and Repairs to Include Quantities of Materials
Category D – Water Control Facilities

Includes:
- Dams, reservoirs, levees, lined and unlined engineered drainage channels, canals, aqueducts, sediment basins, shore protective devices, irrigation/pumping facilities.

Does not include:
- Facilities under the control of the US Army Corps of Engineers (USACE) or National Resource Conservation Service (NRCS) or any other Federal agency with very few exceptions.

Category D- Water Control Facilities
This includes repairs of irrigation systems, drainage channels and pumping facilities to include levees.
This does not include water control facilities under the control of another Federal agency with very few exceptions,
So please, check with your water management district if you are unsure of the legal responsibility of your Water Control Facility.
Category E - Buildings and Equipment

Includes:

- Buildings, structural components, interior electrical or mechanical work, and contents.
- Replacement/repair of vehicles and equipment damaged by the disaster or damaged in the response.

Does not include:

- Damages covered by insurance.
- Accidental damages/neglect.

Category E - Buildings and equipment
This includes repairs or replacement of buildings, including their contents and systems, or their heavy equipment.

Work required to restore damaged buildings will be considered along with upgrades required by Building Codes and Standards. This includes all structural and non-structural components, including mechanical, electrical, and plumbing systems, as well as contents, furnishings, and equipment within the building.

But this does not include damages already covered by insurance, because ding! ding! ding! that would be a duplication of benefits.
Category F - Utilities

This includes repairs of water treatment and delivery systems; power generation facilities and distribution lines; and sewage collection and treatment facilities.

Please note, FEMA will not provide reimbursement for increased operating expenses or revenue lost if a utility is shut down.
**Category G – Parks & Recreation, Other**

**Includes:**
- Mass transit facilities, swimming pools, playgrounds, tennis courts, piers, docks, picnic tables, golf courses, walkovers, anything not in Categories C – F.
- Beach Restoration on beaches.

**Does not include:**
- Unimproved natural features. Replacement of trees, shrubs, ground cover **unless** for slope stabilization or to minimize erosion.
- PNP-owned recreational facilities **unless** the facility is providing eligible essential social services.

---

- Finally, Category G, Parks and Recreation, Other
- Category G projects include the repair and restoration of
  - parks, playground equipment, beaches, ball fields, public cemeteries and other facilities that do not otherwise fit in categories C-F.
- This does not include unimproved natural features, or the replacement of trees, shrubs, or ground cover **unless** they are used for slope stabilization or to minimize erosion, and it does not include PNP-owned recreational facilities **unless** the facility is providing eligible essential social services.

*PAPPG, v4. APPENDIX B: PRIVATE NONPROFIT FACILITY ELIGIBLE EXAMPLES*

*PAPPG, v4. Chapter 8. IX. Eligibility Considerations by Facility. E. Parks, Recreational, Other (Category G)*
A beach is considered an eligible facility when **all** of the following conditions exist:

- The beach is engineered and is not a federally constructed shoreline under the specific authority of the United States Army Corps of Engineers (USACE),
- The beach was constructed by the placement of imported sand and the Applicant has established and adhered to a maintenance program involving periodic renourishment with imported sand to preserve the original design, and
- Proof of the pre-disaster condition is provided.
Applicants should provide the following information to support eligibility of a beach:
All design studies, plans, construction documents, and as-builds for the original nourishment;
All studies, plans, construction documents, and as-builds for every renourishment;
Documentation and details of the maintenance plan, including how the need for renourishment is determined and funded; and
Pre- and post-storm profiles that extend at least to the seaward edge of the sub-aqueous nearshore zone.
• This is an example of a Typical Beach Profile.
• As you can see, the subaqueous zone is below the water
Next let’s go over project costs such the PA Project Threshold, management costs, and a quick overview of Expedited Projects.
Public Assistance projects are processed as either small or large projects. FEMA implemented a major change to its PA program by increasing the Large Project threshold to $1 million. The minimum threshold necessary for an eligible project is $3,800 dollars.

### Project Threshold

<table>
<thead>
<tr>
<th>Small Project</th>
<th>Large Project</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Funding is based on initial cost estimate</td>
<td>• Project is paid as work is complete</td>
</tr>
<tr>
<td>• $3,800 to &lt;$1M</td>
<td>• $1M and greater</td>
</tr>
</tbody>
</table>

**Public Assistance projects are processed as either small or large projects.**

On August 3, 2022, FEMA implemented a major change to its Public Assistance program by increasing the Large Project threshold to $1 million.

Let’s break that down, if the project cost is less than $1M, the project is processed as a small project. If the project cost equals, or exceeds the threshold, the project is processed as a large project.

Please note, the minimum threshold necessary for an eligible project is $3,800 dollars.

Let’s look another difference between a small and a large project:

For Small Projects
- Funding is based on an initial cost estimate, and

For large projects:
- The project cost is paid as work is accomplished

Management Costs

- Management Costs are the costs incurred to meet administrative requirements while working within the Public Assistance (PA) program and developing eligible PA projects.
- 5% of the total award amount obligated

<table>
<thead>
<tr>
<th>Management Cost</th>
<th>Examples</th>
</tr>
</thead>
<tbody>
<tr>
<td>Preliminary Damage Assessments</td>
<td>Developing the detailed site-specific damage description</td>
</tr>
<tr>
<td>Meetings regarding the PA Program or overall PA damages claimed</td>
<td>Evaluating Section 406 hazard mitigation measures</td>
</tr>
<tr>
<td>Organizing PA damage sites into logical groups</td>
<td>Preparing Small and Large Projects</td>
</tr>
<tr>
<td>Correspondence with Recipient / affiliate</td>
<td>Reviewing PWs</td>
</tr>
<tr>
<td>Site inspections</td>
<td>Collecting documents to support a claim</td>
</tr>
<tr>
<td>Travel expenses</td>
<td>Requesting disbursement of PA funds</td>
</tr>
</tbody>
</table>

Next, let’s review management costs which are the costs incurred to meet administrative requirements while working within the Public Assistance program and developing eligible PA projects.

There is not a minimum threshold for this category.

FEMA formulates a Project Worksheet or (PW) for a maximum of 5% of the total award amount obligated for a subrecipient at the time of its request.

Total award amount is the **actual** eligible PA project cost including the non-federal share, after insurance and any other reduction. This does not include any Donated Resources projects.

Although management costs are awarded at the end of the project, please start documenting your efforts now. It is very important that you document all your administrative costs to substantiate the eligibility of costs and activities claimed as management costs. Your documentation should include activity logs, procurement data, invoices, and proof of payments.
Management Costs - Category Z

Contributions for management costs are based on actual costs incurred up to 5 percent of the total award amount for each Subrecipient.

- Includes management costs for all projects, both Large & Small (except Category B Donated Resources PWs)
- Obligated as a Category Z Project Worksheet
- Funded at a 100 percent Federal cost share

As a reminder, management costs are based on actual costs incurred up to 5% of the total award.
This includes management costs for all projects, both Large & Small (except Category B Donated Resources PWs)
- it is obligated as a Category Z Project Worksheet, and
- it is funded at a 100 percent Federal cost share
Expedited Project Overview

After FEMA determines you are eligible for the PA Program and you begin project development, such funding may be available as an "Expedited Project."

Obligated at 50% of eligible costs incurred for CAT A & CAT B

Allowed for Large Projects ONLY ($1M or higher)

Once the initial award of the expedited project is processed at 50% of the eligible costs incurred, applicants will need to provide all required documentation prior to the remaining funds being awarded

Now, Expedited projects: We understand that some Applicants may need access to funding on an expedited basis in order to address costs incurred responding to or recovering from the disaster.

After FEMA determines you are eligible for the PA Program and you begin project development, such funding may be available as an “Expedited Project.”

Please note, you will have 60 days following your RSM to Submit your request for an Expedited Project, if desired.

Expedited Projects are obligated at 50 percent of eligible costs incurred for Debris Removal (Category A) and Emergency Protective Measures (Category B).

Only projects totaling $1M or greater or large projects can be processed through the Expedited project process.

Once the initial award of the expedited project is processed at 50% of the eligible costs incurred, applicants will need to provide all required documentation prior to the remaining funds being awarded.

If you have questions on an eligibility determination for your organization, please bring them to your Recovery Scoping Meeting held after submitting your RPA.

_B. Expedited Projects for Emergency Work_
Let’s discuss procurement requirements for using contracts for eligible work.
FEMA provides PA funding for contract costs based on the terms of the contract if the Applicant meets Federal procurement and contracting requirements.

2 C.F.R. § 200 (Uniform Rules) and/or 44 C.F.R. § 13.36

Federal procurement requirements for Tribal, local governments, and PNPs are found at 2 C.F.R. § 200.318 through 200.327.

Applicants must use their own documented procurement procedures. Unless the corresponding local procurement rule is more stringent, Federal law and standards should be applied.

- FEMA provides PA funding for contract costs based on the terms of the contract if the Applicant meets Federal procurement and contracting requirements.
- Contract costs must be reasonable
- You may be wondering "What is reasonable"??
  - FEMA generally considers contract costs reasonable when the Applicant adheres to full and open competition
  - Applicants must use their own documented procurement procedures. Unless the corresponding local procurement rule is more stringent, Federal law and standards should be applied.
  - Please note, you MUST have an internal procurement policy before submitting your RPA. 2 C.F.R. § 200.319
- Some general requirements and best practices for procurement are:
  - 1. Document everything and retain those documents related to procurement
  - 2. Include FEMA’s required clauses and provisions in contracts
  - 3. Take the required 6 affirmative steps to encourage women and minority small business owners and labor surplus areas if applicable to participate in the contracting process
  - 4. Please consider attending procurement trainings offered by FEMA. A schedule of virtual trainings being offered right now is available on fema.gov.
- Another best practice we recommend for our applicants:
Be sure that your organization identifies multiple staff members who are familiar with the processes and the documentation that your organization will be required to submit to the State and FEMA PA staff. Identifying these individuals now can ensure a seamless review, project development, and anticipated approval of your organization's damages.

You should have a procurement policy in place detailing how your organization acquired services and contracted services to be in compliance with federal procurement guidelines. If your organization does not have a procurement policy, then you may consider downloading a template. Your organization’s procurement policy needs to be in place prior to submission of your Request for Public Assistance.

*Procurement Under Grants Training Schedule*

https://www.fema.gov/grants/procurement/training
Exigency or Emergency?

Exigency
A need to avoid, prevent or alleviate serious harm or injury, financial or otherwise

Emergency
Immediate action needed to alleviate a threat to life, public health or safety, or improved property

Now, Exigency or Emergency?
The existence of an Executive Order from the Governor does not automatically create an exigency (ex-uh-genc-ee) or emergency. These situations are LIMITED to as long as the dangerous condition exists. Once the condition is over, FEMA would expect the applicant to terminate these contracts and competitively procure a new contract (if there is still a need to continue work).

Please check your specific circumstances to determine whether an emergency still exists in your area. Relying on the Governor’s Executive Order for the whole State of Florida may not be enough to indicate the continuation of an emergency situation.

If you are using sole sourcing due to emergency or exigency, you must
- Justify it with proper documentation
- Use it only during the period of actual exigent or emergency circumstances
- And transition to a competitive method, as soon as the period ends.
Applicants must:

- Perform a cost or price analysis in connection with every procurement action in excess of the Simplified Acquisition Threshold, currently $250K, including contract modifications.
- Make independent estimates before receiving bids or proposals.

An Applicant must perform a cost or price analysis in connection with every procurement action in excess of the simplified acquisition threshold, currently $250,000, including contract modifications.
  - The method and degree of analysis depends on the facts surrounding the specific procurement situation.
  - And the Applicant must make independent estimates before receiving bids or proposals.
Now let’s review some acceptable contract types

FEMA reimburses costs incurred using three types of contract payment obligations:
- fixed-price,
- cost-reimbursement, and
- to a limited extent, time and material (T&M).
- Include required contract provisions
- Maintain oversight
- FEMA does not reimburse costs incurred under a cost plus a percentage of cost contract or a contract with a percentage of construction cost method.

A FEMA guidance document outlining these required contract provisions can be found on FloridaPA under the PA Info TAB.

https://emilms.fema.gov/is_1009/groups/21.html
FEMA advises against the use of Time & Material contracts and generally limits the use of these contracts to a reasonable time based on the circumstances during which the Applicant could not define a clear scope of work (SOW).

FEMA may reimburse costs incurred under a T&M contract only if all the following apply:

- No other contract was suitable;
- The contract has a ceiling price that the contractor exceeds at its own risk; and
- The Applicant provides a high degree of oversight to obtain reasonable assurance that the contractor is using efficient methods and effective cost controls.

FEMA advises against the use of Time & Material contracts and generally limits the use of these contracts to a reasonable time based on the circumstances during which the Applicant could not define a clear scope of work.

FEMA reimburses costs incurred during a Time & Material contract only if all of the following apply:

1. No other contract was suitable;
2. The contract has a ceiling price that the contractor exceeds at its own risk; and
3. The Applicant provides a high degree of oversight to obtain reasonable assurance that the contractor is using efficient methods and effective cost controls.

The Applicant should define the Scope of Work as soon as possible to enable procurement of a more acceptable type of contract.
Now, let’s review some special considerations which are issues other than program eligibility that could affect the scope of work and the funding of a project such as:

Insurance
Floodplain Management
Hazard Mitigation
Environmental Protection, and
Historic Preservation and Cultural Resources
Insurance Proceeds

PA Funding will be reduced by:

- Actual insurance proceeds, if known.
- Anticipated insurance proceeds based on the applicant’s policy, if known.

Applicants must pursue and recover entitled claims

There cannot be any duplication of benefits.

Obtain & Maintain

- Applicants must insure facilities with the types and extent of insurance reasonably available, adequate, and necessary to protect against future loss to the property.

Ding! Ding! Ding! No double-dipping! FEMA cannot provide assistance for disaster-related losses when duplication of benefits occurs for an applicant, which, as a reminder, means that the Applicant receives disaster-related funding from two sources for the same item of work. For instance, funding from insurance and FEMA for the same item of work; not acceptable.

Before FEMA approves assistance for a property, an applicant must provide FEMA with information about any actual or anticipated insurance settlement or recovery it is entitled to for that property. This is because FEMA PA funding will be reduced by these insurance proceeds to avoid a duplication of benefits.

Applicants must make reasonable efforts to pursue and recover all claims.

Applicants that receive PA funding for permanent work to replace, repair, reconstruct, or construct a facility must obtain and maintain insurance on the FEMA funded facilities with the types and extent of insurance reasonably available, adequate, and necessary to protect against future loss to the property.

*Stafford Act § 311, 42 U.S.C. § 5154; 44 C.F.R. § 206 Subpart I.*

*Duplication of Benefits (DOB) definition https://emilms.fema.gov/is_1024/groups/57.html*
FEMA must reduce PA funding when the facility is:
- Located in an area that FEMA has identified as a Special Flood Hazard Area (SFHA) for more than 1 year;
- Damaged by flooding, and
- Uninsured for flood loss.

If the Applicant does not have flood insurance for the facility or carries inadequate flood insurance for the insurable facility, FEMA reduces eligible project costs by the lesser of:
- The maximum amount of insurance proceeds that could have been obtained from an NFIP standard flood insurance policy for the building and its contents; or
- The value of the building and its contents at the time of the incident.

One type of insurance that you may consider obtaining and maintaining is a standard flood insurance policy provided by the National Flood Insurance Program (NFIP)

Please note, FEMA must reduce PA funding when the facility is:
- Located in an area that FEMA has identified as a Special Flood Hazard Area for more than 1 year;
- Is damaged by flooding; and
- Uninsured for flood loss.

If the Applicant does not have flood insurance for the facility or carries inadequate flood insurance, FEMA reduces eligible project costs by the lesser of:
- The maximum amount of insurance proceeds that could have been obtained from an NFIP standard flood insurance policy for the building and its contents; or
- The value of the building and its contents at the time of the incident.

So, please notify your PDMG if you believe your facility meets this criteria.

44 C.F.R. § 206.252
406 Hazard Mitigation

Hazard Mitigation, Section 406 of the Stafford Act is a funding source for cost-effective measures to reduce or eliminate the potential threat of similar damage to a facility during a future disaster.

- These are measures to prevent repetitive damage and are for permanent work only.
- Section 406 mitigation is applied on the parts of an eligible facility that were damaged during a declared disaster.

FEMA may approve if cost is:

- Up to 15% of eligible project cost
- Can be up to 100% of eligible project cost if on FEMA’s pre-approved list
- If not on FEMA’s pre-approved list, Appendix J (PAPPGv4), must be cost effective based upon acceptable benefit-cost analysis (BCA)

Next, let's review 406 Hazard Mitigation -

Hazard Mitigation, Section 406 of the Stafford Act is a funding source for cost-effective measures to reduce or eliminate the potential threat of similar damage to a facility during a future disaster.

These are measures to prevent repetitive damage and are for permanent work only.

Section 406 mitigation is applied on the parts of an eligible facility that were damaged during a declared disaster.

FEMA considers mitigation measures to be cost-effective if any of the following criteria are met:

1. The cost for the mitigation measure does not exceed 15 percent of the total eligible repair cost (prior to any insurance reductions)
2. The mitigation measure is specifically listed in Appendix J: Cost-Effective Hazard Mitigation Measures in the PAPPG AND the cost of the mitigation measure does not exceed 100 percent of the eligible repair cost (prior to any insurance reductions) of the facility or facilities for which it applies, or
3. The Recipient or Applicant demonstrates through an acceptable benefit-cost analysis (BCA) methodology that the measure is cost-effective.

Many mitigation measures that do not meet the first two criteria mentioned previously prove to be cost-effective based on a BCA. If that is the case, FEMA, the Recipient, and the Applicant will work together to develop a BCA methodology to determine whether the project is cost-effective.
Moving on to Environmental and Historic Preservation (EHP), FEMA uses all practical means and measures to protect, restore and enhance the quality of the environment, to avoid or minimize adverse impacts to the environment, and to preserve historic, cultural and natural aspects of national heritage, as required by Federal environmental and historic preservation policies and laws.

EHP reviews must occur before construction, let me repeat that.. Environmental and Historic Preservation reviews must occur before construction and failure to comply with applicable Federal, State and local EHP requirements could jeopardize or delay your PA funding.

EHP Codes and Standards IS 1019 https://emilms.fema.gov/is_1019/groups/62.html
Environmental and Historic Preservation (EHP)

All PA awards must comply with the following:

<table>
<thead>
<tr>
<th>National Historic Preservation Act</th>
<th>Coastal Zone Management Act</th>
</tr>
</thead>
<tbody>
<tr>
<td>National Environmental Policy Act</td>
<td>Farmland Protection Policy Act</td>
</tr>
<tr>
<td>Endangered Species Act</td>
<td>Fish and Wildlife Coordination Act</td>
</tr>
<tr>
<td>Clean Water Act</td>
<td>Wild and Scenic Rivers Act</td>
</tr>
<tr>
<td>Coastal Barrier Resources Act</td>
<td>Magnuson-Stevens Fishery Conservation and Management</td>
</tr>
<tr>
<td>Migratory Bird Treaty Act</td>
<td>Floodplain Management</td>
</tr>
<tr>
<td>Resource Conservation and Recovery Act</td>
<td>Protection of Wetlands</td>
</tr>
<tr>
<td>Clean Air Act</td>
<td>Environmental Justice</td>
</tr>
</tbody>
</table>
All PA awards must comply with the applicable EHP laws and regulations and all EHP permits such as the ones outlined in the National Historic Preservation Act, the National Environmental Policy Act, the Endangered Species Act, and so on...

The links to all these policies are available in the Additional Resources pdf.

**Clean Air Act (CAA)**

**Environmental Justice Act**
National Historic Preservation Act

- If the facility is listed in, or meets the criteria to be listed in, the National Register of Historic Places, then costs associated with work to comply with that specific code or standard are eligible, even if repair costs exceed replacement costs.

- This is an exception to the regulatory requirement that when a facility is eligible for replacement, FEMA limits eligible costs to the less expensive of repairs or replacement.

Let’s take a closer look at the National Historic Preservation Act: If your facility is listed in, or meets the criteria to be listed in, the National Register of Historic Places, then costs associated with work to comply with that specific code or standard are eligible, even if repair costs exceed replacement costs.

This is an exception to the regulatory requirement that when a facility is eligible for replacement, FEMA limits eligible costs to the less expensive of repairs or replacement.

Please inform your PDMG if your facility has a building that is on or meets the criteria to be on the National Register of Historic Places. You can check this by going to: nps.gov

[www.nps.gov/subjects/nationalregister/database-research.htm](http://www.nps.gov/subjects/nationalregister/database-research.htm)

[https://emilms.fema.gov/is_1016/groups/90.html](https://emilms.fema.gov/is_1016/groups/90.html)

*National Register of Historic Places, Creative Commons License,* [flickr.com](http://flickr.com) [https://www.flickr.com/photos/samagnew/6138737993](https://www.flickr.com/photos/samagnew/6138737993)
Finally, let's go over some requirements to receive this reimbursement.
In order to receive reimbursement, the Applicant is required to enter into a Funding Agreement with the State (FDEM) as a pass-through entity. The Funding Agreement outlines the terms and conditions of accepting Federal funding through the Public Assistance Program, and Applicants will enter into a Funding Agreement with the State during the Project Development Phase.
All documents are subject to an audit by the State, FEMA, and the U.S. Department of Homeland Security, Office of Inspector General. Failure to properly document any claimed expenses may result in loss of funding.

You must maintain ALL records for 5 years post Account closeout. So, preserve everything for 5 years after the last activity is performed on the account. Appeals and other administrative actions could shift that deadline slightly.

And finally, documentation and retention of records:

You, as the Applicant, are responsible for establishing and maintaining accurate records of events or expenditures related to recovery work for which you request FEMA assistance. Failure to properly document any claimed expenses may result in loss of funding; and quarterly reports are required on all open large projects.
Congratulations! You may have determined that you are an eligible applicant, have an eligible facility, have performed eligible work, and have incurred eligible costs. If so, you’re ready to submit your request for public assistance! Let’s go over those steps.
How to Request an Account for Grants Portal

First, if you have never requested an account in Grants portal, you’ll want to follow these directions.

Please note, we will be providing the links to Grants Portal as well as an Applicant Quick Guide from FEMA in the chat.

To request Grants Portal access, go to the Grants Portal home page at grantee.fema.gov and click on “Register your Organization for Public Assistance”.

Grants Portal
https://grantee.fema.gov

You, the Applicant, are then prompted to complete basic information about the organization, contact information, and location and then submit the form for Recipient review.

The online form will prompt you to select the "Organization Type". If you select an incorrect "type", the processing of the RPA will be delayed. Public non-profit entities, such as those agencies of SLTT governments, are generally considered SLTT government entities and do not need to submit additional documentation required by Private Nonprofit Applicants. These entities should select the government organization type that best describes them.

If you are unsure of your type or are having any difficulties with registering or submitting your RPA, please email: [transition1] RPA.Help@em.myflorida.com to be connected with a State of Florida representative. To speak with a FEMA representative, call the hotline at [transition2] 1-866-337-8448, or email: [transition3] FEMA-Recovery-PA-Grants@fema.dhs.gov
For government entities, if there are events with an open RPA enrollment period in the State, you may continue to submit an RPA with this account creation request. If you choose not to, the Recipient will review only the account creation request and you may submit your RPA later.

After you complete the account request and the Recipient and FEMA approves the RPA request (if you chose to submit it), you will receive a system-generated email with a username and temporary password to gain access to Grants Portal.

The system will then prompt you to create a permanent password.

Once you have access to Grants Portal, you can choose to follow the instructions we are going to talk about next to either directly submit an RPA in the system or request an RPA to be submitted by the Recipient on your behalf.
How to Submit an RPA

Deadline to apply is January 11, 2023 or January 20, 2023

This section describes how an Applicant who has a Grants Portal account may submit its RPAs: simple, it’s directly through Grants Portal.

The Applicant logs into Grants Portal and selects “Click here to submit an RPA for your organization” on the Dashboard.

**Remember, the deadline to submit RPAs for Hurricane Nicole is January 11th for the original 10 counties and January 20th for the additional 51 counties.**
Next, complete all required information including naming the damaged facility and location and the primary purpose of the facility.
Private Nonprofit organizations should upload all required information and documentation here before clicking “next”
How to Submit an RPA via Grants Portal

When finished, click “Submit.”

Once submitted, the Recipient and FEMA review the RPA for Applicant eligibility. The Applicant can view the status of its RPA in Grants Portal.

Please note, an applicant can request an RPA is submitted by the Recipient (the State) on their behalf. If you’d prefer that, please provide the State with the information listed on page 5 of the Applicant Quick Guide from FEMA that has been linked for you in the chat.
Applicants will also be asked to enter in their Unique Entity Identifier (UEI) upon submitting their RPA. You can register for your UEI at [SAM.gov](https://sam.gov) which we have linked for you in the Additional Resources pdf.

*U.S. General Service Administration*

[https://sam.gov/content/home](https://sam.gov/content/home)
As a reminder, the important steps are:
• Get FEMA’s Grants Portal access, if needed.
• Submit your RPA.
• As always, Document your Efforts.
